

IPSW 2026 – Presentation List

15th IPSW Programme	5
Thursday 14th May lecture schedule	6
Friday 15th May lecture schedule	7
Content	9
Lecture 1: Parallel Hall 1 – Thursday 10:30 – 11:00 Analysis of mass transfer kinetics demonstrates feasibility of short-term and flow-weighted long-term measurements using equilibrium passive sampling.....	11
Lecture 2: Parallel Hall 1 – Thursday 11:00 – 11:30 Chemical Profiling of Hydrophobic Organic Compounds in Terrestrial Mammals at High Trophic Levels Using Silicone Chemometers.....	12
Lecture 3: Parallel Hall 1 – Thursday 11:30 – 12:00 Application of Accelerated Solvent Extraction (ASE) to silicone passive samplers for large-scale and spatiotemporal monitoring of hydrophobic micropollutants	14
Lecture 4: Parallel Hall 1 – Thursday 13:00 – 13:30 Mathematical interpretation of equilibrium timescales in passive sampling	15
Lecture 5: Parallel Hall 1 – Thursday 13:30 – 14:00 Modeling the Impacts of Nonlinear Sorption on the Behavior of PRCs and Target Compounds in Passive Sampling Systems	16
Lecture 6: Parallel Hall 1 – Thursday 14:00 – 14:30 Mission POCIS-ble? Using POCIS as a Tool for Environmental Risk Assessment.	17
Lecture 7: Parallel Hall 1 – Friday 9:30 – 10:00 Field validation of passive samplers for persistent and mobile substance in drinking water treatment systems	18
Lecture 8: Parallel Hall 1 – Friday 10:00 – 10:30 Assessing the Value of Using Passive Sampling, Discrete Water Sampling and Bivalves for Targeted Organic Chemicals in Waters.....	19
Lecture 9: Parallel Hall 1 – Friday 10:30 – 11:00 Two approaches to address the influence of hydrodynamics on the uptake of hydrophilic passive samplers.....	20
Lecture 10: Parallel Hall 1 – Friday 11:30 – 12:00 Polar organic compounds passive sampling in Parisian raw wastewater with POCIS innovative sorbents	21
Lecture 11: Parallel Hall 1 – Friday 12:00 – 12:30 Nontargeted analysis in screening and regular monitoring of surface and groundwater pollution using POCIS passive samplers..	23
Lecture 12: Parallel Hall 1 – Friday 12:30 – 13:00 Retrospective Back-Quantification of Emerging Contaminants from Digitally Archived LC HRMS Data to Enhance Passive Sampler-Based Monitoring Capabilities	24
Lecture 13: Parallel Hall 2 – Thursday 10:30 – 11:00 Passive sampling with greater time resolution and/or longer deployments via novel automated deployment devices.....	25
Lecture 14: Parallel Hall 2 – Thursday 11:00 – 11:30 Low-cost passive sampling approach to monitor hydrophobic organic contaminants in stormwater	26
Lecture 15: Parallel Hall 2 – Thursday 11:30 – 12:00 Development of Novel PDMS-Based Passive Sampling Colorimetric Sensors for Ammonia Monitoring in Livestock Farming (NH3ControlFarm).....	27
Lecture 16: Parallel Hall 2 – Thursday 13:00 – 13:30 Monitoring atmospheric organic contaminants in secondary school populations using a combined silicone wristband-Tenax® passive sampler.....	29
Lecture 17: Parallel Hall 2 – Thursday 13:30 – 14:00 Analysis of hydrophobic organic contaminants in the Danube River surface water by passive sampling	30
Lecture 18: Parallel Hall 2 – Thursday 14:00 – 14:30 Tracing legacy pollutants in the Irish marine environment using passive sampling techniques.....	31
Lecture 19: Parallel Hall 2 – Friday 9:30 – 10:00 From Policy to Practice: Using POCIS to Validate the Implementation of Agricultural Pollution Control Strategies	32

Lecture 20: Parallel Hall 2 – Friday 10:00 – 10:30 Unravelling Chemical Mixtures in a Chalk Stream: 18 Months of Continuous Passive Monitoring.....	33
Lecture 21: Parallel Hall 2 – Friday 10:30 – 11:00 Use of Chemcatcher passive sampler as a watershed-investigation tool to assess first flush polar contaminant pollution in an Eastern Mediterranean River basin	34
Lecture 22: Parallel Hall 2 – Friday 11:30 – 12:00 Using passive sampling for a long-term assessment of emerging pollutants' occurrence in aquatic environment	35
Lecture 23: Parallel Hall 2 – Friday 12:00 – 12:30 Investigating PFAAs Fate in the anthropogenic water cycle: Passive Sampling in Municipal Sewage, River Water, and Produced Water	36
Lecture 24: Parallel Hall 2 – Friday 12:30 – 13:00 Contribution of passive sampling to the identification of areas contributing to the contamination of surface water bodies in a watershed headwater area in western France	37
Lecture 25 Combining a Hydrophilic-Lipophilic Balanced (HLB) Polymer with a Weak Anion Exchange (WAX) Phase for Hydrophilic and Anionic Organic Chemicals	38
Lecture N1: NORMAN 1 - Friday from 14:00 Advancing the Design of Laboratory Performance Studies by Addressing Analytical Challenges in Aquatic Passive Samplers for Organic Compounds	39
Lecture N1: NORMAN 1 - Friday from 14:00 Test materials for laboratory performance studies for the chemical analysis of aquatic passive samplers: targeting the fitness for purpose, homogeneity and stability	40
Posters list	41
Poster 1: Assessing the risk of water quality degradation using DGT-Chelex in a headwater catchment locally contaminated by metallic lead due to hunting activities	42
Poster 2: Lipid/silicone and silicone/silicone partition coefficient of hydrophobic organic compounds between SSP-M823 and DC1-2577 to support multimedia passive sampling. .	43
Poster 3: Evaluation of an Amberlite XAD-2–Based Passive Sampler for Hydrophobic Organic Compounds in Water	44
Poster 4: Application of passive sampling in monitoring of pyrethroids in surface waters ..	45
Poster 5: Monitoring atmospheric microplastics in school environments using a novel autonomous air-sampling device	46
Poster 6: Passive sampling and Non-target screening for River Protection.....	47
Poster 7: Monitoring of pesticides and their metabolites in sea water quality around mussels breeding sites in Normandy using Polar Compound Integrative Samplers (POCIS)	48
Poster 8: Quantification and risk assessment of polar organic contaminants in two chalk streams in Hampshire, UK using the Chemcatcher passive sampler.....	49
Poster 9: Spatiotemporal Contaminant Autonomous Longterm Passive Sampler (SCALoPS): an automated resealable device design for longer passive sampler deployments	50
Poster 10: Monitoring of micropollutants in sewer networks using passive sampling: application in a 200,000-inhabitant urban area – methodology of the MicroExplore+ project	51
Poster 11: From Air to Water: Exploring a Novel Modified Composite Sponge for Passive Sampling of Organic Compounds in Aquatic Environments	53
Poster 12: Trace analysis of 28 perfluorinated compounds in tap/river waters using Solid Phase Extraction (SPE) Disks WAX for a high flow rate extraction.....	55
Poster 13: What's the Buzz in the Air? Towards Non-Invasive Air Sampling for Monitoring of Bumble Bee Hive Contamination	56
NORMAN satellite workshops	57
Workshop 1 - QA QC Workshop: Friday 14:00	57
Workshop 2 - Polymer-chemical interactions: Friday 16:30	57
