I Key Concepts in Intensive Care Medicine

1	Identification and Initial Stabilization of Acutely Deteriorated Patients	3
	<i>Nicholas F. Parchim and Nathan D. Nielsen</i>	
1.1	Remember Your ABCs	5
1.1.1	The ABCDEF Sequence for Triage.....	5
	References.....	11
2	ICU Routines and Bundles of Care	13
	<i>Anne Mecklenburg, María Martínez Martínez, Nathan D. Nielsen, Sabrina Grossenbacher-Eggmann, Carole Boulanger, and František Duška</i>	
2.1	ICU Ward Round and Daily Assessment (“Clerking”) of ICU Patients	15
2.1.1	ICU Ward Round.....	16
2.1.2	Routine Daily Assessment of the Critically Ill Patient.....	16
2.1.3	ICU Equipment and Common Problems.....	17
2.2	Fluid Therapy in the Critically Ill Patients	20
2.2.1	Introduction.....	20
2.2.2	Physiology of Body Fluid Compartments in Acute Illness.....	21
2.2.3	Types and Characteristics of Intravenous Fluids.....	22
2.2.4	Practical Guide to Fluid Use in ICU.....	23
2.3	Nutrition	25
2.3.1	Estimating the Needs: Nutritional Targets.....	27
2.3.2	Way of Delivery: Enteral vs Parenteral.....	27
2.3.3	Special Formulas and Substrates.....	28
2.3.4	Blood Glucose Control.....	29
2.3.5	Common Issues with Feeding and What To Do.....	29
2.4	Venous Thromboembolism Prophylaxis	29
2.4.1	Low Molecular Weight Heparins.....	30
2.4.2	Mechanical Methods of Thromboprophylaxis.....	31
2.5	Positioning, Mobilization, and Rehabilitation	31
2.5.1	Positioning of the ICU Patient.....	32
2.5.2	ICU-Acquired Weakness.....	33
2.5.3	Protocolized Physiotherapy and Mobilization: The ABCDEF Bundle.....	34
2.6	Ventilator-Associated Pneumonia (VAP) Prevention Bundle	36
2.6.1	Pathophysiology and Preventability of VAP.....	37
2.6.2	Components of VAP Prevention Bundle.....	38
	References.....	40
3	Intra-hospital Transport	41
	<i>Anne Mecklenburg</i>	
3.1	Introduction	42
3.1.1	How to Do a “TEAM TIME OUT”?.....	43

3.1.2	What MONITORING Do I Need During Transport?.....	43
3.1.3	What EQUIPEMNT Do I Need to Bring on the Transport?	43
	References.....	45
4	Human Factors and Non-Technical Skills	47
	<i>Rahul Costa-Pinto and Carole Boulanger</i>	
4.1	Introduction	48
4.2	Team Performance	49
4.3	Crisis Communication.....	51
4.4	Crisis Resource Management.....	51
4.5	Handover.....	53
4.6	Examples of Common Mistakes and Errors	54
	References.....	55
5	Approach to Difficult Decisions and End-of-Life Care	57
	<i>Frauke Weidanz</i>	
5.1	Introduction	58
5.2	Withholding and Withdrawing Therapy	58
5.3	Decision-Making When Patients Lack Capacity	58
5.4	End-of-Life Care in ITU	59
5.5	Diagnosis of Death by Neurological Criteria.....	60
5.6	Organ Donation	62
	Reference	63
II	Organ Dysfunction and Support	
6	Respiratory Failure and Respiratory Support	67
	<i>Eumorfia Kondili, Athanasia Proklou, and Georgios Prinianakis</i>	
6.1	Introduction	68
6.2	Basic Physiology	68
6.3	Supplementary Oxygen Delivery Devices	70
6.4	Non-Invasive Ventilation (NIV)	71
6.5	Invasive Mechanical Ventilation.....	74
6.5.1	Basic Physiology of Respiratory System Related to Mechanical Ventilation.....	75
6.5.2	Basic Features of Positive Pressure Ventilators	77
6.5.3	Ventilation Modes	78
	Reference	90
7	Shock and Haemodynamic Monitoring	91
	<i>Mo Al-Haddad</i>	
7.1	Introduction	92
7.2	Basic Cardiovascular Physiology	92
7.3	Shock	96
7.4	Haemodynamic Monitoring	98
7.4.1	Lactate.....	99

