## **Chapter 1 SERVICE INFORMATION, TOOLS, AND SAFETY I**

|                                         |           |
|-----------------------------------------|-----------|
| Objectives                              | 1         |
| Terms to Learn                          | 1         |
| Vehicle Identification                  | 1         |
| Vehicle Safety Certification Label      | 2         |
| VECI Label                              | 2         |
| Calibration Codes                       | 3         |
| Casting Numbers                         | 3         |
| Service Information                     | 3         |
| Threaded Fasteners                      | 4         |
| Metric Bolts                            | 5         |
| Tensile Strength                        | 6         |
| Nuts                                    | 8         |
| Washers                                 | 8         |
| Electrical Tools                        | 9         |
| Basic Hand Tool List                    | 9         |
| Tool Sets and Accessories               | 15        |
| Brand Name Versus Proper Term           | 16        |
| Safety Tips for Using Hand Tools        | 16        |
| Air and Electrically Operated Tools     | 17        |
| Personal Protective Equipment           | 20        |
| Safety in Lifting (Hoisting) a Vehicle  | 23        |
| Jacks and Safety Stands                 | 25        |
| Drive-On Ramps                          | 25        |
| Electrical Cord Safety                  | 26        |
| Jump Starting and Battery Safety        | 26        |
| Fire Extinguishers                      | 27        |
| Fire Blankets                           | 28        |
| First Aid and Eye Wash Stations         | 28        |
| <b>Summary</b>                          | <b>37</b> |
| <b>Review Questions</b>                 | <b>37</b> |
| <b>ASE Certification-Type Questions</b> | <b>37</b> |

## **Chapter 2 ENVIRONMENTAL AND HAZARDOUS MATERIALS 38**

|                                               |           |
|-----------------------------------------------|-----------|
| Objectives                                    | 38        |
| Terms to Learn                                | 38        |
| Occupational Safety and Health Act            | 38        |
| Hazardous Waste                               | 38        |
| Resource Conservation and Recovery Act (RCRA) | 39        |
| Clean Air Act (CAA)                           | 40        |
| Material Safety Data Sheets (MSDS)            | 40        |
| The Dangers of Exposure to Asbestos           | 40        |
| Asbestos OSHA Standards                       | 40        |
| Asbestos EPA Regulations                      | 41        |
| Asbestos Handling Guidelines                  | 41        |
| Used Brake Fluid                              | 41        |
| Used Oil                                      | 42        |
| Disposal of Used Oil                          | 42        |
| Used Oil Storage                              | 42        |
| Solvents                                      | 43        |
| Solvent Hazardous and Regulatory Status       | 44        |
| Used Solvents                                 | 44        |
| Coolant Disposal                              | 45        |
| Lead-Acid Battery Waste                       | 45        |
| Battery Hazardous and Regulatory Status       | 46        |
| Battery Handling and Storage                  | 46        |
| Fuel Safety and Storage                       | 46        |
| Airbag Handling                               | 47        |
| Used Tire Disposal                            | 47        |
| Air-Conditioning Refrigerant Oil Disposal     | 47        |
| <b>Summary</b>                                | <b>52</b> |
| <b>Review Questions</b>                       | <b>52</b> |
| <b>ASE Certification-Type Questions</b>       | <b>53</b> |

**Chapter 3 ELECTRICAL FUNDAMENTALS 54**

- Objectives 54
- Terms to Learn 54
- Electricity 54
- Sources of Electricity 60
- Summary 63**
- Review Questions 63**
- ASE Certification-Type Questions 63**

**Chapter 4 ELECTRICAL CIRCUITS AND OHM'S LAW 64**

- Objectives 64
- Terms to Learn 64
- Circuits 64
- Ohm's Law 68
- Watt's Law 69
- Summary 70**
- Review Questions 71**
- ASE Certification-Type Questions 71**

**Chapter 5 SERIES, PARALLEL, AND SERIES-PARALLEL CIRCUITS 72**

- Objectives 72
- Terms to Learn 72
- Series Circuits 72
- Ohm's Law and Series Circuits 72
- Kirchhoff's Voltage Law 73
- Series Circuit Laws 75
- Series Circuit Examples 76
- Parallel Circuits 77
- Kirchhoff's Current Law 77
- Parallel Circuit Laws 77
- Determining Total Resistance in a Parallel Circuit 78
- Parallel Circuit Examples 80
- Series-Parallel Circuits 82
- Solving Series-Parallel Circuit Problems 83
- Series-Parallel Circuit Examples 83
- Summary 85**
- Review Questions 85**
- ASE Certification-Type Questions 85**

