Preface	IX
Introduction by Arthur K. Cho	1
 <i>I. Chemistry of Organic Nitrogen Compounds</i>	
Cho, A.K., Fukuto, J.M., Los Angeles, Calif.	6
I. Introduction	6
II. Amines	6
A. Chemical Properties	6
B. Oxidation	12
III. Hydroxylamines	17
A. Chemical Properties	17
B. Oxidation	17
IV. Nitroxides	18
A. Chemical Properties	18
V. Hydrazines	19
A. Chemical Properties	19
B. Oxidation	20
VI. Nitroso Compounds	20
A. Chemical Properties	20
B. Reduction	21
VII. Oximes	21
VIII. Nitro Compounds	22
References	22
 <i>II. Cytochrome P450 in Nitrogen Metabolism</i>	
Miwa, G.T., Walsh, J.S., Rahway, N.J.	27
I. Introduction	27
A. Historical	27
B. Criteria for Cytochrome P450 Involvement	28

II. The Cytochrome P450 System	29
III. N-Oxidation Reactions	30
A. Oxidation State I	31
B. Oxidation State II	38
C. Oxidation State III	40
IV. Nitrogen Reduction	41
A. Nitro Reduction	41
B. Azo Reduction	42
C. N-Oxide Reduction	43
V. Chemical Models for Cytochrome P450-Catalyzed Oxidation/Reduction Reactions	44
VI. One-Electron Nitrogen Oxidations	50
VII. Conclusion	51
Acknowledgments	53
References	53

III. Nitrogenous Compounds as Ligands to Hemoporphyrins – The Concept of Metabolic-Intermediary Complexes

Lindeke, B., Solna, Paulsen-Sörman, U., Uppsala	63
I. Introduction	63
II. Spectral Perturbations	63
III. Some General Properties of Hemin Iron	66
IV. Nitrogenous Compounds Generating Cytochrome P450 MI Complexes ...	68
A. Amines	70
B. N-Hydroxylamines	70
C. C-Nitroso Compounds	72
D. Nitrones	72
E. Nitro Compounds	73
F. N-Oxides	74
G. Compounds Containing the N-N Functional Group	74
H. Nitrogen Heterocycles	74
I. Tertiary Amine-Containing Macrolide Antibiotics	75
V. Structure-Activity Relationships	75
A. Amphetamine Class Compounds	76
B. Other Aliphatic Amines	77
C. Hydrazines	78
D. Enantioselectivity	79
VI. The Heterogeneity of Ligand-Binding Hemoproteins and Ligand Generation	81
VII. Events Leading to Ligand Formation	83
A. C-N Compounds Containing a Primary Nitrogen Atom	83
B. C-N Compounds Containing a Tertiary or Secondary Nitrogen Atom ..	84
C. N-N Compounds Containing a Primary Nitrogen Atom	85
VIII. Conclusion	86

Contents	VII
----------	-----

Appendix	88
References	96

IV. Nitrogen Oxygenation by Flavin Enzymes

Prough, R.A., Louisville, Ky.	103
I. Introduction	103
A. Historical	103
B. Monoamine Oxydases	108
C. Flavin-Containing Monooxygenase	108
II. The FAD-Containing Monooxygenase	108
A. Substrate Specificity	108
B. Localization	109
C. Purification	110
D. Physical Properties	110
E. Catalytic Properties	111
F. Effectors	116
III. Method of Assay	117
IV. Species and Developmental Aspects	118
V. Criteria for Involvement in Reactions	120
VI. Conclusion	124
Acknowledgments	125
References	126

V. Nitrogen Oxidation in Carcinogenesis

Quon, C.Y., Waukegan, Ill.	132
I. Introduction	132
II. Historical Background	132
III. Activation Steps	133
A. <i>N</i> -Hydroxylation	133
B. Esterification	135
C. Free Radicals	138
D. Prostaglandin H Synthase	140
IV. Structure Activity Relationships	141
A. Aromatic Amines	141
B. Aromatic Amides	143
C. Aminoazo Dyes	144
V. Covalent Binding to Macromolecules	146
A. Sites of Covalent Binding	146
B. Types of Covalent Binding	146
VI. Mechanisms of Chemical Carcinogenesis	149
VII. Concluding Remarks	151
References	151

VI. Nitrogen Oxidation in Toxicity

Prough, R.A., Erikson, J.M., Wiebkin, P., Louisville, Ky.	161
I. Chemical Reactivity of Oxidized Compounds	161
A. Amine Oxides	162
B. Hydroxylamines	162
C. <i>N</i> -Hydroxyamides	163
D. <i>N</i> -Nitrosamines	163
E. Nitro-Compounds	164
F. Azo- and Diazene Derivatives	164
G. Azoxy Derivatives	165
II. Biological Reactivity of Oxidized Nitrogen Derivatives	165
A. Amine Oxides	165
B. Hydroxylamines	166
C. <i>N</i> -Hydroxyamides	168
D. <i>N</i> -Nitrosamines	169
E. Nitro-Compounds	170
F. Azo- and Diazene Derivatives	172
G. Azoxy Derivatives	175
III. Covalent Binding and Toxicity	176
References	178

VII. Metabolic Disposition of Nitrogen Functionalities

Cho, A.K., Los Angeles, Calif.	184
I. Introduction	184
II. Amines	184
A. Oxidation	185
B. Conjugative Reactions	187
III. Hydroxylamines and <i>N</i> -Oxides	188
A. Reduction	189
B. Oxidation	190
C. Conjugation	194
IV. Hydrazines	195
A. Oxidation	195
B. Conjugation	199
V. Oximes	199
VI. Nitroso-Compounds	200
VII. Azo-Compounds	200
VIII. Nitro-Compounds	201
A. Reduction of Aromatic Nitro-Groups	201
B. Reduction of Nitrofurans	201
C. Aliphatic Nitro-Compounds	203
IX. Conclusions	205
References	206
Subject Index	213
