Contents

List of Contributors *xvii*
About the Editors *xxiii*
Preface *xxv*

1 Desalination Technologies: Harnessing the Ocean for Freshwater Solutions *1*
Ambika Kumar, Deepika Dimri, Anshu Kumar, Abhijeet Ghosh, and Rajneesh Kumar
1.1 Introduction *1*
1.2 Desalination Technologies Overview *3*
1.3 Conventional Desalination Technologies *5*
1.3.1 Reverse Osmosis *5*
1.3.1.1 Description and Working Principle *6*
1.3.1.2 Technological Challenges and the Future of RO *7*
1.3.2 MSF Distillation *8*
1.3.2.1 Key Operational Parameters and Energy Requirements *8*
1.3.3 Multi-effect Distillation *9*
1.3.4 Electro Dialysis *10*
1.3.4.1 Applications in Brackish Water Desalination *11*
1.4 Emerging Desalination Technologies *11*
1.4.1 Nanotechnology-based Membranes *11*
1.4.2 Geothermal Desalination *11*
1.4.3 Capacitive Deionization *12*
1.4.4 Membrane Distillation *12*
1.4.5 Advanced Reverse Osmosis *12*
1.4.6 Forward Osmosis *13*
1.4.7 Potential Advantages Over Traditional Methods *13*
1.5 Energy Sources for Desalination *14*
1.5.1 Conventional Energy Sources *14*
1.5.2 RE Integration *14*
1.6 Economic and Environmental Considerations *15*
1.6.1 Cost Analysis of Desalination Technologies *15*
1.6.2 Environmental Impact Assessments *16*

1.7 Future Directions in Desalination Research *16*
1.8 Conclusion *17*
Acknowledgements *18*
References *18*

2 Restoration of Aquatic Ecosystems for Water Resource Management: Challenges and Sustainable Solutions *23*
S. Ganjingla, Imokokla Imsong, Ranika Roy, Susmita Reang, Ashutosh Tripathi-II, and Ashutosh Tripathi-I
2.1 Introduction *23*
2.2 Factors Affecting Water Resources *25*
2.2.1 Rainfall (Indian Summer Monsoon) *25*
2.2.2 Surface Water *25*
2.2.3 Groundwater *26*
2.2.4 Water Demand and Availability *26*
2.3 Ecological Renewal in Water Resource Management: The Need *27*
2.4 Importance of the Aquatic Ecosystem *28*
2.5 Restoration of Aquatic Ecosystems *29*
2.5.1 Principles of Restoration: Sustainable Solutions *31*
2.5.1.1 Addressing the Root Cause of Degradation *32*
2.5.1.2 Restoring Ecological Integrity *32*
2.5.1.3 Nature-based Solutions: Climate Resilience and Adaptation *33*
2.5.2 Restoring Native and Keystone Species *35*
2.5.2.1 Restoring Hydrological Flow and Natural Regimes *36*
2.5.2.2 Incorporating Technological Yet Cost-effective and Measurable Methods of Restoration Aligning with Adaptive Management *36*
2.5.2.3 Integrating Stronger Legal and Financial Support for Sustainable Restoration *38*
2.5.2.4 Community-led Aquatic Ecosystem Restoration: Integrating Indigenous Traditional Knowledge (ITKs) *39*
2.6 Conclusion *40*
References *41*

3 Groundwater Nitrate as a Key Concern of Water Scarcity in Arid Environment: A Special Focus on MENA Region *49*
Bedour Alsabti, Chidambaram Sabarathinam, Dhanu Radha Samayamanthula, Amjad Al-Rashidi, and Sara Al-Haddad
3.1 Introduction *49*
3.1.1 Study Area *51*
3.1.2 Literature and Data Collection Strategy *53*
3.2 Nitrate Levels in the MENA Region *53*
3.3 Nitrate Natural (Geogenic) Sources in Groundwater *56*
3.3.1 Other Geogenic Contaminants in Groundwater in the MENA Region *57*
3.4 Anthropogenic Sources of Nitrate in Groundwater *58*
3.4.1 Agriculture *58*