**Chapter 6 DIGITAL METERS AND SCOPE USAGE 87**

- Objectives 87
- Terms to Learn 87
- Test Lights 87

- Self-Powered Test Lights 88
- LED Test Light 88
- Logic Probe 89
- Digital Multimeters 89
- Measuring Amperes 89
- AC/DC Clamp-On Digital Multimeter 92
- Measuring Voltage 92
- Measuring Resistance 93
- Electrical Unit Prefixes 97
- How to Read Digital Meters 98
- RMS Versus Average 99
- Resolution, Digits, and Counts 99
- Accuracy 101
- Analog versus Digital Storage Oscilloscope 101
- Oscilloscope Display Grid 102
- Setting the Time Base 102
- Setting the Volts per Division 103
- DC Coupling 103
- AC Coupling 103
- Pulse Trains 103
- Using Scope Leads 106
- Measuring Battery Voltage with a Scope 107
- Graphing Multimeter 107
- Summary 119**
- Review Questions 119**
- ASE Certification-Type Questions 120**

**Chapter 7 AUTOMOTIVE WIRING AND WIRE REPAIR 121**

- Objectives 121
- Terms to Learn 121
- Automotive Wiring 121
- Braided Ground Straps 123
- Battery Cables 124
- Jumper Cables 124
- Fuses and Circuit Protection Devices 124
- Terminals and Connectors 130
- Wire Repair 131
- Summary 134**
- Review Questions 135**
- ASE Certification-Type Questions 135**

**Chapter 8 SCHEMATICS AND TROUBLESHOOTING 136**

- Objectives 136
- Terms to Learn 136
- Wiring Schematics 136

|                                         |            |
|-----------------------------------------|------------|
| Switches                                | 137        |
| Relay Terminal Identification           | 140        |
| Using Schematics for Troubleshooting    | 142        |
| Locating a Short Circuit                | 143        |
| Electrical Troubleshooting Guide        | 146        |
| Step-by-Step Troubleshooting Procedure  | 146        |
| <b>Summary</b>                          | <b>147</b> |
| <b>Review Questions</b>                 | <b>147</b> |
| <b>ASE Certification-Type Questions</b> | <b>147</b> |

## **Chapter 9 CAPACITANCE AND MAGNETISM 149**

|                                                |            |
|------------------------------------------------|------------|
| Objectives                                     | 149        |
| Terms to Learn                                 | 149        |
| Capacitance                                    | 149        |
| Capacitor Construction and Operation           | 149        |
| Factors of Capacitance                         | 151        |
| Capacitor Uses                                 | 151        |
| Fundamentals of Magnetism                      | 153        |
| Electromagnetism                               | 155        |
| Electromagnetic Induction                      | 158        |
| Electromagnetic Interference (EMI) Suppression | 161        |
| <b>Summary</b>                                 | <b>162</b> |
| <b>Review Questions</b>                        | <b>163</b> |
| <b>ASE Certification-Type Questions</b>        | <b>163</b> |

## **Chapter 10 ELECTRONIC FUNDAMENTALS 164**

|                                  |     |
|----------------------------------|-----|
| Objectives                       | 164 |
| Terms to Learn                   | 164 |
| Semiconductors                   | 164 |
| N-Type Material                  | 165 |
| P-Type Material                  | 165 |
| How Holes Move                   | 165 |
| Summary of Semiconductors        | 166 |
| Diodes                           | 166 |
| Zener Diodes                     | 167 |
| Clamping Diodes                  | 167 |
| Zener Diode Despiking Protection | 168 |
| Despiking Resistors              | 169 |
| Diode Ratings                    | 169 |
| Light-Emitting Diodes            | 170 |
| Photodiodes                      | 170 |
| Photoresistors                   | 171 |
| Varistors                        | 171 |

