Contributors	xiii
Preface	
<i>N. Chalazonitis and M. Gola</i>	xix

CORTEX

Inhibitory Control of Cortical and Thalamic Neuronal Activities <i>D.A. Prince, D.A. McCormick, and S.M. Thompson</i>	1
Ionic Mechanisms Involved in the Inactivation of Paroxysmal Discharges <i>Rene Pumain, Irene Kurcewicz, and Jacques Louvel</i>	9
Generation and Inactivation of Paroxysmal Neuronal Activity: Involvement of Calcium <i>E.-J. Speckmann and J. Walden</i>	17
Inactivation Mechanisms of Cortical Epileptic Neurons <i>V.M. Okujava</i>	25
An Endogenous Opioid-Like Substance Regulates Neuronal Excitability: Characterization of Its Anticonvulsant Properties <i>Frank C. Tortella and Joseph B. Long</i>	33
Excitability Changes and Long-Term Behavioural Effects of Tetanus Toxin in the Central Nervous System of the Rat <i>J.H. Mellanby and J.G.R. Jefferys</i>	41
Effects of Sustained Seizure Activity on GABAergic Interneurons <i>Brian S. Meldrum, Astrid G. Chapman, Jeanette H. Swan, Ole Petter Ottersen, and Jon Storm-Mathisen</i>	49
Morphine Induces Bursting Activity in Rat Cortical Neurons: An Intracellular Study In Vivo <i>Paolo Stanzione, Paolo Calabresi, Nicola Mercuri, and Giorgio Bernardi.</i> . .	57

viii / Contents

Hypersensitivity to Monoamines in the Neocortex: Electrophysiological and Biochemical Aspects

Tomás A. Reader and André Ferron 63

Two Different GABAergic Abnormalities in Experimental Models of Epilepsy: Too Few or Too Many

Charles E. Ribak 71

HIPPOCAMPUS

Adenosine Depresses Repetitive Firing and Ca^{++} Entry Into Neurons

Peter Schubert 81

Inhibitory Mechanisms in Epileptic Hippocampal Neurons

W. Douglas Knowles 89

Long-Term Neuronal Depression Following Remission From Seizures Induced by Intrahippocampal Tetanus Toxin in Rat

John G.R. Jefferys 97

Structural Requirements for Antagonism of Burst Firing of Rat CA1 Hippocampal Neurones

Martin J. Peet, Kenneth Curry, David S.K. Magnuson, and Hugh McLennan 105

Somatostatin Action in Hippocampus

Quentin J. Pittman and Tim Watson 113

Possible Mediation of Hippocampal IPSP by Two Receptor-Ionophore Complexes

Nobukuni Ogata, Masumi Inoue, and Tadashi Matsuo 121

Spreading Excitation and Depression in Hippocampal Slices: Mechanisms and Modification of Non-Synaptic Synchronization

H.L. Haas 129

Forms of Suppression of Neuronal Function: Leao's Depression, Hypoxia, and Hyperthermia

G.G. Somjen, S.J. Schiff, P.G. Aitken, and M. Balestrino 137

Interactions Among Hippocampal Neurons and Synchronization Leading to Epileptiform Bursts

F. Edward Dudek and Edward P. Christian 147

Cellular Mechanisms of Hypersynchronized Bursts In Vitro

R.D. Traub, R.K.S. Wong, R. Miles, and F.E. Dudek 157

BRAINSTEM

An Inhibitory Pathway From the Diagonal Band of Broca to Supraoptic Nucleus Vasopressinergic Neurons in the Rat

