xxxvii Introduction

Ischemia

DEFINING ISCHEMIA THRESHOLDS

- 1 Aspects of Cerebral Ischemia in Humans: Clinical Correlates of Primate Thresholds
L. Symon, A. Wang, and F. Momma
- 5 The Magnitude and Duration of Arterial Blood Pressure Critical for the Development of Regional Brain Infarcts in the Rat: Electroencephalographic Investigations
R. Laas, B. Jahn, K. Kessler, and J. Sievers
- 13 Hemodynamic Studies in Moyamoya Disease by Measurement of Cortical Artery Pressure and Anastomotic Blood Flow During STA-MCA Anastomosis
T. Shima, Y. Okada, S. Matsumura, M. Nishida, T. Yamada, and S. Okita

EARLY ISCHEMIC LESIONS

- 19 Application of Morphometry to the Study of Brain Ischemia
K. A. Conger, J. H. Garcia, J. H. Halsey, H. P. Moraes, F. M. G. Hobbs, and T. A. S. Wilson
- 27 Differences in Mitochondrial Content and Cytochrome Oxidase Activity Between Pericytes and Endothelial Cells of Rat Brain Capillaries
T. Bär
- 35 Enzymehistochemical Investigation of the Pathogenesis of Ischemic Brain Lesions in Primates and Its Clinical Consequences
W. Meier-Ruge, D. Theodore, and J. Abraham

ISCHEMIA VERSUS HYPOXIA

- 39 Direct Effect of Oxygen Deprivation on Morphological Structure of the CNS Cultures
K. Renkawek

- 45 Morphometrical and Ultrastructural Study of Intracerebral Arterioles in Chronic Hypoxia
F. Cruz-Sanchez, J. Cervós-Navarro, C. Aruffo, S. Sampaolo, and R. Ferszt
- 51 The Effect of Hypoxia on the Electro-Mechanical Properties of the Canine Carotid Artery
J. Grote, G. Siegel, A. Adler, K. Zimmer, and R. Müller

FACTORS MODIFYING ISCHEMIC LESIONS

Rheology

- 57 Pulsatile and Nonpulsatile Blood Flow During Acute Cerebral Ischemia
B. I. Tranmer, C. E. Gross, G. W. Kindt, and G. R. Adey
- 63 Microcirculatory Disturbances in Brain Cortex During Postischemic Edema
G. Mchedlishvili, M. Varazashvili, and N. Sikharulidze
- 69 Microthrombi in the Development of Ischemic Irreversible Brain Infarct
J. Figols, J. Cervós-Navarro, S. Sampaolo, and R. Ferszt
- 75 Microvascular Obstruction in Cerebral Contusion: A Secondary Phenomenon Causing Neurovascular Damage
J. Hekmatpanah

Glycemia

- 83 Stroke Outcome: Effects of Release of Cerebrovascular Occlusion and Level of Glycemia
G. M. de Courten-Myers, L. Schoolfield, and R. E. Myers

Hypertension

- 95 Systemic Blood Pressure Modifies Postischemic Cerebral Blood Flow
N. V. Todd, P. Picozzi, and H. A. Crockard
- 101 Histopathological Findings of Focal Cerebral Ischemia in Normotensive and Spontaneously Hypertensive Rats Produced by Silicone Cylinder Embolization
Y. Okada, T. Shima, K. Ohta, T. Takeda, and T. Uozumi

- 107 Calcium-Activated Adenosine Triphosphatase (Ca^{2+} -ATPase) in Cerebral Endothelium in Acute Hypertension
S. Nag
- 111 Angiotensin I-Converting Enzyme (ACE): A Marker for Vascular Endothelium
R. J. Seitz, E. Neuen, M. Henrich, J. Schrader, and W. Wechsler
- 117 Pentoxifylline Reduces Cerebral Blood Flow in Normal and Ischemic Brain in Conscious Hypertensive Rats
B. B. Johansson
- 123 Characterization of Intimal Smooth Muscle Cells in Intracerebral Arterioles and Arteries
W. Roggendorf, R. Schrempf, H. Opitz, and J. Cervós-Navarro

Prostaglandins

- 129 Eicosanoids in the Cerebrospinal Fluid of Stroke Patients: Significance of Prostacyclin/Thromboxane A_2 Ratio
V. S. Kostić, B. M. Djuričić, and B. B. Mršulja