3.4.2 Wastewater *58*
3.5 Isotopic Evidence for Nitrate Contamination *60*
3.6 Role of Ionic Ratios to Identify the Sources of Nitrate *60*
3.7 Processes and Evolution Governing Nitrate in Groundwater *60*
3.8 Mitigation and Strategies *61*
3.9 Recommendation *62*
Acknowledgements *62*
References *63*

4 Global Perspectives on the Impact of Climate Change on Water Scarcity, Including Regional Vulnerabilities, and Adaptation Strategies *73*
Deepika Dimri, Mayank Singh Bhakuni, Kamal Kant Joshi, Aparna Sarin, and Ambika Kumar
4.1 Introduction *73*
4.2 Regional Vulnerabilities of Water Scarcity as a Consequence of Climate Change Across the World *75*
4.2.1 Water Scarcity in Africa *75*
4.2.2 Water Scarcity in Asia *77*
4.2.3 Water Scarcity in the Mediterranean and Middle East Regions *80*
4.2.4 Water Scarcity in America *81*
4.2.5 Water Scarcity in Australia *82*
4.2.6 Water Scarcity Issue in the Transboundary River Basin *82*
4.3 Planned Adaptation to Water Scarcity *83*
4.4 Conclusion *84*
References *84*

5 An Overview of Seawater Desalination Techniques, Challenges, and Opportunities *89*
Majid Peyravi and Zahra Goli Sangchi
5.1 Introduction *89*
5.2 Thermal Desalination *90*
5.2.1 Multistage Flash *91*
5.2.2 Multi-effect Distillation *92*
5.2.3 Vapor Compression Distillation *93*
5.3 Membrane-based Desalination *93*
5.3.1 Electrodialysis *94*
5.3.2 Reverse Osmosis *94*
5.4 Hybrid Desalination Technologies *95*
5.4.1 ED–RO Hybrid Process *96*
5.4.1.1 Pretreatment of Entry Water *96*
5.4.1.2 ED as Pretreatment *96*
5.4.1.3 RO for Final Purification *97*
5.4.1.4 Brine Management *97*
5.4.1.5 Categories of ED–RO Hybrid Configurations *97*
5.4.2 FO–MD Hybrid Systems *98*

5.4.2.1 Preparation of FS and DS *98*
5.4.2.2 FO: Primary Water Separation *99*
5.4.2.3 Transfer of DS to the MD Process *99*
5.4.2.4 Recovery and Regeneration of DS *99*
5.4.2.5 Collection and Disposal of Residual Wastewater *99*
5.4.3 RO–MD Hybrid Systems *100*
5.4.3.1 The Benefits and Drawbacks of RO–MD Systems *100*
5.4.4 RO–FO Hybrid Systems *100*
5.4.4.1 Marine Water Pretreatment Stage *101*
5.4.4.2 Process (FO): Transfer of Water to the Absorbent DS *101*
5.4.4.3 Separation of DS *101*
5.4.4.4 Water Passing the RO Membrane for Ultimate Desalination *101*
5.4.4.5 Wastewater Management and Energy Recovery *101*
5.4.4.6 Generation of Potable Water as the Final Product *102*
5.4.4.7 Configurations of RO–FO Hybrid Systems in Marine Desalination *102*
5.5 Solar-powered Desalination *105*
5.5.1 Direct Solar Desalination *105*
5.5.2 Indirect Solar Desalination *105*
5.5.2.1 Solar Photovoltaic *105*
5.5.2.2 Solar Thermal *105*
5.6 Conclusion *106*
References *106*