|                                                                     |            |
|---------------------------------------------------------------------|------------|
| Silicon-Controlled Rectifiers                                       | 171        |
| Thermistors                                                         | 172        |
| Rectifier Bridges                                                   | 172        |
| Transistors                                                         | 172        |
| How a Transistor Works                                              | 173        |
| How a Transistor Amplifies                                          | 174        |
| Field-Effect Transistor                                             | 174        |
| Darlington Pairs                                                    | 174        |
| Transistor Gain                                                     | 174        |
| Solid-State, Integrated-Circuit, and Dual-Inline Package Components | 175        |
| Heat Sink                                                           | 175        |
| Phototransistors                                                    | 176        |
| Solar Cells                                                         | 176        |
| How to Test Diodes and Transistors                                  | 176        |
| Transistor Gates                                                    | 177        |
| Logic Highs and Lows                                                | 178        |
| Transistor-Transistor Logic                                         | 178        |
| Operational Amplifiers                                              | 178        |
| Polarity                                                            | 178        |
| Electronic Component Failure Causes                                 | 178        |
| Electrostatic Discharge                                             | 180        |
| <b>Summary</b>                                                      | <b>181</b> |
| <b>Review Questions</b>                                             | <b>181</b> |
| <b>ASE Certification-Type Questions</b>                             | <b>181</b> |

## **Chapter 11 BATTERIES AND BATTERY TESTING 183**

|                                           |     |
|-------------------------------------------|-----|
| Objectives                                | 183 |
| Terms to Learn                            | 183 |
| Purpose of a Battery                      | 183 |
| Battery Construction                      | 184 |
| Grids                                     | 184 |
| How a Battery Works                       | 186 |
| Specific Gravity                          | 187 |
| Charge Indicators                         | 188 |
| Valve Regulated Lead Acid Batteries       | 188 |
| Causes and Types of Battery Failure       | 189 |
| Battery Hold-Downs                        | 190 |
| Battery Ratings                           | 190 |
| Deep Cycling                              | 191 |
| Calcium and Antimony Batteries            | 191 |
| Battery Council International Group Sizes | 191 |
| Battery Service Safety Considerations     | 193 |
| Battery Maintenance                       | 195 |
| Battery Voltage Test                      | 196 |
| Hydrometer Testing                        | 197 |
| Battery Load Testing                      | 198 |
| Electronic Conductance Testing            | 200 |
| Battery Charging                          | 200 |

|                                             |            |
|---------------------------------------------|------------|
| Jump-Starting                               | 201        |
| Battery Date Codes                          | 201        |
| Battery Electrical Drain Test               | 204        |
| Procedure for Battery Electrical Drain Test | 204        |
| Finding the Source of the Drain             | 205        |
| What to Do If a Battery Drain Still Exists  | 205        |
| Hidden Batteries                            | 205        |
| Battery Troubleshooting Guide               | 206        |
| <b>Summary</b>                              | <b>208</b> |
| <b>Review Questions</b>                     | <b>208</b> |
| <b>ASE Certification-Type Questions</b>     | <b>208</b> |

## **Chapter 12 CRANKING SYSTEM OPERATION AND DIAGNOSIS 210**

|                                            |     |
|--------------------------------------------|-----|
| Objectives                                 | 210 |
| Terms to Learn                             | 210 |
| Cranking Circuit                           | 210 |
| How the Starter Motor Works                | 211 |
| How Magnetic Fields Turn an Armature       | 213 |
| Types of Starter Motors                    | 214 |
| Armature and Commutator Assembly           | 215 |
| Permanent-Magnet Fields                    | 216 |
| Gear-Reduction Starters                    | 216 |
| Starter Drives                             | 218 |

## **Chapter 17 AIRBAG AND PRETENSIONER CIRCUITS 364**

Objectives 364

Terms to Learn 364

Airbags 364

Airbag Diagnosis Tools and Equipment 369

Airbag Testing and Service 370

Driver-Side Airbag Module

Replacement 370

Safety When Manually Deploying

Airbags 372

Pretensioners 372

Occupant Detection Systems 372

Side and Curtain Airbags 374

**Summary 377**

**Review Questions 377**

**ASE Certification-Type  
Questions 377**

## **Chapter 18 AUDIO SYSTEM OPERATION AND DIAGNOSIS 379**

Objectives 379  
 Terms to Learn 379  
 Radios 379  
 Antennas 380  
 Speakers 382  
 Speaker Types 383  
 Crossovers 384  
 Powerline Capacitors 384  
 Radio Interference 386  
 Audio Noise Control Diagnostic Chart 388  
**Summary 388**  
**Review Questions 389**  
**ASE Certification-Type Questions 389**

