

CONTENTS

CHAPTER 1 Functional Relations and Loci

ART.		PAGE
1.	Variables and Their Ranges.	1
2.	The Function Concept	2
3.	Inverse and Implicit Functions	3
4.	Rectangular Coordinates	5
5.	The Locus of an Equation	6
6.	Locus Analysis	9
7.	Curve Tracing	13
8.	Intersections of Curves	15
9.	Summary	17

CHAPTER 2 The Straight Line

10.	The Distance between Two Points	20
11.	The Division of a Line Segment in a Given Ratio	23
12.	The Slope Concept	27
13.	Angles between Lines	29
14.	Equations of Lines	32
15.	The Distance between a Point and a Line	39
16.	Families of Lines	43
17.	Proofs of Geometric Theorems	47
18.	Summary	51

CHAPTER 3 Limits and the Derivative Concept

19.	The Limit Concept	54
20.	Theorems on Limits	58
21.	Continuity	65
22.	The Derivative	68
23.	Higher Derivatives	73
24.	Geometric Interpretations	74
25.	Physical Interpretations	77
26.	Summary	83

CHAPTER 4 Differentiation of Algebraic Functions

27.	The Derivative of a Constant	85
28.	The Derivative of a Power Function	85
29.	The Derivative of a Sum; of a Product; of a Quotient.	87

ART.	PAGE
30. The Derivative of a Composite Function	92
31. Differentiation of Implicit Functions	97
32. Differentials	100
33. Summary	103

CHAPTER 5 The Integral Concept

34. The Definite Integral	105
35. The Indefinite Integral	109
36. Geometric Interpretations	115
37. Physical Interpretations	118
38. Summary	120

CHAPTER 6 Elementary Applications of Calculus

39. Maximum and Minimum Points of a Curve	122
40. Inflection Points of a Curve	127
41. Curve Tracing	129
42. Maxima and Minima Applications	132
43. Time Rates	137
44. Plane Areas	141
45. Volumes of Revolution	144
46. Summary	150

CHAPTER 7 The Circle

47. Equations of Circles	152
48. Analytic Determination of Circles	156
49. Tangents to Circles	161
50. Families of Circles	164
51. Geometric Theorems	169
52. Locus Problems	171
53. Summary	173

CHAPTER 8 Coordinate Transformations

54. Transformations	176
55. Translations	178
56. Rotations	181
57. Simplification of Second-Degree Equations	185
58. Summary	190

CHAPTER 9 The Conic Sections

59. Plane Curves on a Cone	192
60. The General Equation of a Conic Section	195
61. The Parabola	198
62. The Ellipse	204
63. The Hyperbola	213

ART.	PAGE
64. The General Equation of Second Degree	222
65. Tangents to Conics	225
66. Properties of Conics	230
67. Systems of Conics	234
68. Summary	237

CHAPTER 10 Differentiation of Transcendental Functions

69. Trigonometric Functions	241
70. Inverse Trigonometric Functions	248
71. Exponential and Logarithmic Functions	253
72. Graphical Differentiation	263
73. Summary	265

CHAPTER 11 Integration Processes

74. Fundamental Integral Formulas	268
75. Integration by Parts	272
76. Integrals Involving Sines and Cosines	276
77. Other Trigonometric Integrals	279
78. Integration by Substitution	284
79. Integration of Rational Functions	288
80. Approximate Integration	293
81. Summary	296

CHAPTER 12 Parametric Equations

82. Loci Represented by Parametric Equations	299
83. Locus Problems	302
84. Derivatives Obtained from Parametric Equations	307
85. Integrals and Parametric Equations	310
86. Summary	311

CHAPTER 13 Further Applications of Differential Calculus

87. Approximation Formulas	314
88. Numerical Solution of Equations	316
89. Evaluation of Limits	320
90. Curve Tracing	328
91. Maxima and Minima	330
92. Differential Arc Lengths.	332
93. Curvature	334
94. Plane Motion	338
95. Summary	347

CHAPTER 14 Further Applications of Integral Calculus

96. Improper Integrals	349
97. Arc Lengths	352

ART.	PAGE
98. Areas of Surfaces of Revolution	355
99. Center of Mass	358
100. Centroids of Plane Areas	361
101. Centroids of Arcs and of Surfaces of Revolution	364
102. Theorems of Pappus	365
103. Moment of Inertia	368
104. Moments of Inertia of Areas	370
105. Physical Applications	375
106. Summary	379

CHAPTER 15 Polar Coordinates

107. The Polar Coordinate System	381
108. Curve Tracing	385
109. Intersection of Loci	388
110. Lines, Circles, and Conics	391
111. Locus Problems	396
112. Applications of Differential Calculus	399
113. Applications of Integral Calculus	402
114. Summary	406

CHAPTER 16 Points, Planes, and Lines in Space

115. Rectangular Space Coordinates.	409
116. The Distance between Two Points	411
117. The Division of a Line Segment in a Given Ratio	413
118. Direction Cosines and Direction Components	416
119. Angles between Lines	420
120. Planes and Their Equations	425
121. The Distance between a Point and a Plane	430
122. Relations between Planes	433
123. Families of Planes	435
124. Straight Lines and Their Equations	439
125. Projecting Planes	442
126. Relations between Planes and Lines	445
127. Summary	450

CHAPTER 17 Surfaces and Curves in Space

128. The Equation in Three Variables	454
129. Spheres	459
130. Surfaces of Revolution	460
131. Cylinders	463
132. Cones	466
133. Ruled Surfaces	469
134. Quadric Surfaces	473

CONTENTS

xi

ART.		PAGE
135.	Plane Curves in Space	484
136.	Skew Curves	487
137.	Transformations	492
138.	Volumes	498
139.	Centroids of Volumes	500
140.	Moments of Inertia of Volumes	505
141.	Summary	509

CHAPTER 18 Partial Differentiation

142.	First Partial Derivatives	513
143.	Higher Partial Derivatives	516
144.	Composite Functions	519
145.	Total Differentials	523
146.	Implicit Functions	524
147.	Tangent Planes and Normal Lines to Surfaces	526
148.	Singular Points of Curves	530
149.	Summary	537

CHAPTER 19 Multiple Integrals

150.	Volumes by Iterated Integration	539
151.	Double Integrals	545
152.	Mass of a Plate of Variable Density	547
153.	Polar and Cylindrical Coordinates	550
154.	Area of a Curved Surface	554
155.	Triple Integration	557
156.	Heterogeneous Masses	560
157.	Further Applications	563
158.	Summary	565

CHAPTER 20 Infinite Series

159.	Definitions and Theorems	566
160.	Maclaurin's Integral Test	571
161.	Comparison Tests	575
162.	Ratio Test.	578
163.	Alternating Series	581
164.	Evaluation of the Sum of a Series	584
165.	Power Series	586
166.	Maclaurin's Series	589
167.	Taylor's Series	593
168.	Taylor's Formula with the Remainder	595
169.	Computation by Series	598
170.	Operations with Power Series	601
171.	Applications of Series	605
172.	Summary	607

ART.	PAGE
APPENDIXES	
A. Meanings of Symbols	609
B. Formulas, Definitions, and Theorems	610
C. Greek Alphabet	614
D. Numerical Tables	615
E. Table of Integrals	624
ANSWERS TO ODD-NUMBERED EXERCISES	631
INDEX	651
