About the Authors viii

Preface..... ix

Acknowledgements x

Chapter 1 Introduction 1

1.1 Introduction 1

1.2 Vehicle Suspension System 2

1.2.1 Suspension Components..... 2

1.2.2 Modelling 3

1.2.3 Evaluation..... 6

1.2.4 Conclusion 8

References 8

Chapter 2 Active Suspension Control 9

2.1 Introduction 9

2.2 Robust Control..... 10

2.2.1 Static Output Feedback Control with GA 10

2.2.2 Non-Fragile Control 17

2.2.3 Multi-Objective Control with Uncertainties 22

2.3 Control with Time Delay 47

2.3.1 Input Delay 47

2.3.2 Time Delay Using T-S Fuzzy Approach 61

2.4 Preview Control..... 85

2.4.1 System Modelling..... 85

2.4.2 Augmented System with Wheelbase Preview Information..... 88

2.4.3 Multi-Objective Disturbance Attenuation..... 91

2.4.4 Simulation Results..... 94

2.4.5 Conclusions 97

2.5 Parameter-Dependent/LPV Control 98

2.5.1 System Modelling..... 98

2.5.2 Velocity-Dependent Controller Design 102

2.5.3 Linear Parameter-Varying Controller Design 105

2.5.4 Simulation Results..... 107

2.5.5 Conclusions 110

2.6 Motion Mode Control 110

2.6.1 System Description..... 110

2.6.2 Subsystem Establishment 111

2.6.3 Extended State Observer Design..... 113

2.6.4 PD and Fuzzy-PD Controller Design 113

2.6.5 Actuator Force..... 114

2.6.6 Simulation Results..... 115

2.6.7 Conclusions 120

Chapter 3 Semi-active Suspension Control..... 121

3.1 Introduction 121

3.2 Varying Damping 122

3.2.1 Magnetorheological Damper..... 122

3.2.2 Electrorheological Damper 140

3.3 Varying Inerter 158

3.3.1 System Description..... 158

3.3.2 Inerter Effects on Suspension..... 160

3.3.3 Adaptive Inerter Control of Suspension System 162

3.3.4 Simulation Results and Discussions 164

3.3.5 Conclusions 167

3.4 Varying Equivalent Stiffness and Inerter..... 167

3.4.1 The Semi-active Device with Variable Electrical Networks..... 167

3.4.2 The Electromagnetic VESI Device with a Variable Electrical Network 171

3.4.3 The VESI Suspension for Vehicles 175

3.4.4 Simulation Analysis 181

3.5 Conclusions..... 184

References 184

Chapter 4 Integrated Suspension Control 187

4.1 Introduction 187

4.2 Integrated with Lateral Dynamics..... 187

4.2.1 Observer-Based Multi-Objective Integrated Control for Vehicle Lateral Stability and Active Suspension Design 187

4.2.2 Fuzzy Control for Nonlinear Uncertain Electrohydraulic Active Suspensions with Input Constraint 208

4.3 Integrated with Seat Suspension and Driver Model and Cabin Model 224

4.3.1 Integrated Vehicle and Seat Model 224

4.3.2 Controller Design 227

4.3.3 Numerical Simulation 237

4.3.4 Conclusion 244

References 246

Chapter 5 Interconnected Suspension Control..... 248

5.1 Introduction 248

5.2 Motion Mode Control Strategy 248

5.2.1 Switched Control..... 248

5.3 Electromagnetically Interconnected Control 267

5.3.1 Introduction of EIS..... 267

5.3.2 EIS System Design and Analysis 268

5.3.3 System Verification 273

5.3.4 Vibration Control of Half-Car EIS System 276

5.3.5 Conclusions 283

References 284

Chapter 6 Suspension Control for In-Wheel Motor Driven Electric Vehicle 286

6.1 Introduction 286

6.2 In-Wheel Motor System Modelling 286

6.3 Parameter Optimization of Suspension and DVA 290

6.4 Output Feedback Controller Design 291

6.5 Simulation Results 300

6.5.1 Parameter Optimization Results 300

6.5.2 Proposed Control Methods Validation 302

6.6 Conclusions 307

References 308

Index 311