7.4.2	Mixed and Central Venous Saturation, and PCO_2 Gap	99
7.4.3	The Arterial Blood Pressure Waveform	99
7.4.4	Point-of-Care Ultrasound	100
7.4.5	Monitoring of Cardiac Output	101
7.5	Management of Shock	102
7.6	Haemorrhage	103
7.7	Fluid Therapy	103
7.8	Vasopressors and Inotropes	104
	Further Readings	106
8	Disorders of Consciousness	107
	<i>Frauke Weidanz</i>	
8.1	Introduction	108
8.2	Approach to the Comatose Patient: Initial Resuscitation and Investigations	109
8.3	Pathophysiology of Raised Intracranial Pressure (ICP)	111
8.4	Treatment of Raised ICP	114
8.5	Secondary Brain Injury and Neuroprotective Measures	115
8.6	Specific Conditions in Neuro-Critical Care	117
8.6.1	Traumatic Brain Injury (TBI)	117
8.6.2	Subarachnoid Haemorrhage (SAH)	119
8.6.3	Stroke	120
8.6.4	Seizures and Status Epilepticus (SE)	122
8.6.5	Central Nervous System Infection	123
8.6.6	Post-Cardiac Arrest Brain Injury	125
8.7	Prognostication	126
	Reference	126
9	Interpreting Blood Gas Analysis	127
	<i>František Duška</i>	
9.1	Why a Blood Gas is Important in ICU?	128
9.2	Technical Notes to Blood Gas Measurements	130
9.3	How to Assess Acid-Base Status?	133
9.3.1	Simplified Electroneutrality-Based Method	134
	Reference	138
10	Acute Kidney Injury	139
	<i>Karin Belch and Mo Al-Haddad</i>	
10.1	Introduction	140
10.2	Basic Renal Physiology	140
10.3	Assessment of Renal Function	141
10.3.1	Investigations	142
10.4	Acute Kidney Injury: Definition	142
10.4.1	Aetiology	142
10.4.2	Risk Assessment for AKI	144
10.4.3	Complications and Management of AKI	144
10.5	Renal Replacement Therapy	144
10.5.1	Which RRT Mode?	145

10.5.2	Haemofiltration vs. Haemodialysis	147
10.5.3	RRT Prescription.....	148
10.5.4	Stopping RRT	148
	Further Reading	149
11	Sepsis and Septic Shock	151
	<i>Anne Le Roy</i>	
11.1	Introduction	152
11.2	The Definition of Sepsis and Septic Shock	152
11.3	Pathophysiology.....	152
11.3.1	Proinflammatory Pathways.....	153
11.3.2	Anti-inflammatory Pathways	155
11.4	Diagnostics	155
11.4.1	Clinical Symptoms	155
11.4.2	Laboratory Signs of Sepsis.....	156
11.5	Initial Management	156
11.5.1	Stabilisation of Haemodynamic Parameters	157
11.5.2	Early Antibiotic Therapy.....	158
11.5.3	Source Control.....	161
11.6	Follow-Up Management	161
11.6.1	Antibiotic Stewardship.....	162
	References.....	163
III	Common Challenges and Troubleshooting in ICU	
12	Hypoxia and Ventilator Asynchronies	167
	<i>Eumorfia Kondili and Maria Mpolaki</i>	
12.1	Hypoxia.....	168
12.1.1	Basic Respiratory Pathophysiology: Five Mechanisms of Hypoxia.....	168
12.1.2	A Practical Approach to a Ventilated Patient with Worsening Hypoxia	172
12.1.3	Causes	173
12.2	Patient-Ventilator Asynchronies	176
12.2.1	Asynchronies During the Triggering Phase	177
12.2.2	Asynchronies During the Pressure or Flow Delivery Phase	179
12.2.3	Insufficient Ventilator Assist	180
12.2.4	Asynchronies During the Cycling-Off Phase	181
	References.....	183
13	Arrhythmias	185
	<i>Katie Duncan and Mo Al-Haddad</i>	
13.1	Introduction	186
13.2	Causes of Arrhythmia in ICU Patients.....	186
13.3	Arrhythmia Classification.....	186
13.3.1	Tachyarrhythmias	187
13.3.2	Bradyarrhythmias.....	187
13.4	Initial Approach	188

