List of Abbreviations	xvii
Preface to the Fifth Edition	xix
PART ONE THE SHIFTING CONTOURS OF THE GLOBAL ECONOMY	1
1 Questioning 'Globalization'	3
What in the world is going on?	3
Conflicting perspectives on 'globalization'	5
Unravelling the complexity of the new geo-economy: economies as networks	8
Production circuits; production networks	13
Even in a globalizing world, economic activities are geographically localized	21
Networks of networks	23
The geo-economy and the environment	25
Conclusion	29
Notes	30
2 Global Shift: The Changing Global Economic Map	32
What's new?: The imprint of past geographies	32
Roller-coasters and interconnections	35
The changing contours of the global economic map: global shifts in production, trade and direct investment	38
Conclusion	67
Notes	68
PART TWO PROCESSES OF GLOBAL SHIFT	71
3 Technological Change: 'Gales of Creative Destruction'	73
Technology and economic transformation	73
Processes of technological change: an evolutionary perspective	74

The time–space shrinking technologies	78
Technological changes in products and processes	93
Geographies of innovation	98
Conclusion	103
Notes	104
4 Transnational Corporations: The Primary ‘Movers and Shapers’ of the Global Economy	106
The significance of the transnational corporation	106
Why firms transnationalize	107
How firms transnationalize	114
‘Placing’ firms: the myth of the ‘global’ corporation	124
Conclusion	135
Notes	135
5 ‘Webs of Enterprise’: The Geography of Transnational Production Networks	137
The ‘global–local’ question: an oversimplified view of the TNC’s dilemma	137
Configuring the firm’s production network: the complex internal geographies of the TNC	140
TNCs within networks of externalized relationships	153
Regionalizing transnational production networks	168
Conclusion	171
Notes	171
6 ‘The State Is Dead ... Long Live the State’	173
‘Contested territory’: the state in a globalizing economy	173
States as <i>containers</i> of distinctive cultures, practices and institutions	175
States as <i>regulators</i> of trade, foreign investment and industry	179
States as <i>competitors</i>	184
States as <i>collaborators</i> : the proliferation of regional integration agreements	187
Conclusion	204
Notes	205
7 ‘Doing It Their Way’: Variations in State Economic Policies	207
From the general to the specific	207
A degree of convergence	207
The older industrialized economies: the United States and Europe	210
Japan	214
Newly industrializing economies	216
Conclusion	230
Notes	230

8	Dynamics of Conflict and Collaboration: The Uneasy Relationship between TNCs and States	232
	The ties that bind	232
	Bargaining processes between TNCs and states	236
	Conclusion	245
	Notes	246
	PART THREE THE PICTURE IN DIFFERENT SECTORS	247
9	'Fabric-ating Fashion': The Clothing Industries	249
	The clothing production circuit	249
	Global shifts in the clothing industries	250
	Changing patterns of consumption	254
	Production costs and technology	255
	The role of the state and the Multi-Fibre Arrangement	260
	Corporate strategies in the clothing industries	262
	Regionalizing production networks in the clothing industries	267
	Conclusion	276
	Notes	276
10	'Wheels of Change': The Automobile Industry	278
	The automobile production circuit	278
	Global shifts in the automobile industry	280
	Changing patterns of consumption	283
	From mass production to lean production:	
	technological change in the automobile industry	284
	The role of the state	286
	Corporate strategies in the automobile industry	289
	Regionalizing production networks in the	
	automobile industry	304
	Conclusion	315
	Notes	315
11	'Chips with Everything': The Semiconductor Industry	317
	The semiconductor production circuit	317
	Global shifts in the semiconductor industry	319
	Changing patterns of consumption	321
	Production costs and technology	323
	The role of the state	326
	Corporate strategies in the semiconductor industry	333
	Regionalizing production networks in the semiconductor	
	industry: the case of East Asia	343
	Conclusion	345
	Notes	345

12	'We Are What We Eat': The Agro-Food Industries	347
	Transformation of the food economy: the 'local' becomes 'global'	347
	Agro-food production circuits	349
	Global shifts in the agro-food industries	352
	Consumer choices – and consumer resistances	358
	Transforming technologies in agro-food production	360
	The role of the state	363
	Corporate strategies in the agro-food industries	367
	Conclusion	376
	Notes	376
13	'Making the World Go Round': Financial Services	379
	Money counts	379
	The structure of the financial services industries	381
	The dynamics of the market for financial services	383
	Technological innovation and the financial services industries	384
	The role of the state: regulation and deregulation in financial services	387
	Corporate strategies in financial services	390
	Geographical structures of financial services activities	397
	Conclusion	407
	Notes	408
14	'Making the Connections, Moving the Goods': The Logistics and Distribution Industries	410
	'Whatever happened to distribution in the globalization debate?'	410
	The structure of the logistics and distribution industries	411
	The dynamics of the market	414
	Technological innovation and the logistics and distribution industries	414
	The role of the state: regulation and deregulation in the logistics and distribution industries	420
	Corporate strategies in the logistics and distribution industries	423
	Logistics 'places': key geographical nodes on the global logistics map	430
	Conclusion	432
	Notes	432
	PART FOUR WINNING AND LOSING IN THE GLOBAL ECONOMY	435
15	Winning and Losing: An Introduction	437
	From processes to impacts	437
	The contours of economic development	440
	Making a living in the global economy	449

The 'double exposure' problem	450
Conclusion	452
Notes	452
16 Good or Bad?: Evaluating the Impact of TNCs on Home and Host Economies	454
A counterfactual dilemma	454
TNCs and 'home' economies: potential impacts of outward investment	456
TNCs and 'host' economies: potential impacts of inward investment	459
Conclusion	473
Notes	474
17 Making a Living in Developed Countries: Where Will the Jobs Come From?	475
Increasing affluence – but not everybody is a winner	475
What is happening to jobs and to incomes?	476
Why is it happening?	486
What is being done?	492
Conclusion	499
Notes	499
18 Making a Living in Developing Countries: Sustaining Growth, Enhancing Equity, Ensuring Survival	501
Some winners – but mostly losers	501
Heterogeneity of the developing world	502
Sustaining growth and ensuring equity in newly industrializing economies	511
Ensuring survival and reducing poverty in the least developed countries	518
Conclusion	522
Notes	522
19 Making the World a Better Place	524
'The best of all possible worlds'?	524
Globalization and its 'discontents': emergence of a global civil society?	525
Global governance structures	528
Two key concerns: labour standards and environmental regulation	540
To be 'globalized' or not to be 'globalized': that is the question	545
What might the future be? What <i>should</i> the future be?	546
Notes	553
Bibliography	555
Index	585
