

Contents

Introduction

1. Overview of AIDS and the Nervous System 1
Mark L. Rosenblum, Robert M. Levy, and Dale E. Bredesen
2. Neuroepidemiology of Acquired Immunodeficiency Syndrome 13
Robert M. Levy, Robert S. Janssen, Timothy J. Bush, and Mark L. Rosenblum

Clinical Neurological Syndromes and Diagnosis

3. Central Nervous System Dysfunction in Acquired Immunodeficiency Syndrome 29
Robert M. Levy and Dale E. Bredesen
4. Peripheral Nervous System Dysfunction in Acquired Immunodeficiency Syndrome 65
Robert G. Miller, Dobri D. Kiprof, Gareth Parry, and Dale E. Bredesen
5. Neurology of Human Immunodeficiency Virus Infection in Children 79
Leon G. Epstein and Leroy R. Sharer
6. Neuroophthalmology of Acquired Immunodeficiency Syndrome 103
Gary N. Holland and Alan E. Kreiger
7. Neuroradiology of Acquired Immunodeficiency Syndrome 121
Robert De La Paz and Dieter Enzmann
8. Neuropathology of Acquired Immunodeficiency Syndrome 155
Surl L. Nielsen and Richard L. Davis

Diseases Affecting the Nervous System: Prognosis and Therapy

9. Primary Infection with Human Immunodeficiency Virus 183
Justin C. McArthur and Richard T. Johnson
10. The AIDS Dementia Complex 203
Richard W. Price, John J. Sidtis, Bradford A. Navia, Thomas Pumarola-Sune, and Donna B. Ornitz
11. Opportunistic Viral Infections in Acquired Immunodeficiency Syndrome 221
Richard D. Dix and Dale E. Bredesen

12. Nonviral Infections of the Central Nervous System in Patients with Acquired Immunodeficiency Syndrome 263
Vincent G. Pons, Richard A. Jacobs, and Harry Hollander
13. Neoplasms of the Central Nervous System in Acquired Immunodeficiency Syndrome 285
Yuen Tat So, Ali Choucair, Richard L. Davis, William M. Wara, John L. Ziegler, Glenn E. Sheline, and Jay H. Beckstead

Patient Care Issues

14. Human Immunodeficiency Virus: Hospital Epidemiology Infection Control Precautions 301
John E. Conte, Jr.
15. Neuropsychiatric Aspects of Acquired Immunodeficiency Syndrome 315
Herbert N. Ochitill and James W. Dilley

Research

16. The Biology of the Human Immunodeficiency Virus and Its Role in Neurological Disease 327
Jay A. Levy
17. Neuroimmunology of Human Immunodeficiency Virus Infection 347
Sidney A. Houff
18. Implications of Acquired Immunodeficiency Syndrome for Neurological Pathophysiology 377
Dale E. Bredesen

Conclusion

19. Algorithms for the Treatment of AIDS Patients with Neurological Disease 389
Mark L. Rosenblum, Dale E. Bredesen, and Robert M. Levy
- Subject Index 397
