PART ONE

The agile business 1

Introduction 1

How to use this book 2

So what is an agile business? 3

Notes 5

01 The key forces for change 7

Relentless, accelerating change 8

Transformed competitive contexts 9

Transformed consumer contexts 14

Transformed company contexts 15

The key challenge – rates of change 17

Notes 19

02 How digital disrupts 21

The lifecycle of a technology 23

Why businesses get disrupted: the ambiguity zone and agile businesses 24

Notes 26

03 What's stopping you? 28

Slow by design 28

Looking for opportunity 29

Why organizations become 'sticky' 31

Why good ideas become battles 32

The arrogance of scale 35

Protecting against obsolete beliefs and 'toxic assumptions' 37

The tyranny of rigid planning 38

- Marginal thinking 40
- Culture and behaviour 41
- Notes 43

04 Defining digital transformation and how an agile business is the foundation for it 46

- What good looks like – a maturity model for agile businesses 47
- The agile business formula 50
- The agile context model 51
- Notes 52

PART TWO

Fast 53

- Defining fast 53
- Working smarter and faster 58
- Notes 59

05 Operating in the ‘ambiguity zone’ 61

- Being fast through continuous innovation 62
- More experimentation = more opportunity 66
- Marginal and breakthrough innovation 68
- Optimization vs transformation 68
- The thermocline of transformation 69
- The case for a more iterative, emergent approach 70
- The problem with waterfall 71
- The three types of problem in the world 73
- Complex scenarios require emergent solutions 75
- Notes 76

06 Agile and adaptive methodology 79

- Design thinking 79
- Agile 80
- Lean 83
- The principles of agile business 85
- Developing a learning culture 86
- The dangers of systematic survival bias 89

Learning to unlearn 90
Fixed and growth mindsets 90
Embedding reflection time 91
Notes 94

07 The agile innovation process 97

Empowering invention 97
Rewiring business models with an asset-light or asset-heavy approach 105
Possible futures 107
Ingrained commercialization 112
Scaling, the digital-native way 117
Acquisition as a path to growth 122
Building supporting evidence and getting up to speed fast 123
Key takeouts 124
Notes 127

PART THREE

Focused 133

Defining focus 133
Notes 137

08 The role of vision and purpose 139

The organizing idea, purpose and vision 139
The link between purpose and profit 141
Taking the long view 142
Notes 145

09 Agile strategy and planning 147

The key to good strategy 147
Emergent and deliberate strategy 149
The balance between vision and iteration 150
The impact of plan continuation bias 152
Bias to action 155
The customer-centric organization 156
Agile business maturity 159

‘P’ is for prioritization 162
Strategy as an ever-changing algorithm 167
Discovery-driven planning 169
Notes 170

10 Linking strategy to execution 175

The five questions 175
Strategy and tactic trees 177
OKRs – bringing the team with you 178
Sprint working as a driver of change 180
Agile planning cascades and cadence 182
Dealing with blockers – using current reality trees 184
Complexity bias and looking for answers in the wrong places 186
DIKW: a foundational approach to value from data 192
Technology as a barrier to change 193
Technology as an enabler of change 194
Agile budgeting 196
Key takeouts 199
Notes 200

PART FOUR

Flexibility 203

Defining flexibility 203
Notes 205

11 Agile structures and resourcing 207

Concurrent running, co-located working 209
The insourcing and outsourcing dynamic 212
Centralization vs decentralization, specialists and generalists 214
The power of small teams to drive big change 215
Two-pizza teams 218
Self-organizing, multidisciplinary teams 219
The composition of multidisciplinary teams 221
Small teams and resource dynamism 222
Notes 223

12 Scaling agility 225

Managing core teams and dependencies 229

Aligning multidisciplinary teams 232

Getting the right mix – pioneers, settlers, town planners 234

Agile decision-making – flatter structures, quicker decisions 238

Agile governance and the digital board 240

Notes 241

13 Building the culture to move fast 243

Agile is not just a process, it defines a culture 243

What is digital-native culture? 244

The right culture helps you to move fast 248

What really differentiates high-performing teams? 249

Creating the culture for real collaboration 252

Learning opportunities 254

Learning fast: see one, do one, teach one 255

The importance of trust and ‘productive informality’ 256

Read my user manual 257

Notes 258

14 A blueprint for flexibility: autonomy, mastery and purpose 262

Our massive employee engagement problem 262

Mapping strategy and culture to motivation 263

Autonomy 264

Mastery 266

Purpose 269

Notes 270

15 Digital-native talent 272

Hiring smart 272

Peacocks, penguins and pie bakers 274

Redefining effective leadership for the digital age 275

Key takeouts 276

Notes 277

PART FIVE**Start small, scale fast and the transformation journey – putting it all together 279**

The five dimensions of change 281

Dimension one: personal 281

Dimension two: principles 289

Dimension three: process 294

Dimension four: practice 298

Dimension five: pace 304

Staying agile 308

What now? 313

Notes 313
