Chapter 1

INTRODUCTION 1

- 1.1 Overview, Purpose, and Structure of the Book 1
- 1.2 Construction Industry and Its Current State of Inefficiency 3
- 1.3 Productivity Booster and Opportunities for Improvement 4
- 1.4 Significant Role of CSCI in Construction Productivity 5
- 1.5 Role of BIM in Enhancing Supply Chain Integration and Boosting Productivity 6
- 1.6 Construction Supply Chain Integration 8
- 1.7 Main Research Areas of CSCI 9
- 1.8 Discussion and Conclusion 11

Chapter 2

BACKGROUND OF CONSTRUCTION SUPPLY CHAIN MANAGEMENT, PROBLEMS, AND A FRAMEWORK OF POTENTIAL SOLUTIONS 19

- 2.1 Construction Supply Chain Management: Definition and Significance 20
- 2.2 Construction Supply Chain Issues: Broken Supply Chain of Data, Products, and Money 20
- 2.3 Solution for Seamless Flow of Data, Products, and Money 22
- 2.4 BIM Addressing Supply Chain Challenges 52
- 2.5 Future Vision: A Framework for Integrated Supply Chain Empowered by Emerging Technologies, like Blockchain, IoT, GIS 54
- 2.6 Discussion and Conclusion 56

Chapter 3

5D BIM CURRENT STATE OF ART AND PRACTICE 61

- 3.1 Applicable Industry Standards for 5D BIM 61
- 3.2 Key Resources and Collaborative Implementation 69
- 3.3 Integrated Benefits of 5D BIM 71
- 3.4 5D BIM State of the Practice: Study of Three 5D BIM Tools 73
- 3.5 Pathways to Full Automation in 5D BIM 80
- 3.6 Discussion and Conclusion 81

Chapter 4

LIFE CYCLE IMPLEMENTATION OF 5D BUILDING INFORMATION MODELING 85

- 4.1 Introduction 85
- 4.2 5D BIM Cost Estimation During Preconstruction 86
- 4.3 5D BIM Cost Control During Construction and Manufacturing 87
- 4.4 5D BIM As-Built Cost Data Recording Post-Construction 87
- 4.5 Implementation Guidelines for 5D BIM 88
- 4.6 Data Collection Methodology 90
- 4.7 Case Studies 92
- 4.8 Findings and Discussions 114
- 4.A Survey on the State of the Art and Practice of 5D BIM and Its Value Proposition 119

Chapter 5

CASE STUDIES FOR IMPLEMENTING 5D BIM 123

- 5.1 A Campus Center Case Study 123
- 5.2 Overview of Adopted BIM Software 124
- 5.3 BIM Model Development 125
- 5.4 Quantities Extraction 128
- 5.5 Cost Adjustments and Quality Control 130
- 5.6 Pay Applications 130
- 5.7 Evaluation of software 131
- 5.8 Challenges and Benefits 132
- 5.9 Findings and Lessons Learned 134

5.10	Project Overview	136
5.11	Project Location	137
5.12	BIM Design for Project	139
5.13	Overview of Adopted BIM Software	140
5.14	BIM Model Development	141
5.15	Quantities Extraction	146
5.16	Adjustments and Quality Control	148
5.17	Pay Applications	149
5.18	Evaluation of Software	150
5.19	Challenges and Benefits	151

Chapter 6

VALUE PROPOSITION OF 5D BIM		153
6.1	Summary	153
6.2	Introduction	154
6.3	Value Proposition of 5D BIM to Project Stakeholders	154
6.4	Value Proposition of 5D BIM in Supply Chain Integration	156
6.5	Case Studies Highlighting the Value Proposition of 5D BIM	158
6.6	Conclusion	162

Chapter 7

BLOCKCHAIN-ENABLED 5D BIM FOR CASH FLOW AND DATA SHARING		165
7.1	Leveraging Blockchain and Smart Contracts to Solve Payment Delays	165
7.2	Blockchain-Enabled Smart Contracts Integrated with 5D BIM	170
7.3	Blockchain for Secure BIM Data Sharing	175
7.4	Applications and Real-World Implementations	180
7.5	Discussion and Conclusion	183

Chapter 8

CONCLUSION ON INTEGRATED COST MANAGEMENT WITH 5D BIM		189
8.1	Integration and Automation of Cost Management in 5D BIM: Practices, Technologies, and Future Directions	189
8.2	Discussion and Conclusion	193

Index	199
