

Contents

- 1 Facets of the Life and Work of Professor Robert Bárány (1886–1936)
R. Lorente de No

- 17 Robert Bárány—Ingenious Scientist and Farseeing Physician
Jan Stahle

Space: The New Frontier in Vestibular Research

- 27 Floccular and Nodular Control of the Vestibuloocular Reflex
Bernard Cohen, Theodore Raphan, and Walter Waespe
- 39 Prediction of Susceptibility to Space Motion Sickness
J. L. Homick, M. F. Reschke, and J. M. Vanderploeg
- 51 A Nonthermoconvective Mechanism Generating Caloric Nystagmus:
Similarities Between Pressure-Induced and Caloric Nystagmus in
the Pigeon
R. von Baumgarten, G. Boehmer, A. Brenske, and M. Reiser
- 61 Opportunities for Vestibular Research in the Space Station Era
Nancy G. Daunton

Vestibular Research in Space

- 67 Space Motion Sickness: Preflight Preadaptation
*D.E. Parker, A.P. Arrott, M.F. Reschke, H.E. von Gierke,
J.C. Rock, and B.K. Lichtenberg*
- 71 Considerations on the Caloric Nystagmus in Microgravity
H. Scherer and A.H. Clarke

Structure and Function of Vestibular End Organs

- 81 Ultrastructural Findings of the Neuroglia in the Human Vestibular
Nerve
Ken Kitamura
- 87 Reduction of Electrical Brain Activity in the Central Nervous System
After Unilateral Vestibular Lesion
I. Pyykkö, M. Magnusson, V. Jäntti, and L. Schalen
- 95 Three-Dimensional Ultrastructure of the Vestibular Ganglion of the
Frog
Yasuo Harada and Nobuharu Tagashira

- 107 A New Theory on Thermal Endolymphatic Flow
Yasuo Harada, Takeshi Ariki, and Mamoru Suzuki
- 115 Criteria for Diagnosing Bilateral Vestibular Dysfunction
Mohamed A. Hamid, Gordon B. Hughes, and Sam E. Kinney
- 119 Peripheral Sensory Processing in Mammalian Gravity Receptors:
Observations of Ciliary Tuft Configurations
Muriel D. Ross, Kathleen Donovan, and Charles Rogers
- 125 The Endolymphatic Sac and Its Free-Floating Cells
Hideo Yamane, Yoshiaki Nakai, and Makoto Igarashi
- 133 Influence of Sports Load on the Vestibular Apparatus
*Hana Krejčová, Jaroslav Jeřábek, Martin Bojar, Eva Tutzká,
Rudolf Černý, and Pavla Polechová*
- 141 Physiological Characteristics of the Primary Horizontal Canal
Neurons in Guinea Pig
Toshiaki Yagi, Hiroshi Ueno, and Jun Yamaguchi
- 149 Surgical Management of Cupulolithiasis
Richard R. Gacek
- 157 Vestibular Blood Flow Studied with Microspheres
Clarence Angelborg and Hans Christian Larsen
- 165 Structure and Function of the Angular Acceleration Receptor System
of *Octopus* with Special Reference to Its Efferent Innervation
B.U. Budelmann, R. Williamson, and B. Auerbach
- 169 Effects of Barbiturate on the Vestibular and Oculomotor Systems: A
Sequential Study
V.S. Dayal, M. Mai, D. Tomlinson, and J. Farkashidy

Surgery of the Vestibular System

- 177 Vestibulospinal Changes Following Singular Neurectomy for Benign
Paroxysmal Nystagmus
F.O. Black, L.M. Nashner, and R.J. Peterka
- 187 Compensation Following Acute Unilateral Total Loss of Peripheral
Vestibular Function
Cecil W. Hart, Patricia A. McKinley and Barry W. Peterson
- 193 Retrolabyrinthine Vestibular Nerve Section: A Two-Year Summary
John L. Kemink and Malcolm D. Graham

Role of the Cerebellum in the Vestibuloocular Reflex

- 199 • Eye Movements in a Patient with Congenital Absence of the Right Cerebellar Hemisphere
Mohamed A. Hamid, Gordon B. Hughes, Anthony J. Furlan, Paul M. Duchesneau, and Meredith A. Weinstein
- 205 • Causes of Vertigo, Tinnitus and Sensorineural Hearing Loss, Especially in Relation to Neurovascular Compression
M. Nozue, H. Ryu, and K. Uemura
- 211 • Cerebellum and Vestibuloocular Reflex
S. Takemori, Y. Seki, and T. Aiba
- 217 • Modification of the Dynamics of the Vestibuloocular Reflex by Head Tilt in Patients with Cerebellar Lesions
T.C. Hain, D.S. Zee, B. Maria

