

Table of Contents

Declaration.....	iii
Acknowledgements.....	iv
Abstract.....	vi
Table of Contents	viii
Chapter One Introduction.....	1
1.1 Introduction.....	1
1.2 Motivation of the study	1
1.3 Research gap statement.....	11
1.4 Theoretical background for SI technologies adoption and impacts	15
1.5 The concept of sustainable intensification and the Africa RISING programme.....	23
1.5.1 Sustainable intensification.....	23
1.5.2 Sustainable intensification in sub-Saharan Africa	25
1.5.3 Overview of the Africa RISING programme	26
1.5.4 Farm-level activities and technologies promoted by Africa RISING in northern Ghana	27
1.6 General study framework: linking adoption to sustainability and viability outcomes.....	30
1.7 General data analysis approaches.....	34
1.8 Empirical methods in the papers and rationale	39
1.9 Integrated data analysis framework of the study.....	40
1.10 Operationalising technology adoption in programme- based interventions.....	41

1.11 Other publications and contributions related to the thesis	43
References.....	44
Chapter Two Gender-disaggregated analysis of sustainable intensification practices adoption: a case of northern Ghana	56
Abstract.....	57
2.1 Introduction.....	58
2.2 Literature review	62
2.2.1 Gender, technology adoption, determinants, productivity and access to resources	62
2.3 Methodology	71
2.3.1 Study area.....	71
2.3.2 Data and sampling.....	73
2.3.3 Modelling framework and empirical estimation procedure.....	75
2.4 Results and discussion.....	78
2.4.1 Descriptive statistics.....	78
2.4.2 Gender, technology use, and challenges.....	81
2.4.3 Determinants of technologies adoption by males and females	88
2.5 Conclusion and recommendations	89
References.....	91
Chapter Three Agroecological dimension of sustainable intensification technologies adoption in northern Ghana....	101
Abstract.....	102
3.1 Introduction	103

3.2 Materials.....	107
3.2.1 Study area and project.....	107
3.2.2 Characteristics of the Sudan and Guinea savannah AEZs of northern Ghana.....	108
3.2.3 The sampling approach	109
3.2.4 Justification for inclusion of variables in the model.....	112
3.3 Methods.....	117
3.3.1 Modelling framework.....	117
3.3.2 Empirical estimation procedure	120
3.3.3 Limitations and direction for further study	121
3.4 Results and discussions	121
3.4.1 Descriptive statistics and test of means.....	121
3.4.2 Determinants of SIT adoption.....	126
3.5 Conclusions and policy implications.....	135
References.....	136
Appendix A	145
Chapter Four Examining the impact of row planting on labor use for sustainable food production among maize farmers in rural Ghana.....	147
Abstract.....	148
4.1 Introduction.....	149
4.2 The Concept: transition from broadcast seeding to row planting and labor implications.....	153
4.3 Materials.....	156

4.3.1 Area and data.....	156
4.4 Methods.....	159
4.4.1 Theoretical framework	159
4.4.2 The IV estimator.....	160
4.4.3 Justification for instruments (EXT and FBO) ..	162
4.4.4 Descriptive statistics and tests of means	165
4.5 Result and discussion	172
4.5.1 Model results for income and yield.....	172
4.5.2 Model results for labor use.....	175
4.5.3. Relationship between row planting technology adoption and labor use	180
4.6 Validity and robustness check	183
4.7 Conclusion and policy implications	185
References	187
Appendices.....	196
Chapter Five Summary, conclusion, policy implications for scaling up, contribution, limitation and future studies	205
5.1 Summary	205
5.2 Conclusion.....	209
5.3 Policy implications for scaling up.....	211
5.4 Contributions.....	213
5.5 Directions for future research.....	215
Appendix.....	217
Academic CV.....	217
