Contributors	ix
Preface	
<i>N.W. Milgram, Colin M. MacLeod, and Ted L. Petit</i>	xi
Neuroplasticity, Learning, and Memory	
<i>N.W. Milgram, Colin M. MacLeod, and Ted L. Petit</i>	1
Persistent Conditioning-Specific Changes of Post-Synaptic Membrane Currents in <i>Hermisenda</i> and Hippocampus	
<i>D.A. Coulter, J.F. Disterhoft, B. Bank, and D.L. Alkon</i>	17
Memory, Aluminum, and Alzheimer's Disease	
<i>Donald R. Crapper McLachlan, P.H. St. George-Hyslop, and B.J. Farnell</i>	45
Mechanisms of Synaptic Plasticity	
<i>Eva Fífková</i>	61
The Cellular Basis of Learning and Memory: The Anatomical Sequel to Neuronal Use	
<i>Ted L. Petit and Etan J. Markus</i>	87
A Proteinase Inhibitor Model of Aging: Implications for Decreased Neuronal Plasticity	
<i>Gwen O. Ivy</i>	125
Identification of an Essential Memory Trace Circuit in the Mammalian Brain	
<i>Richard F. Thompson</i>	151
Long-Term Potentiation Phenomena: The Search for the Mechanisms Underlying Memory Storage Processes	
<i>Ronald J. Racine and Edward W. Kairiss</i>	173
Neural Correlates of Conditioning Assessed by Extracellular Unit Recording: Implications for Neuroplasticity	
<i>Earl Thomas and Elna Yadin</i>	199
The Neuroanatomy of Learning and Memory in the Rat	
<i>Robert Thompson and Jen Yu</i>	231

viii / Contents

Neural Grafts in the Study of Brain Plasticity
Menahem Segal 265

Dissociable Forms of Memory in College Students, Elderly Individuals,
and Patients with Anterograde Amnesia: Implications From Research
on Direct Priming
Peter Graf 279

Site Fragility Theory of Chunking and Consolidation in a Distributed
Associative Memory
Wayne A. Wickelgren 301

Index 327