Metabolic Functions of the Vestibular System

- 225 • Oculomotor Nerve Involvement in Diabetes Mellitus: Horizontal Saccades Compared to Nerve Conduction Velocities
B. Hofferberth and M. Hirschberg
- 229 • Brainstem Auditory Evoked Potentials Modifications Induced by Vertebral Artery Compression in Vertebrobasilar Insufficiency: An On-Line Computer-Assisted Study
G. Freyss, J.M. CATERAN, M. Ohresser, J.F. Motsh, E. Vitte, P. Pialoux, and G. Rancurel
- 235 • Effect of Lidocaine and Tocainide on Vertigo, Nausea, Nystagmus, and Voluntary Eye Movements
I. Pyykkö, S. Padoan, M. Lyttkens, M. Magnusson, and L. Schalen
- 243 • Neurotransmitters and Dysequilibrium
Wallace Rubin
- 249 • Diagnostic Significance of Hyperactive Caloric Response
Arvind Kumar and Nicholas Torok

Vestibular Testing: Techniques for Lateralization and Differential Assessment of End Organ Function

- 255 • Utricular Dysfunction in Benign Paroxysmal Positional Vertigo
Charles H. Markham, Shirley G. Diamond, and Juichi Ito
- 263 • Differential Assessment of Otolithic Versus Canal Function in Patients Using Earth Horizontal Axis Rotation
C. Wall III, S. Busis, and D. B. Kameron

- 271 Eye Movements and Perceptual Effects Induced by Off-Vertical Axis Rotation at Small Angles of Tilt
Christian Darlot, Bernard Cohen, Alain Berthoz, and Pierre Denise
- 281 Impaired-Pursuit Eye Movement and Optokinetic Nystagmus: Relationship to Tumor Size in Cerebellopontine Lesions
Jaime T. Benitez and Kenneth R. Bouchard
- 287 Vestibular Compensation Measured by the Broad-Frequency Band Rotatory Test
L.M. Ödkvist, C.G. Möller, B. Larsby, and D. Hydén
- 293 Smooth Pursuit in Normals and Patients with Acoustic Neuromas
B. Larsby, C.G. Möller, D. Hydén, and L.M. Ödkvist.
- 297 Effects of Concentrically Moving Multiple Spotlights on Body Sway
Kiichiro Taguchi, Masato Kikukawa, and Chiharu Hirabayashi
- 305 Diagnosis of Otolith and Semicircular-Canal Lesions by Galvanic Nystagmus and Spinal Reflexes
T. Tokita, H. Miyata, Y. Ito, and K. Takagi
- 315 Positional Nystagmus: A Clinical Diagnostic Sign
A. Katsarkas
- 325 Contribution of the Examination of the Vestibulospinal Reflex in the Rehabilitation Treatment of Labyrinthine-Defective Patients
M.E. Norré, G. Forrez, and A. Beckers
- 335 Neurootological Experience with Special Regard to the Positional Test for Early Diagnosis of Acoustic Neuromas: 130 Operated Cases
T. Haid and E. Wigand
- 341 Sequential Variability of Nystagmus Components During Postrotation Nystagmus Response
I. Pyykkö, M. Juhola, and N.G. Henriksson
- 351 Rotatory and Caloric Findings in Patients with Acoustic Neuromas
D. Hydén, B. Larsby, C. Möller, L.M. Ödkvist, and L. Ekvall
- 359 Velocity and Acceleration Limits in Human Pursuit Eye Movements
C.W. Stockwell, K.M. Barin, K.J. Alexander, and K.G. Barin
- 365 Is Adaptation in Ankle and Neck Muscles Dependent on an Intact Vestibulospinal Reflex System?
J.H.J. Allum, E.A. Keshner, and C.R. Pfaltz
- 375 Comparison of Vestibuloocular and Vestibulospinal Reflexes in Normal Subjects and Patients
A. Hadj-Djilani

- 387 Caloric Stimulation in Face-Down Position
Leonard R. Proctor
- 393 Clinical Evaluation of Vestibular-Somatosensory Interactions Using Galvanic Body Sway Test
Y. Watanabe, H. Ino, H. Ohi, N. Ohashi, H. Kobayashi, and K. Mizukoshi
- 401 Oculomotor Tests in Different Age Groups
Ulf Rosenhall, Göte Björkman, Kai Pedersen, and Per Hanner
- 411 Cerebral Cortical Lesions and Vestibular Disturbances: An Experimental Study on the Monkey
Pekka Tuohimaa, Richard C. Schneider, and Elisabeth C. Crosby
- 421 Neurootological Findings in Cerebellar Tumors
C. Morales-Garcia, E. Rios, O. Hoppe, and H. Fantuzzi

