

CONTENTS

* Papers marked with an asterisk were circulated in the form of preprints before the congress took place.

Preface

by C. J. VAN NIEUWENBURG (Delft) AND H. A. J. PIETERS (Geleen) . . 417

OPENING SESSION

Analytical chemistry and chemical analysis, now and in the near future

by C. J. VAN NIEUWENBURG (Delft) 419

Le rôle actuel de l'ingénieur-analyste

par G. CHARLOT (Paris) 425

SECTION 1

General methods and standardisation

Gravimétrie automatique en chimie minérale

par C. DUVAL (Paris) 432

Statistical aspects of chemical analysis

by E. C. WOOD (London) 441

Recent development in a new method of gas analysis

by W. J. GOODERHAM (London) 452

* Standardisation of analytical procedures

by H. A. J. PIETERS (Geleen) AND R. SCHMIDT (Amsterdam) 465

* Standardisation and codification of analytical methods

by R. J. FORBES (Amsterdam) 476

* The task of the analytical chemist in industry

by P. N. DEGENS Jr (Amsterdam) 480

* Rationalising analysis

by J. BOEKE (Amsterdam) 486

* Isotopes as tracers in analytical chemistry

by A. H. W. ATEN Jr (Amsterdam) 492

* A modified Orsat apparatus for analysis of purified coke-oven gas

by H. W. DEINUM AND J. W. DAM 501

- * Organic elementary analysis
by P. GOUVERNEUR (Amsterdam) 510
- * The mass spectrometer and some chemical applications
by J. KISTEMAKER (Amsterdam) 522

SECTION 2

Electrical methods

- Modern trends of polarographic analysis
by J. HEYROVSKÝ (Prague) 533
- Automatic conductometric titration
by A. JULIARD AND J. VAN CAKENBERGHE (Bruxelles) 542
- Les méthodes électriques d'analyse dans les problèmes industriels
par E. LECLERC (Liège) 545
- Estimation of butadiene in the presence of isobutene
by W. ROMAN (Manchester) 552
- * L'analyse polarographique appliquée aux produits de la métallurgie du zinc
par R. FAVRE (Overpelt) 556
- * Dosage polarographique de quelques constituants du verre
par V. VANDENBOSCH (Louvain) 566
- * Controlled potential electroanalysis
by J. J. LINGANE (Cambridge, Mass.) 584
- * A continuous reading vacuum tube voltmeter for electrometric titrations
by A. CLAASSEN (Eindhoven) 602
- * Amperometric titrations
by I. M. KOLTHOFF (Minneapolis) 606
- * Electrical methods for analysis of water
by C. JANSSEN (Arnhem) 622
- * Salt (Cl') content measurements of river water by means of a self-recording
conductivity meter
by J. BIJKER (Rotterdam) 628

SECTION 4

Optical measurements and physical methods of separation

- Chromatography: recent developments and future possibilities
by T. I. WILLIAMS (London) 635
- Les méthodes par absorption en chimie analytique
par G. DUYCKAERTS (Liège) 649
- Résultats préliminaires et perspectives de quelques recherches tendant à
accroître la sensibilité des microdosages spectrophotométriques en
biochimie
par M. VACHER (Paris) 664

- * Application of adsorptive percolation to the analysis of hydrocarbon mixtures
by W. M. SMIT (Amsterdam) 671
- * Analytical applications of rectifying distillation
by J. VERHEUS (Amsterdam) 681
- * Thermal diffusion as a method for the analysis of hydrocarbon oils
by H. KRAMERS AND J. J. BROEDER (Amsterdam) 687
- * Colorimetric and photometric absorption analysis
by D. J. COUMOU (Amsterdam) 693
- * Influence of the reagent concentration on the colorimetric copper determination with sodium diethyl dithiocarbamate and its importance for the determination of copper in the presence of large amounts of iron
by P. KARSTEN, S. C. RADEMAKER, AND J. J. WALRAVEN (Delft) . . . 705
- * Spectrophotometric determination of traces of oxygen in water
by H. A. J. PIETERS AND W. J. HANSSEN (Geleen) 712
- * Applications analytiques des spectres infrarouges de poudres aux composés minéraux et à l'eau de cristallisation
par J. LECOMTE (Paris) 727
- * The analytical application of infra-red spectrophotometry
by C. LA LAU (Amsterdam) 734
- * Dosage par spectrophotométrie infrarouge de la Vitamine D₂ dans les produits d'irradiation de l'ergostérol
par G. PIRLOT (Liège) 744
- * L'analyse quantitative par la spectrographie Raman
par G. DUYCKAERTS ET G. MICHEL (Liège) 750

SECTION 5

Microbiological methods and detection of traces

- Recent developments in microbiological methods
by W. F. J. CUTHBERTSON (Greenford) 761
- Sur la recherche de traces d'éléments dans les organes des plantes et des animaux
par G. BERTRAND (Paris) 770
- * On the use of *Aspergillus niger* for the determination of plant nutrients in the soil
by F. C. GERRETSEN (Groningen) 782
- * The microbiological estimation of copper, magnesium and molybdenum in soil and plant material
by E. G. MULDER (Groningen) 793
- * Methodological contributions to the microbiological determination of tryptophane
by J. YLSTRA (Delft) 801

- * Practical experience in microbiological assays using lactic acid bacteria
by A. C. VAN DER LINDEN (Amsterdam) 805
- * A reductometric and biochemical system for analysis of sugar mixtures
by F. TH. VAN VOORST (Alkmaar) 813
- * Some investigations about the microdetermination of lead in plant material
by J. TH. L. B. RAMEAU (Groningen), J. F. REITH (Utrecht), AND W. B.
DEYS (Wageningen) 823
- * Methods for the determination of some trace-elements in biological material
by P. L. HOOGLAND (Toronto) 831
- * Séparation et dosage des formes hydrosolubles de la choline
par G. DUCET (Versailles) 839

FINAL SESSION

- Résumé des travaux et conférences du Congrès d'Utrecht
par P. E. WENGER (Genève) 844
