NOTES ON TECHNICAL METHODS 1

PREVIOUS STUDIES AND LITERATURE—AN OVERVIEW 3

General literature 3

Literature on the Helobiae 3

SYSTEMATIC INTRODUCTION 5

How should the Helobiae and Triurideae be subdivided? 6

In what sequence are the helobian families to be arranged? 11

Sequence, arrangement and diagnoses of orders and families in this book 12

Alismatales 12

Hydrocharitales 12

Aponogetonales 13

Scheuchzeriales 13

Potamogetonales 13

Triuridales 14

Do the helobian families constitute a natural (i.e. presumed monophyletic) group? 15

Do the Helobiae represent a primitive and even ancestral group of monocotyledons? 17

I. GENERAL INTRODUCTION TO THE MORPHOLOGY AND ANATOMY OF THE HELOBIAE 19

Early development 21

Growth habit and architecture 26

Leaf morphology and anatomy 29

Stem vascular construction 36

Root morphology and anatomy 38

The conducting tissues 41

Miscellaneous morphological and anatomical features 43

Floral organization 47

Biochemical diversity 49

II. DETAILED DESCRIPTIONS OF FAMILIES 55

FAMILY 1. ALISMATACEAE	57
FAMILY 2. LIMNOCHARITACEAE	90
FAMILY 3. BUTOMACEAE	108
FAMILY 4. HYDROCHARITACEAE	126
FAMILY 5. APONOGETONACEAE	195
FAMILY 6. SCHEUCHZERIACEAE	226
FAMILY 7. JUNCAGINACEAE	242
FAMILY 8. LILAEACEAE	258
FAMILY 9. POTAMOGETONACEAE	270
FAMILY 10. ZANNICHELLIACEAE	336
FAMILY 11. POSIDONIACEAE	370
FAMILY 12. CYMODOCEACEAE	384
FAMILY 13. ZOSTERACEAE	422
FAMILY 14. NAJADACEAE	452
FAMILY 15. TRIURIDACEAE	466
FAMILY 16. PETROSAVIACEAE	474

LIST OF PLATES (*follows Index*)

Plate 1.	Ultrastructure of leaf epidermal cells in leaf of blade.	529
Plate 2.	Peduncle anatomy.	531
Plate 3.	Rhizome anatomy.	533
Plate 4.	Axis anatomy.	535
Plate 5.	Hydrocharitaceae. <i>Thalassia testudinum</i> . Axis anatomy.	537
Plate 6.	Zosteraceae. <i>Zostera marina</i> . Shoot development to show branch displacement.	539
Plate 7.	Alismataceae. <i>Echinodorus amazonicus</i> . Early stages in floral development to show the initiation and development of CA primordia.	541
Plate 8.	Alismataceae. <i>Sagittaria cuneata</i> . Early stages in development of female flower.	543
Plate 9.	Butomaceae. <i>Butomus umbellatus</i> . Successive early stages in floral development.	545
Plate 10.	Aponogetonaceae. <i>Aponogeton undulatum</i> . Early stages in floral development.	547
Plate 11.	Scheuchzeriaceae. <i>Scheuchzeria palustris</i> L. development and morphology.	549
Plate 12.	Lilaeaceae. <i>Lilaea scilloides</i> . Floral development and morphology.	551
Plate 13.	Zannichelliaceae. Floral development (<i>Uliesia</i> and <i>Althenia</i>).	553
Plate 14.	Zannichelliaceae. Floral development (<i>Lepilaena</i>).	555
Plate 15.	Triuridaceae. Vegetative and floral anatomy.	557
Plate 16.	Petrosaviaceae.	559