## **Chapter 19 IGNITION SYSTEM COMPONENTS AND OPERATION 390**

Objectives 390  
 Terms to Learn 390  
 Ignition System Operation 390  
 Ignition Coils 391  
 Ignition Switching and Triggering 393  
 Primary Circuit Operation 394  
 Distributor Ignition 398  
 Waste-Spark Ignition Systems 402  
 Ignition Control Circuits 404  
 Bypass Ignition Control 405  
 Up-Integrated Ignition Control 405  
 Compression Sensing Ignition 406  
 Coil-on-Plug Ignition 406  
 Ion-Sensing Ignition 408  
 Ignition Timing 408  
 Initial Timing 408  
 Knock Sensors 409  
 Spark Plugs 410  
**Summary 410**  
**Review Questions 411**  
**ASE Certification-Type Questions 411**

## **Chapter 20 IGNITION SYSTEM DIAGNOSIS AND SERVICE 412**

Objectives 412  
 Terms to Learn 412  
 Checking for Spark 412  
 Electronic Ignition Troubleshooting Procedure 413

Ignition Coil Testing Using an Ohmmeter 414  
 Pickup Coil Testing 414  
 Testing Magnetic Sensors 415  
 Testing Hall-Effect Sensors 416  
 Testing Optical Sensors 416  
 Ignition System Diagnosis Using Visual Inspection 418  
 Testing for Poor Performance 418  
 Testing for a No-Start Condition 419  
 Ignition System Service 420  
 Firing Order 420  
 Distributor Cap and Rotor Inspection 420  
 Spark Plug Wire Inspection 422  
 Spark Plug Service 423  
 Quick and Easy Secondary Ignition Tests 426  
 Ignition Timing 427  
 Scope Testing the Ignition System 430  
 Scope Testing a Waste-Spark Ignition System 438  
 Scope Testing a Coil-on-Plug Ignition System 438  
 Ignition System Troubleshooting Guide 439  
**Summary 442**  
**Review Questions 442**  
**ASE Certification-Type Questions 442**

## **Chapter 21 COMPUTER FUNDAMENTALS 444**

Objectives 444  
 Terms to Learn 444  
 Computer Control 444  
 The Four Basic Computer Functions 445  
 Digital Computers 448  
 Computer Input Sensors 451  
 Computer Outputs 451  
 Module Communication 451  
 SAE Communication Classifications 452  
 Module Communication Diagnosis 452  
 OBD II Data Link Connector 454  
**Summary 455**  
**Review Questions 455**  
**ASE Certification-Type Questions 455**

## **Chapter 22 COMPUTER SENSORS 457**

Objectives 457  
 Terms to Learn 457

Engine Coolant Temperature  
   Sensors 457  
 Stepped ECT Circuits 458  
 Testing the Engine Coolant Temperature  
   Sensor 459  
 Intake Air Temperature Sensor 463  
 Testing the Intake Air Temperature  
   Sensor 464  
 Temperature Sensor Diagnostic Trouble  
   Codes 465  
 Throttle Position Sensors 465  
 TP Sensor Computer Input  
   Functions 466  
 PCM Uses for the TP Sensor 467  
 Testing the Throttle Position  
   Sensor 467  
 Testing a TP Sensor Using the Min/Max  
   Function 469  
 Testing the TP Sensor Using a Scan  
   Tool 470  
 TP Sensor Diagnostic Trouble  
   Codes 470  
 Manifold Absolute Pressure (MAP)  
   Sensors 470  
 PCM Uses of the MAP Sensor 474  
 Barometric Pressure Sensor 475  
 Testing the MAP Sensor Using  
   a DMM 476  
 Testing the MAP Sensor Using a Scan  
   Tool 477  
 MAP/BARO Diagnostic Trouble  
   Codes 477  
 Air Flow Sensors 478  
 Mass Air Flow Sensor 478  
 Karman Vortex Sensors 480  
 PCM Uses for Air Flow Sensors 481  
 Testing Mass Air Flow Sensors 481  
 Oxygen Sensors 484  
 Zirconia Oxygen Sensors 486  
 Titania Oxygen Sensors 487  
 Wide-Band Oxygen Sensors 487  
 Closed Loop and Open Loop 488  
 PCM Uses of the Oxygen Sensor 488  
 Testing an Oxygen Sensor Using a Digital  
   Voltmeter 490  
 Testing the Oxygen Sensor Using the  
   Min-Max Method 491  
 Testing an Oxygen Sensor Using a Scan  
   Tool 492  
 Testing an Oxygen Sensor Using a  
   Scope 493  
 False O<sub>2</sub>S Readings 493  
 Post Catalytic Converter Oxygen Sensor  
   Testing 497  
 Oxygen Sensor Inspection 497

Oxygen-Sensor-Related Diagnostic  
   Trouble Codes 498
