

Contents

1. Pathology and Neuropathology in the Forensic Setting 1
Jan E. Leestma and David J. Magee
The Mission of the Forensic Pathologist • Issues for the Neuropathologist in the Forensic Setting • Implications of Having Given Testimony for the Neuropathologist • References
2. Forensic Aspects of General Neuropathology 24
Intracranial Pathology as a Cause of Death • Vascular Diseases of the Nervous System • Tumors of the Nervous System • The Phacomatoses • Infections of the Nervous System • Degenerative Diseases of the Nervous System • Diseases of White Matter and Myelin • Diseases of Peripheral Nerve • Diseases of Skeletal Muscle • References
3. Brain Swelling and Intracranial Pressure Effects 157
Cerebral Edema • Brain Herniation and Mass Effects • Brain Death and the “Respirator” Brain • Acquired Hydrocephalus • References
4. Impact Injuries to the Brain and Head 184
With contributions by Nenad Grčević
Concepts of Head Trauma • Cranial Anatomical and Pathological Relationships • Traumatic Injuries to the Brain • Consequences of Brain Trauma • Neuropathological Consequences of Boxing • References
5. Impact Injuries of the Spine and Spinal Cord 254
J. Douglas Balentine
Clinical and Neuroanatomic Considerations • Mechanisms of Spinal Column and Spinal Cord Injuries • Pathology of Spinal Cord Trauma • Pathogenesis of Cell Injury Provoked by Spinal Cord Trauma • References

6.	Gunshots and Other Penetrating Wounds of the Central Nervous System <i>Joel B. Kirkpatrick</i> Missile Ballistics • Wounds in the Civilian Population • Long-Term Complications of Gunshot Wounds to the Brain • Blast Injuries • Gunshot Wounds of the Spinal Cord • Stab Wounds • Summary • References	
7.	Neuropathology of the Intrauterine and Perinatal Periods Timetable of Brain Development • Pathologic Reactions of the Developing Brain • Autopsy Examination of the Infant Nervous System • CNS Malformations • Hydrocephalus • Hypoxia and Ischemic Lesions • Infections in the Perinatal Period • Forensic Implications of Neuropathological Analysis in Congenital Lesions • Perinatal Trauma • Brain Neoplasms • Sudden Infant Death Syndrome • Fetal Alcohol Syndrome • References	300
8.	Neuropathology of Child Abuse Historical Considerations • General Pathology of Child Abuse • Neuropathological Examination in Child Abuse Cases • Interpretation of Head Injuries in Infants and Children • "Growing" Skull Fracture and Leptomenigeal Cyst • Epidural Hemorrhage • Nontraumatic Forms of Child Abuse • The Neuropathologist in Court Re: Child Abuse • References	333
9.	Forensic Aspects of Neurotoxicology Classification of Toxic Conditions • Structural and Functional Effects of Toxic Agents on the Central Nervous System • Elemental and Simple Chemical Toxins • Neurotoxicology of Solvents and Other Industrial Organic Compounds • Neurotoxicology of Selected Drugs and Chemotherapeutic Agents • Carbon Monoxide Intoxication • Oxygen Toxicity • References	357
10.	Forensic Aspects of Complex Neural Dysfunctions Epilepsy and Seizure Disorders • Cognitive Disorders and Dementia • Perceptual Disorders • Alterations in Consciousness: Stupor and Coma • References	396
