Contents

Preface ix

CHAPTER 1 INTRODUCTION 1
1.1 General 1
1.2 Mechanics of Soft Terrain 2
1.2.1 Physical properties of soil 3
1.2.2 Compressive stress and deformation characteristics 6
1.2.3 Shear stress and deformation characteristics 8
1.3 Mechanics of Snow Covered Terrain 19
1.3.1 Physical properties of snow 19
1.3.2 Compressive stress and deformation characteristics 22
1.3.3 Shear stress and deformation characteristics 26
1.4 Summary 29
References 31
Exercises 33

CHAPTER 2 RIGID WHEEL SYSTEMS 35
2.1 At Rest 36
2.1.1 Bearing capacity of weak terrain 36
2.1.2 Contact pressure distribution and amount of sinkage 36
2.2 At Driving State 39
2.2.1 Amount of slippage 39
2.2.2 Soil deformation 40
2.2.3 Force balances 45
2.2.4 Driving force 47
2.2.5 Compaction resistance 51
2.2.6 Effective driving force 53
2.2.7 Energy equilibrium 54
2.3 At Braking State 55
2.3.1 Amount of slippage 55
2.3.2 Soil deformation 56
2.3.3 Force balances 59
2.3.4 Braking force 61
2.3.5 Compaction resistance 65
2.3.6 Effective braking force 67
2.3.7 Energy equilibrium 67
2.4 Simulation Analysis 68
2.4.1 Driving state 70
2.4.2 Braking state 74

2.5 Summary 78
References 80
Exercises 81

CHAPTER 3 FLEXIBLE-TIRE WHEEL SYSTEMS 83
3.1 Tire Structure 84
3.2 Static Mechanical Characteristics 86
3.3 Dynamic Mechanical Properties 91
3.3.1 Hard terrain 91
3.3.2 Soft terrain 94
3.4 Kinematic Equations of a Wheel 109
3.5 Cornering Characteristics 112
3.6 Distribution of Contact Pressure 116
3.7 Summary 119
References 119
Exercises 120

CHAPTER 4 TERRAIN-TRACK SYSTEM CONSTANTS 123
4.1 Track Plate Loading Test 124
4.2 Track Plate Traction Test 124
4.3 Some Experimental Results 127
4.3.1 Effects of variation in grouser pitch-height ratio 127
4.3.2 Results for a decomposed granite sandy terrain 130
4.3.3 Studies on pavement road surfaces 131
4.3.4 Scale effects and the model-track-plate test 134
4.3.5 Snow covered terrain 144
4.4 Summary 145
References 146
Exercises 146

CHAPTER 5 LAND LOCOMOTION MECHANICS FOR A RIGID-TRACK VEHICLE 149
5.1 Rest State Analysis 149
5.1.1 Bearing capacity of a terrain 149
5.1.2 Distribution of contact pressures and amounts of sinkage 150
(1) For the case where $s_{f0} \geq H, s_{r0} \geq H$ 152
(2) For the case where $0 \leq s_{f0} < H < s_{r0}$ 153
(3) For the case where $s_{f0} > H > s_{r0} \geq 0$ 154
(4) For the case where $s_{f0} < 0 < H < s_{r0}$ 155
(5) For the case where $s_{f0} > H > 0 > s_{r0}$ 156
5.2 Driving State Analysis 158
5.2.1 Amount of vehicle slippage 158
5.2.2 Force balance analysis 159
5.2.3 Thrust analysis 162
(1) Main part of track belt 163
(2) Contact part of front-idler 165
(3) Contact part of rear sprocket 166

5.2.4 Compaction resistance 167
5.2.5 Energy equilibrium equation 170
5.2.6 Effective driving force 171
5.3 Braking State Analysis 174
5.3.1 Amount of vehicle slippage 174
5.3.2 Force balance analysis 175
5.3.3 Drag 176
(1) Main part of track belt 176
(2) Contact part of the front-idler 180
(3) Part of rear sprocket 181
5.3.4 Compaction resistance 182
(1) For the case where $0 \geq s_{f0i} \leq s_{r0i}$ 182
(2) For the case where $s_{f0i} > s_{r0i} > 0$ 183
(3) For the case where $s_{f0i} < 0 < H < s_{r0i}$ 183
(4) For the case where $s_{f0i} > H > 0 > s_{r0i}$ 183
5.3.5 Energy equilibrium analysis 183
5.3.6 Effective braking force 184
5.4 Experimental Validation 187
5.5 Analytical Example 197
5.5.1 Pavement road 197
5.5.2 Snow covered terrain 202
5.6 Summary 204
References 205
Exercises 206

CHAPTER 6 LAND LOCOMOTION MECHANICS OF FLEXIBLE-TRACK VEHICLES **209**

6.1 Force System and Energy Equilibrium Analysis 209
(1) During driving action 212
(2) During braking action 212
6.2 Flexible Deformation of a Track Belt 212
6.3 Simulation Analysis 215
6.3.1 At driving state 218
6.3.2 At braking state 221
6.4 Theory of Steering Motion 224
6.4.1 Thrust and steering ratio 228
6.4.2 Amount of slippage in turning motion 229
6.4.3 Turning resistance moment 231
6.4.4 Flow chart 232
6.5 Some Experimental Study Results 235
6.5.1 During self-propelling operation 235
6.5.2 During tractive operations 238
6.6 Analytical Example 238
6.6.1 Silty loam terrain 239
(1) Trafficability of a bulldozer running on soft terrain 239
(2) Size effect of vehicle 246
(3) Effect of initial track belt tension 249

6.6.2 Decomposed granite sandy terrain 254
(1) At driving state 255
(2) At braking state 259
6.6.3 Snow covered terrain 261
(1) At driving state 262
(2) At braking state 266
6.7 Summary 269
References 269
Exercises 271

INDEX **273**
