Published by the Royal Society of Chemistry, www.rsc.org

3	Early Transition Metals	24
3.1	Introduction	24
3.2	Yttrium	24
3.3	Scandium	26
3.4	Titanium	27
3.4.1	Titanium as a Metal or Alloy	28
3.4.2	Titanium Dioxide	29
3.4.3	Recycling	30
3.5	Zirconium	30
3.5.1	Zircon	30
3.5.2	Recycling	31
3.6	Hafnium	31
3.7	Vanadium	32
3.7.1	Recycling	32
3.8	Niobium	32
3.8.1	Uses of Niobium	33
3.8.2	Niobium Recycling	33
3.9	Tantalum	34
3.9.1	Recycling	34
	References	34

4	Mid-transition Metals	36
4.1	Introduction	36
4.2	Iron	36
4.2.1	Recycling	37
4.2.2	Beyond Iron: Steels	37
4.2.3	Low-iron Alloys	38
4.3	Chromium	39
4.3.1	Sources	39
4.3.2	Recycling	40
4.4	Manganese	40
4.4.1	Recycling	40
4.5	Cobalt	41
4.5.1	Cobalt Uses	41
4.5.2	Recycling	41
4.6	Molybdenum	41
4.7	Technetium	42
4.7.1	Recycling	42
4.8	Tungsten	42
4.8.1	Recycling	43

4.9	Rhenium	43
4.10	Platinum Group Metals (PGMs)	44
4.10.1	Recycling	44
	References	45

5 Late Transition Metals 47

5.1	Introduction	47
5.2	Metals Known since Ancient Times – Copper, Silver, Gold	47
5.2.1	Copper	48
5.2.2	Silver	51
5.2.3	Gold	53
5.3	Nickel	55
5.3.1	Recycling	55
5.4	Zinc	56
5.4.1	Uses	57
5.4.2	Recycling	57
5.5	Cadmium	58
5.5.1	Recycling	58
5.6	Mercury	58
5.6.1	Ease of Use of Mercury	59
5.6.2	Determine Where to Store Existing, Refined Mercury	59
5.6.3	Recycling	60
	References	60

6 Post-transition Elements 61

6.1	Introduction	61
6.2	Boron	62
6.2.1	Uses	62
6.2.2	Recycling	63
6.3	Aluminum	63
6.3.1	Uses	64
6.3.2	Recycling	64
6.4	Gallium	65
6.4.1	Recycling	65
6.5	Indium and Thallium	65
6.5.1	Indium	65
6.5.2	Thallium	66

6.6	Silicon	67
6.6.1	Uses	67
6.6.2	Recycling	67
6.7	Germanium	67
6.7.1	Uses	68
6.7.2	Recycling	68
6.8	Tin	68
6.8.1	Uses	68
6.8.2	Recycling	69
6.9	Lead	69
6.9.1	Uses	69
6.9.2	Recycling	69
6.10	Phosphorus	70
6.10.1	Uses	70
6.10.2	Recycling	70
6.11	Arsenic	70
6.11.1	Uses	70
6.11.2	Recycling	71
6.12	Antimony and Bismuth	71
6.12.1	Antimony	71
6.12.2	Bismuth	72
6.13	Sulfur	73
6.13.1	Uses	73
6.13.2	Recycling	74
6.14	Selenium and Tellurium	74
6.14.1	Uses	74
6.14.2	Recycling	74
6.15	Fluorine	74
6.15.1	Uses	75
6.15.2	Recycling	75
6.16	Chlorine	75
6.16.1	Uses	76
6.16.2	Recycling	76
6.17	Bromine	76
6.17.1	Refining	77
6.17.2	Uses	77
6.17.3	Recycling	77
6.18	Iodine	77
6.18.1	Uses	77
6.18.2	Recycling	77
	References	78

7	Lanthanides	79
7.1	Introduction	79
7.2	REE Separations	80
7.3	Uses, Early Lanthanides	81
7.3.1	Cerium	81
7.3.2	Praseodymium	82
7.3.3	Neodymium	82
7.4	Uses, Late Lanthanides	82
7.5	Recycling	83
	References	84

8	Actinides	85
8.1	Introduction	85
8.2	Uranium	86
8.2.1	Uranium Recycling	88
8.2.2	Uses of Depleted Uranium	89
8.3	Thorium	90
8.3.1	Small-scale Uses of Thorium	91
8.3.2	Thorium for Nuclear Power	91
8.4	Americium	92
8.4.1	Americium Production	92
8.5	Actinide Recycling	93
	References	93

9	Helium	95
9.1	Introduction	95
9.2	Helium-4	95
9.3	Helium-3	96
9.4	Uses	97
9.5	Recycling	97
	References	99

10.1	Introduction	100
10.2	Recycling Possibilities	100
10.3	Potential Possibilities for Recycling	102
	References	103

Actinides

8.1	Introduction	107
8.2	Uranium	107
8.2.1	Uranium Recycling	107
8.2.2	Uses of Depleted Uranium	107
8.3	Thorium	107
8.3.1	Small-scale Uses of Thorium	107
8.3.2	Thorium for Nuclear Power	107
8.4	Americium	107
8.4.1	Americium Production	107
8.5	Actinide Recycling	107
	References	107

Helium

9.1	Introduction	107
9.2	Helium-1	107
9.3	Helium-2	107
9.4	Uses	107
9.5	Recycling	107
	References	107