6 Examining the Causes of Water Scarcity in the World and the Impact of Water Economy *113*
Majid Peyravi and Samaneh Karimi
6.1 Introduction *113*
6.2 Water Crisis and Its Main Causes *113*
6.3 The Importance of Studying Water Economics to Solve Crises *117*
6.4 Dimensions of the Water Crisis *118*
6.4.1 Reduction of Renewable Water Resources *118*
6.4.2 Increase in Water Demand *119*
6.4.3 Lack of Access to Clean Water *120*
6.5 Water Economics *121*
6.5.1 The Economic Value of Water *121*
6.5.2 Water Resource Management *122*
6.5.3 Problems in Water Resource Allocation *124*
6.6 Economic Effects of the Water Crisis *125*
6.6.1 Agriculture and Food Security *125*
6.6.2 Industry and Production *128*
6.6.3 Social and Health Impacts *129*
6.7 Solutions and Strategies *129*
References *130*

7 Innovative Approaches to Marine Water Desalination and Sustainable Utilization *133*
Nageswara Rao Lakkimsetty, Nourhan Hilal El Mohamad, Yahya Ali Hamadi, and Rahma Juma
7.1 Introduction *133*
7.2 Importance of Marine Water Desalination *134*
7.3 Global Water Scarcity Concerns *135*
7.4 Environmental Impacts and Energy Challenges *135*
7.5 Need for Innovative and Sustainable Desalination Methods *136*
7.6 Conventional Desalination Techniques *137*
7.7 Recent Advancements in Desalination Technologies *139*
7.8 Environmental Impact and Mitigation Measures *140*
7.9 Economic Considerations and Cost-effectiveness Analysis *141*
7.10 Case Studies and Real-world Applications *143*
7.11 Future Directions and Research Opportunities *143*
7.12 Conclusion and Recommendations *145*
Acknowledgements *146*
References *146*

8 Advances in Water Resources Management by Protection and Restoration of Aquatic Ecosystems *149*
Punyavee Mohan, Ujjwalkant Singh, Kumar Ankush, Kartikey Bhatt, Nitya Rastogi, and Nidhi Verma
8.1 Introduction *149*
8.2 Advancements in Water Management Strategies *150*
8.2.1 Monitoring *150*
8.2.2 Restoration of Aquatic Ecosystem *151*
8.2.2.1 Habitat Restoration *151*
8.2.2.2 Methods of Restoration *154*
8.2.3 Protection of Aquatic Ecosystems *161*
8.2.3.1 International Laws and Regulations *162*
8.3 Prospects and Recommendation *164*
8.3.1 Strengthening Global Cooperation and Knowledge-sharing *164*
8.3.2 Enhancing Public Awareness and Education *164*
8.3.3 Leveraging Emerging Technologies for Adaptive Management *164*
8.4 Conclusion *165*
References *165*

9 Groundwater Scarcity and Socioeconomic Impact Due to Coal Mining – Case Study on Shahdol District, Madhya Pradesh, India *175*
Ramesh Kumar, Piyali Sabui, Aaradhana Bora, and Pallavi Das
9.1 Introduction *175*
9.2 Study Area *177*
9.3 Materials and Methods *178*

9.4 Results and Discussion *179*
9.4.1 Groundwater Scarcity *179*
9.4.2 Socioeconomic Impacts *180*
9.5 Conclusion *187*
Acknowledgements *187*
References *188*

10 Groundwater Scarcity: Assessment, Monitoring, and Management in India Using Geospatial Techniques *191*
Pankaj Kumar and Ravi Prakash Singh
10.1 Introduction *191*
10.2 Status of Groundwater in India *193*
10.3 Regional Groundwater Status *195*
10.3.1 Groundwater Status in Northern India *197*
10.3.2 Groundwater Status in Central and Western India *197*
10.3.3 Groundwater Status in Southern India *197*
10.3.4 Groundwater Status in Eastern India *197*
10.3.5 Groundwater Status in Himalayan and Northeastern India *198*
10.4 Geospatial Technologies Application in Groundwater Monitoring *198*
10.4.1 RS for Groundwater Assessment *198*
10.4.1.1 GRACE Satellite Mission and Groundwater Storage Trends *198*
10.4.1.2 Optical and Microwave RS for Groundwater Monitoring *199*
10.4.2 GIS-based Groundwater Potential Mapping *199*
10.4.2.1 MCDA in Groundwater Studies *200*
10.4.3 Hydro-climatic Models and Machine Learning Applications *200*
10.4.3.1 ML and AI in Groundwater Studies *201*
10.5 Geospatial Techniques in Groundwater Recharge Management *201*
10.5.1 Geospatial Innovations for Real-time Groundwater Monitoring and Management *201*
10.6 Summary and Conclusions *202*
References *203*

