
Contents

Preface.....	vii
Editors.....	xi
Contributors.....	xiii
1 Introduction to Systematic Review and Meta-Analysis.....	1
<i>Christopher H. Schmid, Ian R. White, and Theo Stijnen</i>	
2 General Themes in Meta-Analysis	19
<i>Christopher H. Schmid, Theo Stijnen, and Ian R. White</i>	
3 Choice of Effect Measure and Issues in Extracting Outcome Data.....	27
<i>Ian R. White, Christopher H. Schmid, and Theo Stijnen</i>	
4 Analysis of Univariate Study-Level Summary Data Using Normal Models.....	41
<i>Theo Stijnen, Ian R. White, and Christopher H. Schmid</i>	
5 Exact Likelihood Methods for Group-Based Summaries	65
<i>Theo Stijnen, Christopher H. Schmid, Martin Law, Dan Jackson, and Ian R. White</i>	
6 Bayesian Methods for Meta-Analysis	91
<i>Christopher H. Schmid, Bradley P. Carlin, and Nicky J. Welton</i>	
7 Meta-Regression	129
<i>Julian P.T. Higgins, José A. López-López, and Ariel M. Aloe</i>	
8 Individual Participant Data Meta-Analysis.....	151
<i>Lesley Stewart and Mark Simmonds</i>	
9 Multivariate Meta-Analysis	163
<i>Dan Jackson, Ian R. White, and Richard D. Riley</i>	
10 Network Meta-Analysis	187
<i>Adriani Nikolakopoulou, Ian R. White, and Georgia Salanti</i>	
11 Model Checking in Meta-Analysis.....	219
<i>Wolfgang Viechtbauer</i>	
12 Handling Internal and External Biases: Quality and Relevance of Studies.....	255
<i>Rebecca M. Turner, Nicky J. Welton, Hayley E. Jones, and Jelena Savović</i>	
13 Publication and Outcome Reporting Bias	283
<i>Arielle Marks-Anglin, Rui Duan, Yong Chen, Orestis Panagiotou, and Christopher H. Schmid</i>	

14 Control Risk Regression313
Annamaria Guolo, Christopher H. Schmid, and Theo Stijnen

15 Multivariate Meta-Analysis of Survival Proportions.....329
Marta Fiocco

16 Meta-Analysis of Correlations, Correlation Matrices, and Their Functions347
Betsy Jane Becker, Ariel M. Aloe, and Mike W.-L. Cheung

17 The Meta-Analysis of Genetic Studies371
Cosetta Minelli and John Thompson

18 Meta-Analysis of Dose-Response Relationships.....395
Nicola Orsini and Donna Spiegelman

19 Meta-Analysis of Diagnostic Tests429
Yulun Liu, Xiaoye Ma, Yong Chen, Theo Stijnen and Haitao Chu

20 Meta-Analytic Approach to Evaluation of Surrogate Endpoints457
Tomasz Burzykowski, Marc Buyse, Geert Molenberghs, Ariel Alonso, Wim Van der Elst, and Ziv Shkedy

21 Meta-Analysis of Epidemiological Data, with a Focus on Individual Participant Data479
Angela Wood, Stephen Kaptoge, Michael Sweeting, and Clare Oliver-Williams

22 Meta-Analysis of Prediction Models.....503
Ewout Steyerberg, Daan Nieboer, Thomas Debray, and Hans van Houwelingen

23 Using Meta-Analysis to Plan Further Research.....523
Claire Rothery, Susan Griffin, Hendrik Koffijberg, and Karl Claxton

Index545
