

Contents

Part I Change Point Analysis

1	On Epidemic Change Point Detection Under Strong Mixing Conditions	3
	István Berkes and Siegfried Hörmann	
2	Change Point Analysis for Polynomial Trends in Functional Time Series	21
	Rohit Gajendragadkar and Gregory Rice	
3	A Model-Free Test of the Time-Reversibility of Climate Change Processes	45
	Yuichi Goto and Marc Hallin	
4	Detecting Changes in the Regression Parameter of AR(1) and RCA(1) Processes with Changing Errors	59
	Lajos Horváth	
5	Behavior of Pešta-Wendler Estimate of Change Point	83
	Daniela Jarušková	
6	Structural Break Tests in Dependent Functional Linear Models ...	97
	Tianke Li and Alexander Aue	
7	On the Use of U-statistics in Change Point Testing	121
	Claudia Kirch and Martin Wendler	
8	Changepoint in Panel Data: CUSUM Statistics Under Different Asymptotics	153
	Matúš Maciak	
9	SVD-Bootstrap for Detection of Tensor Changes	173
	Barbora Peštová, Michal Pešta, and Martin Romaňák	
10	Detection Changes in a Linear Dynamic Panel Data Model	197
	Zuzana Prášková	

11 A Weighted Regression Approach to Break-Point Detection in Panel Data	217
Charl Pretorius and Heinrich Roodt	
12 A Change or Not a Change—A Review on Some Joint Work with Marie Hušková	241
Josef G. Steinebach	
13 Some Non-asymptotic Rank Tests for Change Points in Regression	257
Silvelyn Zwanzig and Rauf Ahmad	

Part II Goodness-of-fit Testing

14 Specification Tests for the Error–Law in Vector Multiplicative Errors Models	277
Šárka Hudecová and Simos G. Meintanis	
15 Mahalanobis Distance and General Linear Hypotheses in Linear Models	297
Paul Janssen, Luc Duchateau, and Noël Veraverbeke	
16 Goodness-of-Fit Testing for the Error Distribution in Functional Linear Models	317
Natalie Neumeyer and Leonie Selk	

Part III Nonparametric Statistics

17 Cartesian Statistics on Spheres	345
Rudolf Beran	
18 Diagnostic Tools for Exploring Differences in Distributional Properties Between Two Samples: Nonparametric Approach	357
Bogdan Ćmiel and Teresa Ledwina	
19 Nonparametric Error Variance Estimation in Regression: A Review	381
Irène Gijbels	
20 Outliers and Related Problems	403
Lev B. Klebanov, Jaromír Antoch, and Ashot V. Kakosyan	
21 Maximum Likelihood Estimation of a General Mixing Distribution: Variations on Parametric Domains	419
Ivan Mizera	
22 New Asymptotic Results for Bernstein Estimators for Conditional Copulas	431
Noël Veraverbeke
