Keynotes and Invited Lectures	vii
Preface	ix
Comparison of stroke and stroke plane modulation in insect-like flapping wing forward flight control	
<i>Thomas Roelandt, Arno Melis, Jeroen Vanpoucke, Giheon Ha, Hoon Cheol Park, Dirk Vandepitte</i>	15
High-resolution spatiotemporal deformation measurements of an insect-like flapping wing	
<i>Jeroen Vanpoucke, Thomas Roelandt, Dirk Vandepitte</i>	23
Unsteady Vortex Lattice Method for Real-Time Aeroelastic Modeling	
<i>Mindaugas Dagilis, Sigitas Kilikevičius</i>	31
Incremental nonlinear dynamic inversion-based attitude control for a morphing wing UAV with CESCO	
<i>Jakub Pollák, Pavel Zikmund, Erik-Jan van Kampen</i>	37
Challenges of High-speed UAV using Forward Swept Wing	
<i>Jakub Jackuliak, Martin Bugaj</i>	45
Design and Experimental Evaluation of Flow Straightening Grids for Wind Wall Used in UAS Propulsion Testing	
<i>Daniel Urban, Tomáš Tluchoř, Jaroslav Malovaný</i>	51
Aerodynamic Design of Propellers for Small UAVs	
<i>Jan Klesa, Milan Dvorak</i>	59
Reinforcement Learning for UAV Adaptive Conflict Detection and Resolution with VFR-dominated Aircraft	
<i>Mingchuan Luo, Thomas Zeh, Hannes Braßel, Martin Lindner, Hartmut Fricke</i>	65
From Principles to Formulas: Measuring and Quantifying Fairness in UTM	
<i>Martina Hlavatá, Jakub Kraus</i>	75
Limitations of BVLOS Operations: Crossing Roads and Railways	
<i>Michal Cerny, Zdenek Svaty, Vaclav Michl</i>	83

Hotspot Capacity-Driven Scheduling Strategies for Reducing Airborne Delays in TMAs <i>Soner Demirel</i>	89
Assessing the Efficiency and Sustainability of Flight Transfers <i>Damir Kuchkarov, Peter Olexa, Anna Polánecká, Liana Karapetjan, Ladislav Capoušek, Peter Vittek</i>	97
Case Study of Ionospheric Impact on GNSS Surface Position Deviations Using ADS-B Data at LKPR <i>Jakub Trýb, Jakub Hospodka, Sébastien Lán</i>	107
Analyzing the Duration of Aircraft Pushback Operations Using ADS-B Data <i>Bo Stloukal, Petr Had, Jakub Hospodka</i>	113
Toward Intelligent and Sustainable Airport Operations: Digital Twins and AI-Based Slot Capacity Optimization and Resource Flows <i>Tatiana Gajduskova, Adam Turac, Diana Majorska</i>	121
Optimization of the Usage of Ground Handling Equipment at the Airport <i>Dušan Teichmann, Denisa Mocková, Andrea Hrníčková, Karel Ječmen</i>	131
Towards Smart and Sustainable Airfields: A Machine Learning Approach for Automated Runway Lighting Control <i>W.M.R. Jamaludin, W. M. Wan Mohamed</i>	137
The Electrification of Air Travel: An Overview of the Technical Development Needed Including Business Perspectives <i>Olof Lindahl, Jennifer Leijon</i>	143
Runway Occupancy Time and Exit Utilization Before and After the Construction of Rapid Exit Taxiway J at Prague Airport <i>Bo Stloukal, Petr Had, Jiří Volt, Milan Kameník, Slobodan Stojić</i>	149
Comparative analysis of modern SAF production pathways <i>Anna Yakovlieva, Rudolf Andoga, Pavol Kurdel, Martin Schrötter</i>	157
Perspective of Hydrogen-Powered Tractors <i>Karolina Hreskova, Peter Koscak, Martina Koscakova</i>	165
Impact of Fuel-Cell Stack Size and Atmospheric Conditions on Contrail Formation <i>Judith Rosenow, Thomas F. Geyer</i>	173
Traffic Flow Optimization in TMAs: Modeling and User Interface Implementation <i>Soner Demirel</i>	183
Potential Use of Additive Technologies and Polymer Materials in Environments With Chemical De-Icing Agents <i>David Demydenko, Petr Kalvoda</i>	191
Evaluation of Climate Change Effect on Adverse Meteorological Conditions for Air Traffic in the Czech Republic <i>Vilém Merta, Iveta Kameníková</i>	197