Localization: Selective Vulnerability

- 135 Prolonged Suppression of Protein Synthesis After Brief Cerebral Ischemia in Gerbils
Y. Xie, K.-A. Hossmann, K. Munekata, and K. Seo
- 143 (Na,K)ATPase in Gerbil Cerebral Cortex and Hippocampus: Differential Response to Ischemia and Subsequent Reflow
B. M. Djuričić, M. Maletić, D. V. Mičić, and B. B. Mršulja
- 151 Regional Cerebral Blood Flow in Temporal Lobe Epilepsy
H. J. Meencke and J. P. Hedde
- 159 Dural Vascular Anomalies of the Spine—An Important Cause of Progressive Radiculomyelopathy
A. Thron, E. Koenig, P. Peiffer, and C. Rossberg

PATHOLOGY AND PHYSIOLOGY OF CEREBRAL BLOOD FLOW REGULATION

- 167 The Local Density of Perfused Capillaries in the Rat Brain
W. Kuschinsky, B. Klein, H. Schröck, and F. Vetterlein
- 171 Vascularization of Fetal Cerebellar Tissue Transplanted into the Striatum of Adult Rats
J. Anagnostopoulos, R. Knoth, T. Duffner, P. J. Klein, and B. Volk

- 177 Neurogenic Responses of Isolated Retial and Cerebral Arteries of Artiodactyla
G. Diéguez, A. L. García Villalón, M. V. Conde, L. Santamaría, E. López, B. Gómez, and S. Lluch
- 181 Histomorphometry and Innervation of the Rete Mirabile and Brain Vessels of Artiodactyla
L. Santamaría, G. Diéguez, A. L. García Villalón, E. Nava Hernández, B. Gómez, and S. Lluch
- 187 Modulation of Adrenergic Neurotransmission in Cerebral Vessels
E. Alborch, G. Torregrosa, J. C. Terrasa, J. B. Salom, and F. J. Miranda
- 193 Cholinergic System in Intracerebral Microvasculature: Functional Aspects in the Unanesthetized Goat
D. Triguero, A. L. López de Pablo, B. Gómez, and C. Estrada
- 199 Lesioning of the Nucleus Basalis in the Rat Is Followed by Reduced Glucose Utilization in Selected Areas of the Cerebral Cortex
F. Orzi, G. Diana, N. Battistini, and C. Fieschi
- 205 Effect of Vasoactive Substances on Carbohydrate Metabolism in Cerebrovascular Cultures
M. Spatz, H. Yamamoto, B. B. Mršulja, D. W. Lust, B. Wroblewska, N. Merkel, and J. Bembry
- 211 Do Purinergic Mechanisms Play a Role in the Regulation of Cerebral Blood Flow and Metabolism?
L. Molnár, K. Hegedüs, and I. Fekete

Edema

BLOOD-BRAIN BARRIER; BASIC MECHANISMS

- 219 The Organization of the Astrocyte-Microvascular Interface
A. Hirano
- 223 Blood-Brain Barrier: *In Vitro* Studies of Endothelial Permeability
O. Kempski and M. Spatz
- 229 Pathophysiological Mechanisms of Potential Mediator Compounds of Blood-Brain Barrier Dysfunction
M. Wahl, A. Unterberg, and A. Baethmann
- 235 Interaction Between Adenosine and Prostaglandin Receptors in Capillary Endothelial Cultures
B. Wroblewska and M. Spatz

- 239 Lucifer Yellow as a Morphofunctional Tracer of the Blood–Brain Barrier

J. Artigas, C. Aruffo, S. Sampaolo, F. Cruz-Sanchez, R. Ferszt, and J. Cervós-Navarro

- 245 A Marker for Neurons in Contact with the Cerebrospinal Fluid

C. Aruffo, J. Artigas, M. Kashihara, F. Cruz-Sanchez, J. Cervós-Navarro

MONITORING

- 249 Cerebral Blood Volume Changes Do Not Affect Specific Gravity Measurement of Brain Water Following Temporary Experimental Ischemia

P. Picozzi, N. V. Todd, H. A. Crockard, and R. W. R. Russell

- 255 Proton NMR Studies of Experimental Brain Edema

L. N. Sutton, W. Kemp, B. K. Cho, P. M. Joseph, M. P. Stein, and T. W. Langfitt

- 263 Continuous Recording of Focal Edema of the Cerebral Cortex *In Vivo* Using Sonomicrometry

Y. Terayama, F. Gotoh, M. Tomita, N. Tanahashi, M. Kobari, T. Shinohara, B. Mihara, and K. Ohta

ISCHEMIC EDEMA

- 271 Blood–Brain Barrier Permeability in Acute Cerebral Ischemia After MCA Occlusion and Reperfusion in the Rat