13.5	Management of Tachyarrhythmias	189
13.5.1	Management of Unstable Patients with a Tachyarrhythmia	189
13.5.2	Management of Stable Tachyarrhythmia	190
13.6	Management of Patients with Bradyarrhythmia	192
13.6.1	Stable Bradyarrhythmia	192
13.6.2	Unstable Bradyarrhythmia	193
	Further Reading	194
14	An Approach to the Critically Ill Bleeding Patient	195
	<i>Nathan D. Nielsen</i>	
14.1	Introduction	196
14.2	Classification of Haemorrhage	196
14.3	Identification of the Source of Haemorrhage	197
14.4	Establishing Vascular Access	198
14.5	Key Resuscitation and Transfusion Principles	198
14.6	Resuscitation Targets in the Bleeding Patient	200
14.7	Correction of Factors that Contribute to Delayed Haemostasis	200
14.8	Reversal of Anticoagulant and Antiplatelet Agents	202
	References	203
15	Analgesia and Sedation	205
	<i>Anne Mecklenburg, Joana Berger-Estilita, and Ligia Pires</i>	
15.1	Introduction	206
15.2	Pain in the ICU	206
15.3	Assessment of Pain in Critically Ill Patients	207
15.3.1	Patients, Who Can Self-Report (Conscious)	207
15.3.2	Patients, Who Cannot Self-Report Due to Sedation or Disorders of Brain or Mind	208
15.4	Assessment of Sedation in ICU Patients	209
15.5	Analgesia-Based Sedation/Analgosedation	210
15.5.1	Principles	210
15.5.2	Pharmacokinetic and Pharmacodynamic Considerations	211
15.5.3	Practical Approach to Pain Control in the ICU Patient	211
15.5.4	Refractory Pain and Special Circumstances	213
15.5.5	Practical Approach to Sedation in ICU Patients	213
	References	216
16	Agitation and Delirium	217
	<i>Joana Berger-Estilita and Ligia Pires</i>	
16.1	Introduction	218
16.2	Risk Factors	219
16.3	Delirium Prevention	219
16.4	Assessment of Delirium	220
16.5	Bundle ABCDEF (the "ICU Liberation" Bundle)	221
16.6	Algorithm for the Coordinated Approach to Pain, Sedation, and Delirium in the ICU	222
16.7	Practical Approach to Acutely Agitated Patient in ICU	223
	References	224

17	Common Electrolyte Disturbances	225
	<i>Niels Van Regenmortel and František Duška</i>	
17.1	Diagnostic and Therapeutic Approach to Dysnatraemias	226
17.1.1	Key Physiological Principles	226
17.1.2	Hyponatraemia	227
17.1.3	Hypernatraemia.....	231
17.2	Disorders of Potassium Cation Concentration	233
17.2.1	Hypokalaemia.....	233
17.2.2	Hyperkalaemia.....	234
17.3	Magnesium	235
17.4	Phosphate	236
17.5	Calcium	237
	References.....	239
18	Failure to Wean from Mechanical Ventilation	241
	<i>Anne Mecklenburg</i>	
18.1	Introduction	242
18.2	Screening for Readiness	243
18.3	Weaning	243
18.3.1	Techniques.....	244
18.3.2	Weaning Failure	244
18.3.3	Evaluate Causes of Weaning Failure	245
18.4	Extubation	246
	References.....	246
	Appendix A: Common ICU Drugs.....	248
	Appendix B: Useful Checklists and Algorithms	256
	Appendix C: ICU Trainee Survival Guide	270