11 Revival and Rejuvenation of Aquatic Ecosystems for Water Resource Management *207*
Priyanka Varma and Paulami Sahu
11.1 Introduction *207*
11.2 Aquatic Ecosystem *207*
11.2.1 Freshwater Ecosystem *208*
11.2.1.1 Types of Freshwater Ecosystem *208*
11.2.1.2 Causes and Threats to Water Resources *209*
11.2.1.3 The Concepts of Revival and Rejuvenation *209*
11.2.1.4 The Aim and Purpose of Conducting the Study *210*
11.2.1.5 Treatment Processes *210*
11.3 Conclusion *223*
References *224*

12 Understanding the Role of Water Scarcity in Natural Disaster Vulnerability: An Overview *229*
Chitrangada Debsarma and Paulami Sahu
12.1 Introduction *229*
12.2 Understanding Water Scarcity *231*
12.2.1 Water Scarcity and Climate Change *232*
12.3 Natural Disasters Linked to Water Scarcity *233*
12.3.1 Droughts *233*
12.3.2 Wildfires *235*
12.3.3 Floods *236*
12.4 Social and Economic Impacts of Natural Disasters *238*
12.5 Case Studies *238*
12.6 Strategies to Address Water Scarcity and Disaster Resilience *239*
12.6.1 Technological Innovations in Water Scarcity and Disaster Management *241*
12.7 Concluding Remarks *242*
References *242*

13 Role of Geogenic Contaminants in Water Scarcity and Remediation Approaches *249*
Ayushi Priya, Deepansha Raina, Gaurav, Mohit Marwah, Sunila Hooda, and Shalini Swami
13.1 Introduction *249*
13.2 Geogenic Contaminants: Origin, Types, and Their Impacts *250*
13.2.1 Definition and Origin of Geogenic Contaminants *250*
13.2.2 Geogenic Contaminants: Types and Their Ecological and Health Impacts *251*
13.2.3 Effects of Contaminants on Flora and Fauna *252*
13.3 Bioremediation as a Sustainable Removal Strategy *253*
13.3.1 Fundamentals of Bioremediation and Its Significance in Water Management *253*
13.3.2 Strategies in Bioremediation for the Removal of Geogenic Contaminants *254*
13.3.2.1 Bioaugmentation *255*
13.3.2.2 Bio-stimulation *255*
13.3.2.3 Biosorption *255*
13.3.2.4 Bioaccumulation *255*
13.3.2.5 Bioleaching *255*
13.3.2.6 Biotransformation *255*
13.3.2.7 Bioprecipitation *255*
13.3.3 Role of Microbial Communities in Bioremediation *256*
13.3.4 Challenges in Bioremediation *257*
13.4 Case Study: Bioremediation as an Approach to Reduce Geogenic Contamination *258*
13.5 Strategies for Sustainable Water Management *259*
13.5.1 Significance of Advanced Detection and Bioremediation in Mitigating Water Scarcity *259*

13.5.2 Integration with Other Water Management Approaches for Generating Freshwater *260*
13.5.3 Guidelines and Frameworks to Address Geogenic Contamination *261*
13.6 Conclusion *261*
References *262*

