

CONTENTS

Operating experience with power shift epicyclic transmissions on public service vehicles, by D. A. Cox	1
The use of automatic and semi-automatic gearboxes in maximum weight articulated vehicles engaged in short haul work, by M. K. Filsell	9
Maintenance experience with automatic and semi-automatic gearboxes fitted to aircraft ground handling equipment, by R. Hatfield	19
The influence of a continuously-variable gearbox on the design of commercial vehicle propulsion systems, by H. Hagen	29
Automatic transmissions for commercial and public service vehicles, by R. M. Tuck and R. Smith	35
Saab-Scania development of automatic gearboxes, by P.A.O. Beijer, H. Edgar, and J. Elander	49
A novel approach to the testing of integrated engine-transmission systems, by D. E. Bowns, F. J. Wallace, F. A. Lynn, R. J. B. Way, and P. H. Prest	55
Problems appertaining to the installation of automatic transmissions as regular production options into truck manufacturer's production lines (N_2 and N_3 category units), by W. Manning	67
Fiat's hydromechanical transmission for heavy trucks, by G. Corsini	71
Hydrodynamic automatic transmissions with retarder in city buses and coaches, by M. Musselmann	79
Performance requirements and design criteria for semi- and fully-automatic transmissions for commercial vehicles, by G. Lechner and W. Kuhn	89
Hydrostatic transmissions and city vehicles, by S. U. Cunningham, D. Jackson and D. C. McGillivray	97
Passengar car background knowledge in automatic and semi-automatic transmissions, by F. Shaw, K. Barlow, and J. S. Ebrey	109
Mercedes-Benz automatic transmissions for commercial vehicles, by H. J. Förster	113
Layshaft gearboxes in semi- and fully-automatic form, by T. R. Radcliffe and E. A. Richards	127
An improved automatic system for control of routine gear box and clutch operations in vehicles, by J-P. Sibeud	141
A universal gearbox development test rig, by K. M. Bishop	149
The development of control systems and their requirements, by K. E. Lea and F. Burnett	159
Development of a special transmission lubricant for semi-automatic gearboxes, by C. K. Prins and N. G. Goodall	165
