

CONTENTS

Preface	7
<i>M. Křížek, L. Somer</i>	
Ten objections to the proclaimed amount of dark matter	9
<i>L. A. King</i>	
Implications of a local Hubble-Lemaître parameter	
$H_0 = (49 \pm 11) \text{ km}/(\text{s Mpc})$	29
<i>M. Křížek</i>	
On the validity of the law of conservation of energy	37
<i>M. Lanzendörferová</i>	
Giordano Bruno – the founder of modern cosmology	49
<i>P. Lievonen, M. Křížek</i>	
Visualization of a closed 3-sphere universe	55
<i>V. Vavryčuk</i>	
On lifetime of cosmic muons in the lower atmosphere	63
<i>L. Neslušan</i>	
Prediction of dark matter within the hypothesis of unique interaction	73
<i>A. Dvořák, M. Křížek</i>	
What is the actual rate of acceleration of the expansion of the universe?	91
<i>A. Yahalom</i>	
An uncertainty relation for retarded gravity	101

<i>M. Křížek, V. Vavryčuk</i>	
On the validity of the principle of equivalence	113
<i>L. Neslušan</i>	
Dimensionless field equations and possible cosmological evolution of fundamental constants	119
<i>Y. V. Dumin</i>	
Testing the local Hubble expansion in the Sun-Earth system	131
<i>T. Suntola</i>	
Spherically closed dynamic space: A framework for JWST observations and local Hubble expansion	143
<i>A. Styrman</i>	
Early reception of the Dynamic Universe	163
<i>M. Patočka</i>	
Calculation of the galaxy rotation curve	199
<i>I. D. Karachentsev</i>	
Tracing Hubble flow and peculiar motions around the local group of galaxies. Problems of cosmology on small scales of the Universe	219

Alternative cosmological theories

<i>V. Müller</i>	
Earth expansion – Caused by cosmological factors?	223
<i>R. Machotka</i>	
Common theoretical framework of modern physics in five dimensions	229
<i>F. Lomoz</i>	
Quantum gravity and the distance-velocity profile of a black hole	245
<i>P. Pylkkänen</i>	
Lessons from the philosophy of quantum mechanics for alternative cosmologies	261
List of participants	267
Program of the conference	271