Y. Nakagawa, N. Fujimoto, K. Matsumoto, and J. Cervós-Navarro

- 277 Role of Reactive Hyperemia in the Dynamics of Postischemic Brain Injury

M. Seida, S. Tomida, H. Wagner, P. Ting, and I. Klatzo

- 281 The Role of Blood–Brain Barrier Disruption to Proteins in the Dynamics of Postischemic Brain Edema

T. Kuroiwa, M. Shibutani, T. Matsuo, and R. Okeda

INFLAMMATION AND EDEMA

- 285 Functional Ultrastructure of the Blood–Brain Barrier Under Acute Inflammatory Reactions

P. M. Faustmann, S. Teutrine, and R. Dermietzel

- 289 The Blood–Brain Barrier—A Strict Border to Lymphoid Cells?

R. Meyermann, P. W. Lampert, H. Korr, and H. Wekerle

- 297 Presence of Myelin Breakdown Products in Cervical Lymph Nodes
After ^{90}Y trium Implantation into the Brain
E. Csanda, O. Major, and S. Komoly

COLD INJURY

- 303 Acute Cerebral Arteriolar Responses Following Cold Injury
R. S. Zimmerman, J. P. Muizelaar, E. P. Wei, and H. A. Kontos
- 311 Effects of Indomethacin and Nordihydroguaiaretic Acid on Cerebral
Edema Induced by Freezing Lesion in Rats
M.-H. Yen and S.-H. Lee

PERITUMORAL EDEMA

- 319 Edema Surrounding Meningiomas: Radiological and Histological
Considerations
R. Ferszt and G. B. Bradac
- 329 Glycoconjugate Expression in Human Cerebral Normal and Tumor
Microvessels
P. L. Debbage, U. Schumacher, O. Spoerri, and W. Lange
- 335 Some Remarks on Vascular Ultrastructure in Peritumoral Edema
H. Kroh

THERAPY

- 341 Pharmacological Stimulation of Astroglial Reaction: New Aspects
of Brain Edema Therapy
G. Sancesario, S. S. Chatterjee, B. Gabard, and G. W. Kreutzberg
- 347 Bacterial Infection Complicated with Brain Edema in Children
P.-L. Yu, Y.-J. Yang, J. Yin, H.-X. Tong, and B.-L. Zhang

Hydrocephalus

- 351 Experimental Hydrocephalus Induced by 6-Aminonicotinamide in
Suckling Mice
H. Aikawa and K. Suzuki
- 361 Changes of White Matter Water Content and Ultrastructure Before
and After Shunting in Feline Hydrocephalus
K. Shapiro, F. Takei, A. Hirano, I. Kohn, and A. Fried
- 367 Paravascular Pathways of CSF Resorption in Experimental Hydro-
cephalus
*J. V. Lafuente, J. Artigas, Y. Nakagawa, C. Aruffo, and J. Cervós-
Navarro*

- 371 Statistical Analysis of Cerebrospinal Fluid Circulation in Radioisotope Cisternography by SPECT Method
H. Kuchiwaki, S. Takada, M. Nagasaka, H. Ishiguri, J. Itoh, T. Kinomoto, and N. Kageyama

Intracranial Pressure

- 377 Effects of Increased Cerebrospinal Fluid Pressure on Brain Phosphocreatine and Lactate Determined by Simultaneous ^1H and ^{31}P NMR Spectroscopy
L. N. Sutton, A. C. McLaughlin, W. Kemp, M. D. Schnall, B.-K. Cho, M. P. Stein, T. W. Langfitt, and B. Chance
- 385 Paradoxal Effect of Vasopressin-ADH: A Possible Compensatory Mechanism Against an Increase of Intracranial Volume
Z. M. Rap, M. Koca, G. Hildebrandt, and H. W. Pia
- 393 Somatosensory Evoked Potential and Cerebral Blood Flow in Increased Intracranial Pressure: An Experimental Study
J. Izumi, S. Toya, T. Kawase, S. Okui, and Y. Iizaka

Subarachnoid Hemorrhage

OUTCOME

- 399 A New Cumulative Scoring System—An Aid in Timing Surgery and Predicting Outcome in SAH
D. E. Dorrance, P. R. Bullock, and G. Neil-Dwyer
- 405 Long-Term Follow-up of Cerebral Blood Flow Post-Subarachnoid Hemorrhage
E. W. Mee, D. E. Dorrance, P. R. Bullock, and G. Neil-Dwyer

