Preface

W.T. Weber and D.L. Ewert xv

I. B LYMPHOCYTE DEVELOPMENT

A Re-Evaluation of the Function of the Bursa of Fabricius

Michael J.H. Ratcliffe, Olli Lassila, John Reynolds, J. Richard L. Pink, and
Olli Vainio 3

**A Few Germline Genes Encode the Variable Regions of Chicken
Immunoglobulin Light and γ -Heavy Chains**

R. Parvari, E. Ziv, F. Lantner, S. Tel-Or, Y. Burstein, and I. Schechter 15

II. BURSA-THYMUS MICROENVIRONMENT

Characterization of Chicken Thymic and Bursal Stromal Cells

Richard L. Boyd, Trevor J. Wilson, Kathy Mitrangas, and Harry A. Ward . . . 29

**Chicken B Lymphocyte Differentiation: Ontogeny, Bursal Microenvironment
and Effect of IBD Virus**

Richard L. Boyd, Kathy Mitrangas, Helen C. Ramm, Trevor J. Wilson,
Kevin J. Fahey, and Harry A. Ward 41

**Contribution of a Specialized Dendritic Cell, the Secretory Cell, to the
Microenvironment of the Bursa of Fabricius**

Bruce Glick and Imre Olah 53

**Effect of Phorbol Myristate Acetate on In Vitro Growth of Lymphocytes
From the Chicken Thymus and Bursa of Fabricius**

Donald L. Ewert and Wilfried T. Weber 67

III. MONOCLONAL ANTIBODIES

Avian B Cell Diversity Examined With Monoclonal Anti-V_H Antibodies

J. Thomas Wright, Chen-lo H. Chen, Hiromi Kubagawa,
and Max D. Cooper 81

**Production and Flow Cytometric Analysis of Monoclonal Antibodies
Reactive With Subpopulations of Chicken Lymphocytes**

Hyun S. Lillehoj 87

Characterization of Two Monoclonal Antibodies Against Chicken T Lymphocyte Surface Antigens

Olli Vainio, Timo Veromaa, Erkki Eerola, and Paavo Toivanen 99

Detection of a Macrophage Population in the Thyroids of Obese Strain Chickens Using Monoclonal Antibodies

Rodney R. Dietert, Muquarrab A. Qureshi, William C. Gause, Kathryn A. Trembicki, and James A. Marsh 109

IV. CELLULAR IMMUNITY, T CELL GROWTH FACTOR

Generation and Functional Characterization of *Eimeria tenella* Immune Chicken T-Cell Clones

Balbir S. Bhogal, Dennis M. Schmatz, Harley Y. Tse, Owen Ravino, and Ethel B. Jacobson 127

Purification of Avian T Cell Growth Factor and Immune Interferon Using Gel Filtration High Resolution Chromatography

Tom L. Fredericksen and Jagdev M. Sharma 145

Cultured Avian Lymphocytes With Natural Killer Cell Activity

Karel A. Schat, Bruce W. Calnek, and Daniel Weinstock 157

PFC Formation in Immature Avian Hosts Grafted With Thymic Cells From Juvenile Chicken Donors

Frank Seto 171

V. MAJOR HISTOCOMPATIBILITY COMPLEX

Evidence for MHC Gene Control of Lesion Severity in Experimental Allergic Encephalomyelitis of Chickens

Marcia A. Parker and Louis W. Schierman 189

Cloning of a Putative Chicken MHC Class II Alpha Chain Gene

Joanne Kivela, Hsing-Jien Kung, Jerry Dodgson, and Larry Bacon 199

Immune Mechanisms in Rous Sarcoma Regression

P.C. Powell, K. Hala, G. Bock, H. Dietrich, and G. Wick 207

Allograft and Antibody Responses of 151_s-B Congenic Chickens

Larry D. Bacon, Nadir Ismail, and John V. Motta 219

VI. TUMOR IMMUNITY

Suppressor T Cells in Chickens Bearing Chemically Induced Tumors

Andrew S. Edelman, M. Elizabeth Robinson, Pedro Sanchez, and G. Jeanette Thorbecke 237

Virus Specific Syngeneic Killing of Reticuloendotheliosis Virus Transformed Cell Line Target Cells by Spleen Cells

Daniel Weinstock and Karel A. Schat 253

Immunization of Chickens Against Marek's Disease With Cell-Free Supernatant From the JMV-1 Lymphoblastoid Cell Line

Linda H. Keller, Karen A. Belden, and Martin Sevoian 265

VII. IN VIVO IMMUNE MECHANISMS

Mechanism of T Cell Immunosuppression by Infectious Bursal Disease Virus of Chickens

J.M. Sharma and T.L. Fredericksen 283

Immunological Traits of Chicks Selected for Early and Late Immune Response to *E. coli* and Newcastle Disease Virus

J. Pitcovski, E.D. Heller, A. Cahaner, B.A. Peleg, and N. Drabkin 295

Induction of Antibody and Cellular Immune Responses in Chickens Against *Eimeria tenella* by Anti-Idiotypic

Balbir S. Bhogal, Karl Nollstadt, Karen Kirk, Yashwant D. Karkhanis, and Ethel B. Jacobson 307

Systemic and Local Antibody Responses in Chickens After Infection and Vaccination With Infectious Bronchitis Virus

D. Lütticken, E.O. Rijke, and A.H.C. Loeffen 321

VIII. DIETARY DEFICIENCIES AND IMMUNE FUNCTION

Effect of Dietary Selenium and Vitamin E Deficiencies in the Chicken on Con A Induced Splenocyte Proliferation

James A. Marsh, Rodney R. Dietert, and Gerald F. Combs, Jr. 333

Index 347
