

TABLE OF CONTENTS

Abstract: General Policy Implications	Page	1
I Introduction and Summary of Conclusions		4
Introduction		4
Summary and Conclusions		9
Economic Behavioural Models		9
Empirical Results of Economic Studies Supporting		
Deterrence		11
Data Limitations		12
Statistical Limitations		13
General Conclusions		14
II The Economics of Crime: A Conceptual Framework		16
III Economic Theories of Behaviour		20
Goals		21
Opportunities		23
Expected Effects		26
Values		28
IV Empirical Results of Economic Studies Supporting the Deter-		
rence Hypothesis		31
Increasing the Costs of Illegitimate Opportunities		32
Increasing the Benefits of Legitimate Opportunities		33
The Role of Values		34

V	Data Limitations	37
	Empirical Counterparts of Theoretical Variables	38
	Quality of Available Data	39
VI	Statistical Limitations	42
	Regarding Simplistic Solutions for Complex Problems ..	43
	Continuing Simultaneous Equations Bias	49
	Using Appropriate Estimating Techniques	51
	Stability of Results over Time	51
	Functional Form	53
	Missing Variables	54
	Questionable Hidden Assumptions	56
VII	General Conclusions	57
	Selected Bibliography	59

The Author:

Robert Hann is a principal of Decision Dynamics Corporation and a special lecturer at the Centre of Criminology at the University of Toronto where he is teaching a course on the "Economics of Crime." He has undertaken major studies in the areas of Police Information Systems, Court Management, Correctional Planning and long range demographic forecasting.