Leo P. Renaud, Jack H. Jhamandas, and John C.R. Randle 163

The Comparative Dynamics of Neurotransmission in Explanted Neuronal Populations: The Tuberohypophyseal and Mesoaccumbens Dopamine Systems <i>M. Duff Davis and Clinton D. Kilts</i>	171
Oxytocin Neurons: Tolerance to Prolonged Morphine Exposure and Hypersecretion Following Withdrawal <i>R.J. Bicknell, G. Leng, and J.A. Russell</i>	187
Inactivation of Bursting in Vasopressin- and Oxytocin-Containing Neurones <i>R. David Andrew</i>	195
Ionic Mechanisms Sustaining Inactivation of Plateau Potentials in Cultured Vasopressin Neurons <i>Pascal Legendre and Jean-Didier Vincent</i>	203
Long-Term Amphetamine Administration: Changes in the Firing Rate of Monoaminergic Neurons and the Release of Ascorbate <i>George V. Rebec</i>	215
The Action of 6-OH-Dopamine on the Striatonigral Cells in the Rat <i>G.W. Arbuthnott, N.K. MacLeod, J.R. Brown, A.K. Wright, A. Rutherford, and A. Ryman</i>	223
Inhibition of Synaptic and Spontaneous Activity Recorded Intracellularly From Dorsolateral Septal Nucleus (DLSN) Neurons in an In Vitro Rat Slice Preparation <i>J.P. Gallagher, D.R. Stevens, M.J. Twery, and P. Shinnick-Gallagher</i>	233
Effects of Inactivation of Locus Coeruleus Neurons on Posture and Vestibulospinal Reflexes <i>Ottavio Pompeiano</i>	241
Inhibition Associated With Acupuncture Analgesia <i>Chifüyü Takeshige</i>	255
SPINAL CORD	
Dorsal Horn Cell Hyperactivity After Peripheral Deafferentation Is Inactivated by Blockade of Corticospinal Influences <i>D. Albe-Fessard, O. Rampin, P. Morain, and P. Sanderson</i>	263
Slow Excitatory and Inhibitory Transmission in the Rat Spinal Dorsal Horn In Vitro and Depressant Effect of Enkephalins <i>Srdija Jeftinija, Laszlo Urban, Ivan Kangrga, Pan Dong Ryu, and Mirjana Randic</i>	271
Glycine Mediates an IPSP in Rat Lateral Horn Neurons <i>Nae J. Dun and Ning Mo</i>	283

x / Contents

Altered Pharmacologic Responsivity of Opioid-Sensitive Dorsal Root Ganglion (DRG) Neurons Rendered Hyperexcitable by Exposure of DRG-Cord Explants to Forskolin or Pertussis Toxin

Stanley M. Crain, Ke-Fei Shen, and Alcmene Chalazonitis 291

Convulsant, Anticonvulsant, and Motor Effects of Opiates in the Spinal Cord

Hanan Frenk and David J. Mayer 303

NERVES AND MODELS

On the Mechanism of Hypersensitivity in Nerve Fibers and Cells

Ichiji Tasaki 311

Hyperexcitability in Injured Peripheral Nerve and Avenues for Its Control

Marshall Devor 321

Endogenous Activity-Dependent Mechanisms for Reducing Hyperexcitability of Axons: Effects of Anesthetics and CO₂

Stephen A. Raymond and Johann G. Thalhammer 331

Differential Use-Dependent (Frequency-Dependent) Effects in Single Mammalian Axons

B.R. Fink and A.M. Cairns 345

Effects of Laser and Magnets Used in Pain Therapy on Excitability of Periodontal Receptors

Noël Mei, Jean Bombin, and Marie-Hélène Michelucci 353

Neural Inhibition Caused by an Aromatic Amino Acid Derivative, N- β -Phenylpropionyl-L-tyrosine, and Its Related Compounds

Hiroshi Takeuchi, Kozo Funase, and Yasuo Ariyoshi 357

Some Notes on Hyperactive Neurons

R. Gaffinel and N. Chalazonitis 365

Long Lasting Hyperpolarizations in Hyperactive Neurons

R. Chagneux and N. Chalazonitis 369

Long and Excessive Depolarizations Elicited by Transmembrane Electroshocks

C. Ducreux and N. Chalazonitis 373

MOLECULAR AND IONIC EVENTS

Calcium Interactions With Potassium Currents May Limit or Sustain Repetitive Firing

Maurice Gola 379

The Possible Role of the Inward Current I_Q in <i>Aplysia</i> Neurons in Triggering the Generation of Bistable State PDS Potentials in Calcium-Free Cobalt Solutions <i>Manfred R. Klee</i>	391
Calcium Conductance in Invertebrate Neurons: Effects of Organic Calcium Antagonists and Agonists <i>J. Walden and E.-J. Speckmann</i>	399
Single Ion Channel Activity in Peptidergic Nerve Terminals of the Isolated Rat Neurohypophysis Related to Stimulation of Neural Stalk Axons <i>W.T. Mason and R.E.J. Dyball</i>	407
Current- and Voltage-Clamp Studies of Transient and Pacemaker Currents in Neurosecretory Neurons of the Supraoptic Nucleus <i>Charles W. Bourque</i>	415
Stabilization of Sodium Channels by CNS Active Drugs: Application of the Guarded Receptor Hypothesis to Carbamazepine <i>Kenneth R. Courtney</i>	423
Concluding Remarks <i>N. Chalazonitis and Maurice Gola</i>	431
Index	435
