Part I – The Information Revolution

<i>1</i>	<i>Social Dimensions of Information</i>	<i>3</i>
1.1	The wider impact	3
1.2	The economic impact	5
1.3	Information exchange and markets	7
1.4	Dependency	9
1.5	The future	9
1.6	Summary	11
<i>2</i>	<i>Organisational Power and Privacy</i>	<i>13</i>
2.1	Limited access	13
2.2	Open management	14
2.3	Flat structures	17
2.4	Decision support	18
2.5	The new view of productivity	21
2.6	Summary	22
<i>3</i>	<i>Employment and People</i>	<i>23</i>
3.1	The things we do	23
3.2	The way we do things	25
3.3	The human–computer interface	27
3.4	The psychology of technology	29
3.5	Humane information management	31
3.6	Human information processors	33
3.7	Summary	34
<i>4</i>	<i>New Connections</i>	<i>35</i>
4.1	Getting connected	35
4.2	The Internet	35
4.3	Intranets	37
4.4	Traffic control	39
4.5	Robots and agents	39
4.6	Making the right connections	40

4.7	Internet developments	41
4.8	Summary	42

Part II – Information as a Commodity

5	<i>Information and Communication</i>	45
5.1	Data capture	45
5.2	Data storage	47
5.3	Reporting	49
5.4	Communications	52
5.5	Noise and media	53
5.6	Knowledge and learning	55
5.7	Quality of information	58
5.8	Summary	60
6	<i>Information Theory</i>	61
6.1	Systems theory	61
6.2	The changing state of information	65
6.3	Information economics	67
6.4	Relevance and redundancy of information	70
6.5	Data attributes	73
6.6	Data and file structures	75
6.7	Summary	79
7	<i>Information Resources</i>	81
7.1	Information overload	81
7.2	Decision-related information	84
7.3	Protecting a valuable resource	86
7.4	Summary	88
8	<i>The Value of Information</i>	89
8.1	Information is a vital resource	89
8.2	Risk	90
8.3	The value of information	90
8.4	The cost of information	91
8.5	Systems dependency	92
8.6	Summary	95

Part III – Information for Decision-making

9	<i>Information for Decision-making</i>	99
9.1	Critical success factors	99
9.2	Performance indicators	102
9.3	Decision support systems	105
9.4	External data sources	107
9.5	Uncertainty and risk	109
9.6	Summary	111
10	<i>Presentation of Information</i>	113
10.1	Introduction	113
10.2	Relevance reporting	115
10.3	Numerical versus textual presentation	118
10.4	Presentation styles	122
10.5	Presentation media	125
10.6	Presentation pitfalls	127
10.7	Summary	131
11	<i>Financial Models and Sensitivity Analysis</i>	133
11.1	The framework	134
11.2	The data	134
11.3	The calculations	135
11.4	The presentation of information	135
11.5	Sensitivity analysis	135
11.6	Disadvantages and advantages of financial models	136
11.7	Summary	136
12	<i>Strategic Modelling</i>	137
12.1	The role of models	137
12.2	The business/economic model	138
12.3	The market model	139
12.4	The investment model	139
12.5	The cash-flow model	140
12.6	Summary	141
13	<i>Product-contribution Analysis: A Computer-based Model</i>	143
13.1	A case study – Reward Chemicals	143
13.2	Summary	148

149	14.1	A system for accessing data
150	14.2	The EIS database
150	14.3	Manipulating data
150	14.4	Reporting and displaying information in the EIS
151	14.5	The potential of EIS
152	14.6	The management consultant's role
153	14.7	Decision support
153	14.7	Summary
155		<i>Index</i>
