List of Figures and Table	page viii
Foreword	xi
<i>Dimitri Zenghelis</i>	
Preface	xvii
Acknowledgements	xxiv
1 What Is the Economic Challenge of Climate Action?	1
1.1 Let's Talk about the 'Costs' of Saving Our Planet	1
1.2 It's the Technology, Stupid!	17
1.3 The Transition and Economic Growth	26
1.4 What Now?	30
2 Seeking Innovation, Not Optimality	34
2.1 Innovation Is the Backbone of Growth	34
2.2 Equilibrium Is an Economy without Growth	42
2.3 Equilibrium Ideas Hinder Climate Policy-Making	49
3 Economic Resources Are Created, Not Allocated	61
3.1 Could We Identify Optimal Growth If We Saw It?	61
3.2 Optimal Economic Performance Is Unstable	73
3.3 Economic Resources are Created, Not Allocated	85
4 The Transition in Context: The Six Great Waves of Innovation	91
4.1 What Is a Technological Revolution?	91
4.2 Five Past Great Waves of Innovation	100

4.3	Common Threads Across the Great Waves	112
5	The Life Cycle of Products and Sectors	119
5.1	The Need for a New Theory of Economic Growth	119
5.2	The Life Cycle Theory of Growth	127
5.3	Growth from Process and Product Innovation	132
5.4	What Does this Mean for the Zero-Carbon Transition?	146
6	The Sunrise: A New Technological Constellation	149
6.1	How Innovation Works	149
6.2	The Sunrise Sectors and What They Displace	157
6.3	The Macroeconomics of ' <i>Smartification</i> '	175
7	The Sunset: Deindustrialisation and Post-Industrial Decline	179
7.1	Creative Destruction in the Sunset	179
7.2	The End of Work in Fossil Fuels	189
7.3	Deindustrialisation All Over Again	197
8	The Great Transformation of Our Time	201
8.1	Transformation of Industry, Work and Life	201
8.2	Transformation of Trade and Investment	208
8.3	Transformation of (Geo)political Power	217
8.4	A Brave New Geopolitical World	229
9	Instability Is the True Cost of Transition	230
9.1	Are Transition 'Pathways' Misleading?	230
9.2	Economic and Financial Stability	238
9.3	Political Instability	268
9.4	What If It All Goes Wrong?	274

10 Rethinking Climate Policy	276
10.1 We Need to Rethink Climate Policy Urgently	276
10.2 Rethinking Policy to Make the Transition Happen	280
10.3 Actively Manage Risk and Create Resilience	295
10.4 The Need for Policy Coordination	306
Conclusion	309
Appendix A: A Method to Measure Economic Resilience	314
Appendix B: A Dynamic Input–Output Model of Economic Evolution	321
