

Contents

<i>Sint, P.</i> : Roots of computational statistics (invited paper)	9
---	---

Computational statistics in random processes

<i>Ansley, C.F., R. Kohn</i> : New algorithmic developments for estimation problems in time series (invited paper)	23
<i>Mélard, G.</i> : On fast algorithms for several problems in time series models.	41
<i>Krzyśko, M., Smoczyński</i> : Parameter estimation and order determination of a multivariate autoregressive process	35

Computational aspects of robustness

<i>Michálek, Jiří, Vajda, I., Všek</i> : New topic in robust statistics with applications (invited paper).	73
<i>Antoch, J., Collomb, G., Hassani, S.</i> : Robustness in parametric and non-parametric regression estimation: an investigation by computer simulations	49
<i>Glasbey, C.A.</i> : CEVOPE — a program for finding conservative estimates of the variances of regression parameter estimators when errors are serially correlated	55
<i>Gomes, M.I.</i> : Robustness of Gumbel statistic for distribution functions in the domain of attraction of a type I distribution of largest values.	61
<i>White, A.P., Still, A.W.</i> : Monte-Carlo analysis of variance	90
<i>Müller, H.-G.</i> : Boundary effects in nonparametric curve estimation models.	83
<i>Lužar, V.</i> : Asymptotic distribution of the roots of a correlation matrix.	67

Computational graphics in statistical data analysis

<i>Gordesch, J.</i> : Graphical methods for the manipulation and solution of systems of linear equations.	99
<i>Puranen, J.</i> : DISTEP — dynamic interactive statistical teaching package.	105

Various statistical and data analytic methods

<i>Zagorujko, N.</i> : On discriminant analysis (invited paper)	172
<i>Van der Sluis, D.M., Schaafsma, W.</i> : POSCON — a decision-support system in diagnosis and prognosis based on a statistical approach.	160
<i>Tracy, D.S., Tajuddin, I.H.</i> : Simulated powers under two different approximations to the exact distribution of MRPP statistics.	166

<i>Perez, A.</i> : "Barycenter" of a set of probability measures and its application in statistical decision	154
<i>Payne, R.W., Dixon, T.J.</i> : A study of selection criteria for constructing identification keys.	148
<i>Läuter, J.</i> : Algorithms of discriminant analysis using parameter restrictions for diminishing the error rate	131
<i>Diday, E., Moreau, J.V.</i> : Hierarchical inference	119
<i>Murtagh, F.</i> : A review of fast techniques for nearest neighbour searching	143
<i>Meulman, J., Heiser, W.J.</i> : Constrained multidimensional scaling: more directions than dimensions.	137
<i>Korhonen, P.J.</i> : An interactive multiple criteria approach to finding subjective principal components.	125
<i>Aluja Banet, T., Lebart, L.</i> : Local and partial principal component analysis (PCA) and correspondence analysis (CA)	113

Numerical aspects and complexity of statistical algorithms

<i>Křivánek, M., Morávek, J.</i> : On NP-hardness in hierarchical clustering.	189
<i>Jöckel, K.-H.</i> : Computational aspects of Monte-Carlo tests	183

Linear Models

<i>Kubáček, L.</i> : Reliability of calculations in the linear estimation and some problems of the analysis of a multistage regression experiment (invited paper).	214
<i>Gilchrist, R., Scallan, A.</i> : Parametric link functions in generalized linear models	203
<i>Kleffe, J.</i> : Statistical analysis of mixed linear models with inhomogeneous variances.	209
<i>Bethlehem, J.G.</i> : Linweight: a program for weighting sample survey data	197

Intelligent software in statistical data analysis

<i>Gale, W.A., Pregibon, D.</i> : Constructing an expert system for data analysis by working examples (invited paper).	227
<i>Pregibon, D., Gale, W.A.</i> : REX: an expert system for regression analysis	242
<i>Kowalski, A., Schütt, A.</i> : Analysis of suppositions	237
<i>Pukkila, T., Puntanen, S., Stenman, O.</i> : On the possibilities to automate the study of statistical dependence between two variables	249

Integration of statistical data base management and data analysis

<i>Neumann, K.</i> : Metainformation as a tool for integration	273
<i>Rauch, L.</i> : Interface problems between software packages used in statistical information system	285

