

TABLE OF CONTENTS

Wind Tunnels and Cooling Airflow

2002-01-0251	A Study of the Pulsations in a 3/4 Open Jet Wind Tunnel	5
	John Lacey Aero Systems Engineering, Inc.	
2002-01-0252	The Driveability Test Facility Wind Tunnel No. 8	15
	Joel Walter, Edward Duell, Bill Martindale Stephen Arnette and Paul A. Nagle Sverdrup Technology, Inc. William Gulker, Stan Wallis and Jack Williams Ford Motor Company	
2002-01-0254	Aerodynamic Investigation of a Scooter in the University of Perugia Wind Tunnel Facility	33
	Stefano Ubertini University of Rome "Tor Vergata", Rome, Italy Umberto Desideri University of Perugia, Perugia, Italy	
2002-01-0255	A Comparison of Pressure Sensitive Paint (PSP) Techniques for Aerodynamic Testing at Slow Velocities	43
	Patricia B. Coleman and Stanley B. Wallis Ford Motor Company Gary A. Dale Air Force Research Laboratory Jeffrey D. Jordan and Neil Watkins NASA Langley Research Center Larry Goss and John C.P.N. Davis Innovative Scientific Solutions, Inc T. Mark Walter Sverdrup Technology, Inc.	
2002-01-0256	Cooling Inlet Aerodynamic Performance and System Resistance	53
	Jack Williams and Dinakara Karanth Ford Motor Co. Walt Oler Texas Tech University	
2002-01-0712	Use of a Pressure-Based Technique for Evaluating the Aerodynamics of Vehicle Cooling Systems.....	71
	Eton Y. Ng, Simon Watkins and Peter W. Johnson RMIT University Lindsay Mole Ford Motor Company of Australia	

Computational Aerodynamics

2002-01-0596	Exterior Airflow Simulations Using a Lattice Boltzmann Approach	87
	Robert Lietz Ford Motor Company Swapn Mallick, Satheesh Kandasamy and Hudong Chen Exa Corporation	
2002-01-0597	Numerical Simulation and Spectral Analysis of Pressure Fluctuations in Vehicle Aerodynamic Noise Generation	107
	Bradley D. Duncan and Raja Sengupta Automotive Aerodynamics, Inc. Swapn Mallick and Rick Shock Exa Corporation D. B. Sims-Williams University of Durham	
2002-01-0598	Incompressible Flow Computations Around Vehicle Bodies Using Unstructured Hybrid Grids	129
	Zhang Yangjun, Lv Zhenhua, Xie Jinming and Tu Shangrong Tsinghua University	
2002-01-1275	Reduction of Aeolian Noise from Roof Rack Crossbars Using Asymmetric Cross-Section Geometry	137
	Myunghan Lee, Jeonghan Lee and Daehoon Kim Hyundai Motor Company	
2002-01-1297	Validation of CFD Commercial Codes for Vehicle Design and Development	143
	Nobuyuki Taniguchi and Kenji Ono University of Tokyo Kazuto Ikeda Daihatsu Motor Toshio Yamada Toyota Motor Toru Komariya Fuji Heavy Industry	
2002-01-0571	Development and Evaluation of a Numerical Simulation Strategy Designed to Support the Early Stages of the Aerodynamic Development Process	149
	T. Breitling, E. Jehle, H. Reister and V. Schwarz DaimlerChrysler AG	

Experimental Aerodynamics

2002-01-0529	Aerodynamic Drag of a Compact SUV as Measured On-Road and in the Wind Tunnel	161
	Jeff Howell and Chris Sherwin Land Rover Martin Passmore Loughborough University Geoff Le Good Bentley Motors	
2002-01-0530	Aerodynamic Forces on Truck Models, Including Two Trucks in Tandem.....	169
	M. Hammache, M. Michaelian and F. Browand University of Southern California	
2002-01-0531	Drag Reduction Mechanisms Due to Moving Ground and Wheel Rotation in Passenger Cars	185
	Per Elofsson and Mark Bannister Volvo Car Corporation	
2002-01-0532	Computational and Experimental Evaluation of a Pad Correction for a Wind Tunnel Balance Equipped for Rotating Wheels	199
	Gerhard Wickern Audi AG Eckard Beese Fachhochschule Bochum	
2002-01-0533	Lift and Side Force Corrections for Wind Tunnel Measurements of Ground Vehicles	211
	Gerhard Wickern Audi AG	
2002-01-0253	The Effect of Turbulence on Peak and Average Pressures on a Car Door	225
	Brendan R. Gilhome and Jeffrey W. Saunders Monash University