Impact of GNSS Interference on Departures from Helsinki Airport <i>Bo Stloukal, Jakub Steiner, Stanislav Pleninger, Jakub Hospodka</i>	203
Exploring the Applicability of a STAMP-Based Interorganizational Risk Management Coordination Taxonomy (IRM-CT) from Seaports to Aviation <i>Elvira Meléndez, Floris Goerlandt</i>	211
Integrate Model-Based Safety Analysis in Aircraft's System Safety Engineering Processes <i>Jan Kunz, Max Chopart, Milan Pšenička, Natalja Guskova, Raphaël Chagnoleau</i>	219
Multi-Agent LLM Classification of STPA Context Tables <i>Ioannis Katranas, Ioannis M. Dokas, Georgios Charalampos E. Kafoutis</i>	225
STPAI: On the Dangers of Performing STPA Using AI <i>Max Chopart, Francesco Simone, Antonio Javier Nakhal Akel</i>	237
Validating STPA Requirements for Digital Procedure Delivery in Single-Pilot Cockpits: An EFB Assessment Based on Pilot Experience <i>Max Chopart, Hamidreza Shoaee, Kiyofolo Benjamin Ouattara</i>	245
From Subsystems to Mission Control: A Dynamic ORM Framework Integrating STPA-T, EWaSAP, and Real-Time Safety Levels <i>Nikolaos A. Vasileiadis, Ioannis M. Dokas</i>	253
STPA and MBSA Integration applied to an AI-Based System for Comprehensive Safety Assessment <i>Julien Vidalie, Max Chopart, Xavier de Bossoreille</i>	259
Developing Systemic Safety Recommendations for Remote AFIS <i>Kateřina Grötschelová, Terézia Pilmannová, Anna Kuželková, Martin Černotík</i>	265
Categorizing Airports for Airlines: A Systemic Safety Approach <i>Kateřina Grötschelová, Jakub Řízek, Libor Kurzweil</i>	273
Comprehensive Assessment of Airport Perimeter Security Using a Multi-Layer Evaluation Methodology <i>Lubos Socha, Peter Hanak, Peter Korba, Tomas Havel, Frantisek Zajicek</i>	283
Tailoring STAMP/STPA to Analysis of Software Architecture Characteristics <i>Shigeru Kusakabe, Tomoya Taniguchi</i>	291
Identifying risks in UAV operations using the HFACS model <i>Michaela Tirpaková, Jozef Novotňák, Zoltán Szőke, Róbert Bréda, Jaroslav Kessler</i>	297
Learning from "One-and-Done" Exercises on a Complex Uncrewed Aircraft System <i>Maria Hagl, Kristian Fettig, Andreas Voigt, Tim Ruediger, Tobias Moors, Simon Petri, Felix Koeneke, Martin Laubner, Malte Rahm, Marcel Riedel, Daniel Rothe, Tatjana Kapol</i>	305
Comparative Analysis of SPECIFIC Category Operational Approvals Under Harmonized European Legislation: Belgium, Croatia, Czechia and Finland <i>Michal Černý, Tomáš Tluchoř, Daniel Urban, Gilles Fartek</i>	317

Navigating the Future of Space Exploration: An Overview of Reusable Launch Vehicles <i>Naiyar H. Shaman, Robert O. Walton</i>	325
The Space Based Aircraft Power <i>Miroslav Šplíchal</i>	331
Design of an Experimental Solid-Propellant Rocket <i>Radoslav Čatloš, Michal Hovanec, Ivana Koláriková, Volodymyr Tymofiiu, Samer Al-Rabeei, Peter Kaššay</i> . .	337
Comparison of Hazard Analysis Methods for Autonomous Collision Avoidance Systems in the Space Sector <i>Antonio Vinicius Diniz Merladet, Carlos Henrique Netto Lahoz, Chiara Manfletti, Tomas Costa Pinho, Joao Pe- dro Silva Rodrigues, Rodrigo de Melo Silveira, Guilherme Moreira, Diogo Silva Castilho, Felix Marti Valverde</i>	343
Aircraft Software Updates: A Systemic Approach to Security Threats and Their Impact on Safety <i>Nelli Safina, Natalja Guskova</i>	357
From Classroom to Cockpit: Experiential Learning in Early Pilot Training <i>Enrique Saavedra-Orellana, Toni Vallès-Català, Yuri Masó</i>	365
Procedures for Helicopter Operations in Degraded Visual Environments <i>Ondrej Mach, Jiri Ulvr, Petr Schwarz, Oliver Dziak</i>	371
A Speech-Driven AI Pseudopilot Integrated into a Locally Executable ATC Simulator <i>Daniel Pojhan, Vladimir Socha</i>	379
Autonomic Regulation under Cognitive Stress and Hypoxia in Aviation Context <i>Lenka Hanakova, Vladimir Socha, Boris Oniscenko, Vojtech Skvaril</i>	389
Vision-Based Fatigue Detection in Air Traffic Control: Multi-Modal Ground Truth Con- struction and Preliminary Results <i>Vladimir Socha, Bohdan Blaha, Lenka Hanakova, Jan Ciganek, Boris Oniscenko, Radim Macho, Lukas Vokoun, Petr Kouba</i>	397
A Systematic Review of Somatogravic Illusion Induction Mechanisms in Aviation <i>Vladimir Socha, Lenka Hanakova, Daniel Urban, Stanislav Kusmirek, Peter Hanak, Lubos Socha, Boris Onis- cenko, Jakub Charezinski, Tatiana Gajduskova</i>	407
Author Index	419
