Discover the science, cultural history, and environmental importance of our planet's oceans.

The oceans of the world are the lifeblood of our planet. They act as a climate regulator, absorbing heat and influencing weather patterns. The oceans teem with a vast and mostly unexplored diversity of life, providing us with food and medicine. Historically, oceans have been the highways of exploration and trade, connecting continents and fostering cultural exchange. From ancient Polynesian voyagers to modern shipping lanes, societies have relied on the oceans for transportation and resources. Yet, despite their vastness and importance, the world's oceans face numerous threats, including the effects of climate change, pollution, and exploitation of their bounty. The second edition of this award-winning encyclopedia has been updated throughout and includes more than twenty additional entries and highlights timely concerns, including overfishing and microplastics, while also providing expanded coverage of the role oceans play in modern society, from cruise ships to the America's Cup competition.

Part I of the book features a collection of ten thematic essays, covering the five oceans of the world and broad areas of study such as the shipping industry and the changing nature of ocean boundaries.

Part II includes more than 115 encyclopedia entries exploring topics ranging from the Bermuda Triangle to maritime law, from tsunamis to ocean acidification. Sidebars throughout offer fascinating facts that complement the main text.

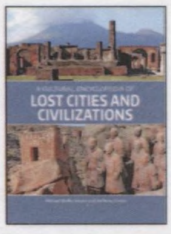

Rainer F. Buschmann is Professor and founding faculty member in the history program at California State University Channel Islands, USA.

Lance Nolde is Assistant Professor in the history program at California State University Channel Islands, USA.

Introduction 1

Part I: Thematic Essays

The Arctic Ocean 7
The Atlantic Ocean 21
The Indian Ocean 37
The Pacific Ocean 53
The Southern Ocean 71
Oceans and Seas in World Culture 87
The Changing Nature of Ocean Boundaries 103
The Shipping Industry 109
Ocean Exploration 127
Environmental Issues and the World's Oceans 139

Part II: Topical Entries

A 155
Adriatic Sea 155
Age of Sail 156
America's Cup 158
Antikythera Wreck 160
Aquaculture 163
Art and the Sea 165
Artificial Reefs 167
Atlantic Galleon Exchange 169

Atlantis 170
Atocha Wreck 173
Austronesians 174
B 179
Beachcombers (Transculturites) 179
Belitung Wreck 181
Bermuda Triangle 182
Bikini Atoll (Nuclear Pacific) 184
Burial at Sea 186
C 191
Carbon Cycle 191
Celestial Navigation 193
Climate Change 195
Clotilda Wreck 198
Coastal Erosion and Deposition 200
Columbian Exchange 202
Commodities 204
Cook, James (1728–79) 207
Coral Reefs 209
Coriolis Effect 213
Cousteau, Jacques (1910–97) 214
Cross-Cultural Encounters 217
Cruise Ships and Cruising 218
D 223
Da Gama, Vasco (1469–1524) 223
Deep-Sea Exploration 225
E 229
Earle, Sylvia (1935–) 229
El Niño/La Niña 231
Endurance Wreck 234
Estuaries 236
Exclusive Economic Zone 238

F 241
Film and the Sea 241
Fishing 244
Fortified Wines (Port and Madeira) 246
Franklin's Lost Expedition 248
G 251
Glaciers 251
Great Barrier Reef (Australia) 253
Great Pacific Garbage Patch 256
The Great Wave Off Kanagawa 259
Groot (Grotius), Hugo de (1583–1645) 261
H 265
Hanseatic League 265
Heyerdahl, Thor (1914–2002) 267
Hōkūle'a 269
Hurricanes and Typhoons 271
I 275
Ibn Majid, Ahmad (*c.* 1432–*c.* 1500) 275
Icebreaker Ships 276
Ice Melt 279
Islands 281
L 285
Law of the Sea 285
Literature and the Sea 287
Little Ice Age 290
Littoral 292
M 295
Magellan, Ferdinand (1480–1521) 295
Manila Galleon 298
Marine Pollution 300
Maritime Archaeology 302
Maritime Deities 304

Maritime Empires 305
Maritime Organizations 308
Maritime Trade 310