Visual-Vestibular Interactions in the Central Nervous System

- 437 Human Vestibuloocular Reflex Dynamics in Patients with Vestibular Disorders
Robert J. Peterka and F. Owen Black
- 449 Effect of Alerting Stimulation on Visual Attention and OKN in Man
M. Magnusson, I. Pyykkö, V. Jäntti, and N. Schalén
- 455 Spatial Properties of the Vestibuloocular Reflex Before and After Labyrinthine Lesions
Barry W. Peterson, James F. Baker, and Carmen Wickland
- 463 Inhibition of Vestibuloocular Reflex by Stimulation of Parvocellular Reticular Nucleus
S. Kashii, I. Matsuoka, M. Sasa, and S. Takaori
- 471 Human Compensatory Slow Eye Movements in the Absence of Vestibular Function
G.M. Halmagyi and I.S. Curthoys
- 481 Contribution of Labyrinthine Stimulation to Clear Vision
Masaaki Kitahara, Hitoshi Kitano, and Kazutomo Kitajima
- 489 Effect of VOR Gain Changes on OKN Gain Control
Hideharu Aoki, Toshiaki Yagi, Yuzuru Kobayashi, and Tomokazu Kamio
- 493 Central Mechanisms Responsible for the Gain Regulation of Vestibular and Neck Reflexes in Limb Extensors of the Decerebrate Cat
O. Pompeiano, P. d'Ascanio, and E. Bettini

- 499 Eye Movements Evoked by Conflicting Retinal Motion Stimuli
G.R. Barnes and J.W. Crombie
- 513 Quantitative Assessment of Visual-Vestibular Interaction Using Sinusoidal Rotation in Patients with Well-Defined Central Nervous System Lesions
K. Mizukoshi, H. Kobayashi, N. Ohashi, H. Shojaku, and Y. Watanabe
- 523 Relationship Between Optokinetic Nystagmus and Pursuit, Vestibular Nystagmus, and Saccades in Peripheral Vestibular and Infratentorial Lesions
M. Magnusson, I. Pyykkö, B. Norrving, and L. Schalén
- 529 Study of Gaze Stabilization During Walking and Running: Observation by Vertically Oscillating Platform
Masahiro Takahashi, Chikako Midorikawa, Naomi Tsujita, and Haruko Hoshikawa
- 539 Orientation of Vestibular Nystagmus is Modified by Head Tilt
L.R. Harris and G.R. Barnes
- 549 Eye-Head Coordination in a Case of Congenital Ocular Motor Apraxia: A Clinicopathological Study
T. Uemura, J. Tateishi, T. Kanaseki, and Y. Arai
- 557 Vertical and Horizontal Vestibuloocular Reflex Dynamics Following Unilateral Vestibular Deficit
M. Yamane, J.H.J. Allum, and C.R. Pfaltz
- 565 Eye-Tracking Anomalies Induced by Vertebral Artery Compression in Vertebrobasilar Insufficiency (A Computer-Assisted Study): Correlation with Results of Other Neurophysiological Explorations
E. Vitte, G. Freyss, G. Rancurel, P. Raynaud, P. Pialoux, and A. Zakki
- 571 Histaminergic Projection from the Posterior Hypothalamus to the Medial Vestibular Nucleus of Rats and Its Relation to Motion Sickness
Noriaki Takeda, Masahiro Morita, Takeshi Kubo, Atsushi Yamatodani, Takehiko Watanabe, Masaya Tohyama, Hiroshi Wada, and Toru Matsunaga
- 581 Immunological Analysis of IgG and Other Protein Fractions in Endolymph Obtained from Endolymphatic Sac of Meniere Patients and a Control
Takashi Futaki, Masaaki Yamane, Yasuya Nomura, Akira Shitara, Tsuyoshi Ohta, and Koichiro Hirai
- 591 Virological Evaluation of Cerebrospinal Fluid of Vestibular Neuritis
T. Matsuo, T. Sekitani, Y. Okinaka, T. Hirata, and T. Kido

- 601 Saccular Acoustic Responses in the Guinea Pig Involve Superior Olive but Not Inferior Colliculus
Yves Cazals and Catherine Arousseau
- 607 Transdermal Scopolamine and Vertigo of Peripheral Vestibular Origin
C. Wennmo, J. Bergenius, N.G. Henriksson, D. Hydén, H. Enbom, M. Magnusson, L.M. Ödkvist, I. Pyykkö, U. Rosenhall, L. Schalén, and J. Siegborn
- 613 Comparison of Sensitivity to Active Versus Passive Head Rotation for Neurons in Vestibular Nuclei
S.B. S. Khalsa, D.W.F. Schwarz, and R.D. Tomlinson
- 623 Role of the Nucleus of the Optic Tract in Monkeys in Visually Induced Eye Movements
Isao Kato, Koji Harada, Tomohiko Hasegawa, Takao Igarashi, Yoshio Koike, and Tadashi Kawasaki
- 633 Effect of Unilateral Labyrinthectomy on Neural Activity in the Guinea Pig Vestibular Nuclei
Ian S. Curthoys, Rebecca A. Harris, and Paul F. Smith
- 643 Vestibular and Cochlear Efferent Neurons in the Rat's Brainstem
D.W.F. Schwarz, K. Satoh, I.E. Schwarz, and K. Hu
- Vestibular-Somatosensory Interactions in the Vestibular Nuclei**
- 651 Effect of Vibratory Stimulation of the Neck on the Caloric Nystagmus
Yuzuru Kobayashi, Toshiaki Yagi, Hideyuki Iwasa, and Tomokazu Kamio
- 657 Subject Index