VASOSPASM

- 409 The Response of Intracranial Vessels to Cigarette Smoking
D. E. Dorrance, P. R. Bullock, J. S. Bagley, and G. Neil-Dwyer
- 415 Evaluation of Electron Paramagnetic Resonance Spectrum of Cerebrospinal Fluid in Postoperative Patients with Subarachnoid Hemorrhage
S. Takada, H. Kuchiwaki, N. Kageyama, and H. Watari
- 423 Correlation of Vasospasm and CBF in Aneurysmal SAH
A. Brawanski, V. A. Maximilian, and W. Ullrich
- 431 Blood-Brain Barrier Damage in the Acute Stage of Experimental Subarachnoid Hemorrhage
T. Dóczi, F. Joó, and M. Bodosi

- 437 Effects of Calcium Entry Blockers on Experimental Cerebral Vasoconstriction
E. Alborch, G. Torregrosa, J. C. Terrasa, J. B. Salom, and F. J. Miranda
- 443 Global Cerebral Blood Flow and Energy Metabolism in Experimental Subarachnoid Hemorrhage Before and After Treatment with Calcium Antagonist
F. J. Schuier and F. Ulrich
- 449 Effect of Methylprednisolone on Vegetative Nerves Plexi of Circle of Willis Arteries in Rabbits with Experimental Subarachnoid Hemorrhage
M. Ryba, R. Gadamski, and A. Kukwa
- 457 Changes in the Adrenergic Nervous System of Cerebral Vessels After Experimental Subarachnoid Hemorrhage
A. Koto, F. Gotoh, N. Suzuki, Y. Morita, K. Isozumi, and R. Senda
- 465 Platelet-Induced Contraction in Isolated Cat Cerebral Arteries: No Role for Endothelial Cells
M. V. Conde, A. L. López de Pablo, J. M. Benito, and S. Lluch
- 471 Brain Lesions Secondary to Subarachnoid Hemorrhage Due to Ruptured Aneurysms
G. Stoltenburg-Didinger and K. Schwarz
- 481 Animal Model of Cerebral Aneurysms: On the Origin of Induced Cerebral Aneurysms in Rats
N. Hashimoto, F. Hazama, M. Kojima, C. Kim, E. Yamada, and H. Handa
- 487 Endothelial Changes in Baboon Cerebral Arteries After Experimental Arterial Spasm: A Study Using Scanning Electron Microscopy
J. T. Hughes
- 495 Experimental Subarachnoid Hemorrhage in the Goat
G. Diéguez, G. González, A. L. López de Pablo, B. Gómez, and S. Lluch

Diffuse Cerebrovascular Disease

CRITICAL REMARKS ON IN VIVO IMAGING

- 499 Positron Emission Tomography Compared to X-Ray Computed Tomography and Magnetic Resonance Imaging in Cerebrovascular Disease
W.-D. Heiss, K. Herholz, H. G. Böcher-Schwarz, G. Pawlik, K. Wienhard, W. Steinbrich, and G. Friedmann

- 505 Relative Value of CT, MRI, and PET in Detecting Brain Abnormalities Following Head Injury
W. M. Alves, A. Alavi, H. L. Kundel, R. A. Zimmerman, R. Dann, C. Dolinskas, F. Fazekas, D. Hackney, J. Powe, M. Reivich, and T. W. Langfitt

VASCULAR DEMENTIA VERSUS ALZHEIMER

- 513 Value of MRI in Diagnosing Alzheimer versus Vascular Dementia
R. Ferszt, G. B. Bradac, and F. Nüssel
- 519 Lightmicroscopical and Ultrastructural Findings in Diffuse Subcortical Angiopathy
J. Artigas, W. Risch, A. Perez-Canto, R. Ferszt, and E. Gerstenberg
- 523 Failure of Enzymatic Defibrination to Improve Subcortical Arteriosclerotic Encephalopathy in an Acute Trial
E. B. Ringelstein, A. Mauckner, W. Sturm, W. Grosse, S. Matentzoglou, H. Zeumer, W. Doering, S. Wolf, R. Schneider, N. Maurin, K. Willmes, M. Schlenker, and V. Eschenfelder
- 531 Vascular Convolutates in the Aging Brain
H. J. Gertz and V. Frydl
- 535 Cerebral Manifestation in Urbach-Wiethe's Syndrome: A Clinical and Pathomorphological Study
R. Kleinert, J. Cervós-Navarro, G. Kleinert, G. F. Walter, and H. Steiner
- 539 Subject Index
