

CONTENTS

Part I	Contextual and Theoretical Perspectives	1
1	Communicating SDGs in the Era of AI Economy: Towards an AI-Sustainability Exclusion Theory	3
	Muhammad Jameel Yusha'u	
2	The Geopolitics of AI and the SDGs: Development as Digital Dependency?	63
	Boris Houenou	
3	Can Artificial Intelligence and Communication Research Catalyse Sustainable Development? A Global Analysis of Research Topics Based on InCites and OSDG Classifications	93
	Pablo Sánchez-Núñez and Núria Bautista-Puig	
Part II	Greenwashing, Ethics, and Governance of AI in Sustainable Development	125
4	AI and Offshore Wind Energy: Discourses of Technology, Environment, and Activism	127
	Alison Novak	

5	Greenwashed Intelligence? Strategic Communication and the Rhetorical Politics of AI in Sustainable Development	149
	Tymoteusz Chajdas	
6	First Nations Sovereign Communication and the Risk of AI and Colonial Norms in the SDGs	173
	Holly Randell-Moon, Jessica Russ-Smith, and Nick Ruddell	
Part III	AI, Communication, Awareness and the Information Ecosystem	195
7	Digital Democracy and SDGs: Artificial Intelligence as a Tool for Participation, Awareness, and Risks of Algorithmic Disinformation	197
	Daniele Battista	
8	AI and Media Sustainability: Media Education and Egyptian Students' Perceptions of AI Impact on the Evolving Job Market	217
	Alamira Samah Saleh and Mahmoud Zaky Abdel-Emam	
9	From Division to Dialogue: AI-Mediated Peacebuilding in Turkey's Digital Conflict Narratives	251
	Sarphan Uzunoğlu	
10	Generative AI and Misinformation: Designing Educational Simulations as a Tool for Epistemic Resilience	273
	Martin Richter	
11	The Need for Non-Polarizing Communication to Attain Sustainable Development Goal 16	301
	Jude William Genilo and Kamolrat Intaratat	
12	Synthetic Truths and Sustainable Goals: AI's Epistemic Authority and the Commodification of Credibility in News	325
	Julia Belmiro	

Part IV	Regional Applications, Stakeholder Mobilization and Sectoral Implementations of AI for SDGs	351
13	Framing AI and SDGs Relationship: A Comparative Media Study Across Five European Countries Alberto E. López-Carrión	353
14	AI Predictive Analytics and “Green” Software Development to Enhance Sustainability in Lebanon Ramzi A. Haraty, Hadi Al Hassan, Alexander Fedak-Lengel, and Lara Martin Lengel	371
15	Communicating SDGs in the Age of Artificial Intelligence: A UX-Centered and AI-Driven Approach to Reducing Digital Inequalities in Puerto Rico Ramtin Ranjpour and Renee Mitson	399
16	SDG Stakeholder Mobilization in the Age of Artificial Intelligence Amukelani Charmaine Matsilele	425
17	Human-AI Communication for a Just Climate Transition Mary Lynn De Silva and Bradley Todd Hiller	441
18	Gender Equity and Sustainable Development Goals: AI for Mitigating Gender-Based Violence Satarupa Dasgupta, Ishani Mukherjee, Maggie Griffith Williams, and Jayita Chakraborty	469
Part V	Conclusion	493
19	AI’ Exciting Future, Uncertain Outcomes Muhammad Jameel Yusha’u	495
