Preface	ix
Organization	xi
Message from Professor Vinh Danh Le	xiii
Introduction	xv
 <i>Applied mathematics in reliability engineering</i>	
<i>Bayesian methods, Bayesian reliability</i>	
A conjugate prior distribution for Bayesian analysis of the Power-Law Process <i>V.C. Do & E. Gouno</i>	3
Bayesian approach to estimate the mixture of failure rate model <i>R. Briš & T.T. Thach</i>	9
Cost oriented statistical decision problem in acceptance sampling and quality control <i>R. Briš</i>	19
High-dimensional simulation experiments with particle filter and ensemble Kalman filter <i>P. Bui Quang & V.-D. Tran</i>	27
The Prior Probability in classifying two populations by Bayesian method <i>V.V. Tai, C.N. Ha & N.T. Thao</i>	35
 <i>Efficient methods to solve optimization problems</i>	
Estimation of parameters of Rikitake systems by SOMA <i>T.D. Nguyen & T.T.D. Phan</i>	43
Clustering for probability density functions based on Genetic Algorithm <i>V.V. Tai, N.T. Thao & C.N. Ha</i>	51
Optimization of truss structures with reliability-based frequency constraints under uncertainties of loadings and material properties <i>V. Ho-Huu, T. Vo-Duy, T. Nguyen-Thoi & L. Ho-Nhat</i>	59
Optimum revenue calculation method to generate competitive hydroelectric power on Hua Na hydropower <i>P.T.H. Long, L.Q. Hung & P. Dao</i>	67
 <i>Maintenance modelling and optimization</i>	
A dynamic grouping model for the maintenance planning of complex structure systems with consideration of maintenance durations <i>H.C. Vu, A. Barros, M.A. Lundteigen & P. Do</i>	73
A parametric predictive maintenance decision framework considering the system health prognosis accuracy <i>K.T. Huynh, A. Grall & C. Bérenguer</i>	81

Condition-based maintenance by minimax criteria <i>O. Abramov & D. Nazarov</i>	91
Impact of cost uncertainty on periodic replacement policy with budget constraint: Application to water pipe renovation <i>K.T.P. Nguyen, D.T. Tran & B.M. Nguyen</i>	95
<i>Monte Carlo methods for parallel computing of reliability and risk</i>	
Acceleration of multi-factor Merton model Monte Carlo simulation via Importance Sampling and GPU parallelization <i>M. Běreš & R. Briš</i>	107
Highly reliable systems simulation accelerated using CPU and GPU parallel computing <i>S. Domesová & R. Briš</i>	119
<i>Network and wireless network reliability</i>	
Advanced protocol for wireless information and power transfer in full duplex DF relaying networks <i>X.-X. Nguyen, D.-T. Pham, T.-Q. Nguyen & D.-T. Do</i>	133
A performance analysis in energy harvesting full-duplex relay <i>T.N. Kieu, T.N. Hoang, T.-Q.T. Nguyen, H.H. Duy, D.-T. Do & M. Vozňák</i>	139
A stochastic model for performance analysis of powered wireless networks <i>N.D. Ut & D.-T. Do</i>	145
Energy harvesting in amplify-and-forward relaying systems with interference at the relay <i>T.-L. Nguyen & D.-T. Do</i>	153
On a tandem queueing network with breakdowns <i>A. Aissani</i>	159
<i>Risk and hazard analysis</i>	
Risk assessment of biogas plants <i>K. Derychova & A. Bernatik</i>	169
Verification of the design for forced smoke and heat removal from a sports hall <i>P. Kučera & H. Dvorská</i>	177
<i>Stochastic reliability modelling, applications of stochastic processes</i>	
The methods of parametric synthesis on the basis of acceptability region discrete approximation <i>Y. Katueva & D. Nazarov</i>	187
Inference for a one-memory Self-Exciting Point Process <i>E. Gouno & R. Damaj</i>	193
<i>System reliability analysis</i>	
House events matrix for application in shutdown probabilistic safety assessment <i>M. Čepin</i>	201
Imprecise system reliability using the survival signature <i>F.P.A. Coolen, T. Coolen-Maturi, L.J.M. Aslett & G. Walter</i>	207
Parallel algorithms of system availability evaluation <i>M. Kvassay, V. Levashenko & E. Zaitseva</i>	215

Advanced mathematical methods for engineering

Advanced methods to solve partial differential equations

A note on the Cauchy-Riemann equation on a class of convex domains
of finite and infinite type in $\mathbb{C}^2$ 225
L.K. Ha

A review on global and non-global existence of solutions of source types of degenerate
parabolic equations with a singular absorption: Complete quenching phenomenon 231
D.N. Anh, K.H. Van & J.I. Diaz

A spectral decomposition in vector spherical harmonics for Stokes equations 237
M.-P. Tran & T.-N. Nguyen

On convergence result for a finite element scheme of Landau-Lifschitz-Gilbert equation 243
M.-P. Tran

Some results on the viscous Cahn-Hilliard equation in $\mathbb{R}^N$ 249
L.T.T. Bui & N.A. Dao

Inverse problems

On a multi-dimensional initial inverse heat problem with a time-dependent coefficient 255
C.D. Khanh & N.H. Tuan

Advanced numerical methods

A study of Boundary Element Method for 3D homogeneous Helmholtz equation
with Dirichlet boundary condition 271
M.-P. Tran & V.-K. Huynh

A study of stochastic FEM method for porous media flow problem 281
R. Blaheta, M. Běreš & S. Domesová

Parallel resolution of the Schur interface problem using the Conjugate gradient method 291
M.-P. Tran

Statistics and applied statistics

Determining results of the Phadiatop test using logistic regression and contingency
tables based on a patient's anamnesis 303
P. Kuráňová

On the distortion risk measure using copulas 309
S. Ly, U.H. Pham & R. Briš

On the performance of sequential procedures for detecting a change,
and Information Quality (InfoQ) 317
R.S. Kenett

Two-factor hypothesis testing using the Gamma model 327
N. Pal, N.T.T. Tran & M.-P. Tran

Author index 335