14 Harnessing the Rain: A Path to Water Sustainability *269*
Pushpendra Singh, Pooja Yadav, and Shruti Dutta
14.1 Introduction *269*
14.1.1 The Concept of RWH *270*
14.2 Historical Perspective *271*
14.2.1 Traditional RWH Practices Across Civilizations *271*
14.2.2 Stepwells in India *271*
14.2.3 Cisterns in the Mediterranean *271*
14.2.4 Other Notable RWH Practices *272*
14.3 Evolution of Modern RWH Techniques *272*
14.3.1 Early 20th-century Developments *272*
14.3.2 Lessons from Indigenous and Traditional Knowledge *272*
14.3.3 Technological Advancements in the Late 20th Century *273*
14.3.4 The 21st-century Innovations *273*
14.3.5 Global Policy and Advocacy *273*
14.4 Components of RWH Systems *273*
14.4.1 Catchment Area *274*
14.4.2 Conveyance System *274*
14.4.3 Filtration System *274*
14.4.4 Storage Facility *275*
14.4.5 Distribution System *275*
14.5 RWH Techniques *275*
14.5.1 Rooftop RWH *275*
14.5.2 Surface Runoff Harvesting *276*
14.5.3 Groundwater Recharge Systems *276*
14.5.4 Rain Gardens and Bioswales *277*
14.5.5 Storage Reservoirs and Ponds *277*
14.5.6 Permeable Pavements *277*
14.5.7 Check Dams and Contour Bunding *277*
14.6 Benefits of RWH *278*
14.6.1 Alleviating Water Scarcity *278*
14.6.2 Reducing Groundwater Depletion *278*
14.6.3 Mitigating Urban Flooding *278*
14.6.4 Cost Savings *278*
14.6.5 Environmental Benefits *278*
14.6.6 Enhanced Water Quality *279*
14.6.7 Supporting Agriculture *279*
14.6.8 Climate Resilience *279*
14.6.8.1 Regions with Increasing Rainfall *279*

14.6.8.2 Regions with Declining Rainfall *279*
14.6.8.3 Adaptability Across Extremes *280*
14.6.9 Community Empowerment *280*
14.6.10 Biodiversity and Ecosystem Preservation *280*
14.7 Challenges in Implementing RWH *280*
14.7.1 High Initial Costs *281*
14.7.2 Maintenance and Operational Challenges *281*
14.7.3 Water Quality Concerns *281*
14.7.4 Limited Awareness and Education *281*
14.7.5 Space Constraints in Urban Areas *282*
14.7.6 Dependence on Rainfall Patterns *282*
14.8 Global Success Stories of RWH *282*
14.8.1 Singapore: The NEWater Initiative *282*
14.8.2 Australia: The City of Toowoomba *282*
14.8.3 Germany: The Town of Emsdetten *283*
14.8.4 South Africa: The Cape Town Initiative *283*
14.8.5 United States: The City of Berkeley, California *283*
14.9 Indian Success Stories of RWH *284*
14.9.1 State-wide Implementation (Tamil Nadu) *284*
14.9.2 The Village of Alwar (Rajasthan) *284*
14.9.3 The City of Bangalore (Karnataka) *285*
14.9.4 Success of Traditional Methods (Kerala) *285*
14.9.5 RWH in Pune (Maharashtra) *285*
14.10 Conclusion and Future Directions *285*
14.10.1 Integration with Technology and Circular Water Use *286*
14.10.2 Policy, Public–Private Partnerships, and Community Models *286*
14.10.3 A Climate-resilient Future *286*
References *286*

15 Global Water Availability and Its Consumption in a Changing Climate: Management Strategies *291*
Madhupriya, Sushil Kumar, Gavendra Pandey, Rakesh Kumar, and Sudesh Yadav
15.1 Introduction *291*
15.2 Global Water Availability and Consumption *292*
15.3 Interrelationship Between Water Scarcity and Climate Change *294*
15.3.1 Rising Temperature *294*
15.3.2 Changing Precipitation Pattern *295*
15.3.3 Inland Surface Water *295*
15.3.4 Groundwater Depletion *296*
15.3.5 Management Strategies for Water Scarcity in Changing Climatic Conditions *296*
15.3.6 Integrated Water Resources Management *296*
15.3.7 Desalination and Water Recycling *298*
15.3.8 Policies and Governance Initiatives *299*
15.4 Case Studies *300*

