

PART 1 Introduction to Radiography

- 1 Introduction to Radiography, 1
- 2 Image Quality Factors, 21
- 3 Radiation Effects and Radiation Safety, 34
- 4 The Healthcare Delivery System, 46
- 5 Professional Roles and Behaviors, 62

PART 2 Patient Care

- 6 Professional Attitudes and Communications, 87
- 7 Safety, 118
- 8 Patient Transfer, 131
- 9 Infection Control Concepts, 145
- 10 Preventing Disease Transmission, 158
- 11 Surgical Asepsis, 190
- 12 Response to Patients' Personal and Physical Needs, 210
- 13 Patient Assessment, 228
- 14 Medication Information, 253
- 15 Medication Administration, 268
- 16 Emergency Response, 296

PART 3 Patient Care in Specific Procedures and Environments

- 17 Dealing With Acute Situations, 312
- 18 Preparation and Examination of the Gastrointestinal Tract, 333
- 19 Contrast Media and Special Radiographic Techniques, 357
- 20 Bedside Radiography: Special Conditions and Environments, 380
- 21 Radiography in Surgery, 400
- 22 Special Imaging Modalities, 415

Answer Key, 448

Bibliography, 452

Appendix A Informed Consent Form, 455

Appendix B Accepted Abbreviations and Descriptive Terms Used in Charting, 456

Appendix C Incident Report Form, 461

Appendix D Abbreviated List of Useful Clinical Phrases in Spanish, 463

Appendix E Radiology Department Infection Control Procedures, 465

Appendix F Infection Control Guidelines, 467

Appendix G Urine Collection, 471

Appendix H Iodinated Contrast Media Products for Radiography, 472

Appendix I Catheterization Technique, 476

Glossary, 480

Index, 504

OBJECTIVES

At the conclusion of this chapter, the student will be able to:

- Summarize the evolution of radiography and radiography education.
- Describe the process and science behind the production of radiographs.

KEY TERMS

anode
cathode
collimation
conduction
contrast
copper
copper target

detent
electromagnetic energy
electron stream
filament
fluoresce
fluoroscope
