Introduction: People and clouds	1
1 Clouds	6
2 No cloud is like any other	15
3 How a cloud forms	42
<i>Clouds and weather fronts</i>	44
<i>Clouds, lakes, seas, and mountains</i>	46
<i>Amarcord and fond memories of fog</i>	49
<i>The majestic thunderstorm</i>	51
<i>Large and very large thunderstorms</i>	58
<i>Have you ever been inside a tropical cyclone?</i>	59
<i>'Hurricanes' in the Mediterranean</i>	66
<i>Some more 'ordinary' cyclones</i>	68
<i>Clouds almost nobody has ever heard of</i>	70
4 Journey among the hydrometeors	75
<i>Hydrometeors</i>	75
<i>Aerosols and condensation</i>	77
<i>Droplets</i>	81
<i>The temperature falls, but by how much?</i>	85
<i>Ice crystals, nature's masterpiece</i>	89
<i>The many faces of atmospheric ice</i>	92
<i>Hail, at last!</i>	95
5 When it's raining, let it rain	98
<i>Warm clouds: has someone left the heater on?</i>	99

<i>Cold clouds, brrr!</i>	101
<i>There isn't just rain up there</i>	105
<i>Ice, treacherous ice, fraught with danger</i>	107
<i>How hailstones grow</i>	108
<i>One cloud rains, the other doesn't</i>	111
<i>Lightning</i>	112
<i>There's something strange up there</i>	116
6 Inside clouds	118
7 Meteorology and clouds	146
8 Changing climate, changing clouds?	157
Epilogue: Measuring the sky	167
<i>Acknowledgements</i>	169
<i>A cloudspotters' glossary</i>	171
<i>Abbreviations and acronyms</i>	177
<i>Illustrations</i>	180
<i>Online sources</i>	185
<i>Bibliography</i>	187
