About this Workbook

How to use example-problem pairs

4

5

Chapter 1: Place value

1.1 Place value in integers	6
1.2 Place value in decimals	9
1.3 Ordering and comparing numbers	15
1.4 Measures	17

Chapter 2: Properties of numbers

2.1 Multiples	21
2.2 Powers and roots	23
2.3 Factors and prime factorization	27

Chapter 3: Arithmetic

3.1 Adding and subtracting with negative integers	34
3.2 Multiplying and dividing with negative integers	40
3.3 Adding and subtracting decimals	43
3.4 Multiplying and dividing decimals	47
3.5 Efficient calculations	51

Chapter 4: Expressions and equations

4.1 Introduction to algebra	57
4.2 Formulae and equations	63
4.3 Simplifying expressions	67
4.4 Using the distributive law	70

Chapter 5: Coordinates

5.1 Plotting coordinates	76
5.2 Coordinates, formulae and graphs	83

Chapter 6: Perimeter and area

6.1 Properties of triangles and quadrilaterals	88
6.2 Perimeter	91
6.3 Area	95

Chapter 7: Fractions

7.1 Working with fractions and decimals	100
7.2 Comparing and ordering fractions	104
7.3 Adding and subtracting fractions	107
7.4 Multiplying and dividing fractions	110

Chapter 8: Ratio and proportion

8.1 Multiplicative relationships	115
8.2 Representing multiplicative relationships	120
8.3 Fractions in context	125
8.4 Applying ratios	129

Chapter 9: Transformations

9.1 Translations	136
9.2 Rotations	142
9.3 Reflections	150
9.4 Scale diagrams	157
9.5 Enlargements	161