15.4.1 India: Water Scarcity and Management Strategies *300*
15.4.2 African Countries: The Challenge of Water Insecurity *300*
15.4.3 European Countries: Issue of Water Stress *301*
15.5 Conclusion *302*
References *302*

16 Rainwater Harvesting: Strategies for Combating Water Scarcity *311*
V.S. Yadav, R.V. Galkate, V.K. Chandola, V.K. Tripathi, Samikshya Panda, Chinmaya Panda, and Harshita Rani Ahirwar
16.1 Introduction *311*
16.1.1 RWH Technologies *315*
16.1.2 Potential of RWH Technology *317*
16.1.3 Benefits, Limitations, and Challenges of RWH Technology *318*
16.1.4 Necessity of RWH in India in Recent Times *319*
16.2 Hypothetical Case Study on Rooftop Rainwater Harvesting in Bengaluru City *319*
16.2.1 Problem Statement *320*
16.2.2 Study Area *320*
16.2.3 Case Study Description *321*
16.2.3.1 Annual Water Requirement *321*
16.2.3.2 Rainwater Collection Potential *322*
16.2.3.3 Potential of RWH on an Annual Basis *322*
16.3 Summary and Conclusion *324*
References *324*

17 Restoration Strategies for Rivers and Wetlands Affected by Overextraction of Water *331*
Vamsi Krishna Kudapa
17.1 Introduction *331*
17.2 Rivers and Wetlands Affected by Overextraction *332*
17.2.1 Hydrological Alterations *333*
17.2.1.1 Reduced Streamflow *333*
17.2.1.2 Drop in Groundwater Level *334*
17.2.1.3 Increasing Frequency of Drought *335*
17.2.1.4 Changes in Sediment Transport *335*
17.2.1.5 Decreased Water Quality: As Flows Decline, the Pollutant Concentrations Increase, Impacting Drinking Water Sources and Aquatic Habitats *337*
17.2.2 Ecological Consequences *338*
17.2.2.1 Plan to Reduce Damage to Wildlife Habitats by Reducing Water Overextraction *338*
17.2.2.2 Decreased Water Purification and Flood Control *338*
17.2.2.3 Alteration of Migration Patterns *339*
17.2.3 Socioeconomic Impacts *339*
17.2.3.1 Decrease in Fisheries and Agricultural Productivity *340*
17.2.3.2 More Water Conflicts in Related Disciplines *341*

17.2.3.3 Ecosystem Services Loss *341*
17.3 Restoration Strategies *341*
17.3.1 Hydrological Restoration *342*
17.3.1.1 Environmental Flow Release *342*
17.3.2 Ecological Engineering Strategies *344*
17.3.2.1 Wetland Restoration and Creation *344*
17.3.2.2 Riparian Buffer Zones *344*
17.3.2.3 Bioengineering Techniques *345*
17.3.3 Policy and Regulatory Actions *345*
17.3.3.1 Restoration Strategies for Water Resources from Overextraction *345*
17.3.3.2 Water Allocation Policies *345*
17.3.4 Integrated Water Resources Management *347*
17.3.4.1 Watershed Management Plans *347*
17.3.4.2 Stakeholder Engagement *347*
17.3.5 Legislative Frameworks *348*
17.4 Case Studies of Successful Restoration Efforts *348*
17.4.1 Case Study 1: The Murray–Darling Basin, Australia *348*
17.4.2 Case Study 2: Aral Sea Restoration, Kazakhstan *348*
17.4.3 Medina del Campo Groundwater Body, Spain *349*
17.5 Challenges and Future Perspectives *349*
17.6 Conclusion *350*
References *350*

Index *353*