- Borzemski, L., Koszałka, L.*: Statistical data analysis using a data base for experiment design and systems identification 257
- Kurzyński, M.W., Lebediewa, S.*: Processing of statistical data for multistage recognition system using data base 268
- Rafanelli, M., Ricci, F.L.*: Statistical database: an interactive language for logical schema definition by means of a model based on graphs 279
- Jomier, G., Kezouit, O., Ralambondrainy, H.*: SICLA-PEPIN: A system integrating data analysis and relational data base management system. 263

Software for parallel processing in statistical data analysis

- Lafaye de Micheaux, D.*: Parallelization of algorithms in the practice of statistical data analysis 293
- Ososkov, G.A., Vajteršic, M.*: A fast parallel algorithm for the recognition of ionized particle tracks 301

Evaluation and enhancements of statistical software

- Anderson, A.J.B.*: The enhancement of Fortran for statistical analysis. 311
- Nedoma, P.*: Design of experimental statistical packages 347
- De Jong, V.J.*: A multilevel approach to improve the flexibility of statistical software 323
- Molenaar, I.W., Broersma, H.*: Interpretation of statistical software output: some behavioral studies 341
- Dekker, A.L.*: Comparing statistical software packages on tabulation efficiency. 317
- Kuik, D.J.*: QUESTOR, a conversational preprocessor to BMDP 329
- Michálek, Jaroslav, Němcová, M., Popelínský, Rebíčková, M.*: The system for multivariate statistical data processing. 335

Software in categorical data analysis

- Whitaker, J.*: Fitting all possible decomposable and graphical models to multi-way contingency tables. 401
- Edwards, D.*: A computer intensive approach to the analysis of sparse multidimensional contingency tables 355
- Murphy, B.P.*: Similarities and differences between linear, logistic and log-linear models for survival analysis; some practical observations. 378
- Lane, P.W.*: Methods for summarizing the analysis of categorical data 366
- Rudas, T.*: Stepwise discriminant analysis procedure for categorical variable 389

<i>Morineau, A.</i> : Computational and statistical methods for exploratory analysis of textual data	372
<i>Scherb, H., Welzl, G.</i> : A recursive algorithm for the determination of the uniformly most powerful unbiased test in fourfold tables	395
<i>Pokorný, D.</i> : Optimal collapsing of two-way contingency tables including structural zeroes	383
<i>Hájek, P.</i> : The new version of the GUHA procedure ASSOC (generating hypotheses on associations) — mathematical foundations.	360

Optimization techniques in statistics

<i>Narula, S.C., Wellington, J.F.</i> : On special purpose algorithms for the MSAE and the MMAE regression	440
<i>Prékopa, A.</i> : Programming under probabilistic constraints and its applications in statistics (invited paper)	446
<i>Meester, I.</i> : Maximum likelihood estimation for mixtures of distributions	427
<i>Lejeune, M.</i> : Optimization in nonparametric estimation	421
<i>Ross, G.J.S.</i> : Parallel model analysis: fitting non-linear models to several sets of data	458
<i>Messean, A., Nicole, O., Vila, J.P.</i> : HAUS 82: a new tool for nonlinear fitting and the study of non-linear models.	434
<i>Kutas, T.</i> : A new method for solving nonlinear least squares problem	415
<i>Kaishev, V.K.</i> : A computer program package for solving spline-regression problems	409

Software for data preprocessing (checking, handling of missing values reduction)

<i>Chytil, M.K.</i> : Is data preprocessing a computational process only?	467
<i>Liski, E.</i> : Missing data problems in growth curves	479
<i>Dickson, J.M.</i> : Data capture and validation using portable terminals	473

Error free and formal computations in statistics

<i>Collombier, D.</i> : Error-free computation in design of experiments (invited paper).	487
<i>Vuchkov, I.N., Damgaliev, D.L., Donev, A.N.</i> : Comparison of some algorithms for discrete D-optimal design generation	503
<i>Tiit, E.-M.</i> : Formal computation of regression parameters	497

Computational problems in spatial data analysis

<i>Košmelj, M.</i> : Means for analysis of space-time relationship	509
