Preface to the Fourth Edition xi

Preface to the Third Edition xiii

Preface to the Second Edition xv

Preface to the First Edition xvii

About the Companion Website xix

1 Reading Nomenclature 1

1.1 Acyclic Polyfunctional Molecules, 2
1.2 Monocyclic Aliphatic Compounds, 3
1.3 Bridged Polycyclic Structures, 4
1.4 Fused Polycyclic Compounds, 6
1.5 Spiro Compounds, 10
1.6 Monocyclic Heterocyclic Compounds, 11
1.7 Fused-Ring Heterocyclic Compounds, 16
1.8 Bridged and Spiro Heterocyclic Compounds, 19
Resources, 20
Problems, 21
References, 22

2 Accessing Chemical Information **25**

2.1 Databases, 25
2.2 Chemical Literature, 26
2.3 Synthetic Procedures, 28
2.4 Health and Safety Information, 29
Problems, 32
References, 34

3 Stereochemistry **37**

3.1 Representations, 37
3.2 Vocabulary, 39
3.3 Property Differences Among Stereoisomers, 42
3.4 Resolution of Enantiomers, 46
3.5 Enantioselective Synthesis, 49
3.5.1 Chiral Templates, 50
3.5.2 Chiral Catalysts, 50
3.5.3 Chiral Reagents, 51
3.5.4 Substrate-Directed Enantioselective Reactions, 52
3.6 Reactions at a Stereogenic Atom, 53
3.6.1 Racemization, 53
3.6.2 Epimerization, 53
3.6.3 Inversion, 54
3.6.4 Retention, 55
3.6.5 Transfer, 56
3.7 Relative and Absolute Configurations, 57
3.8 Topism, 59
Resources, 63
Problems, 63
References, 70

4 Mechanisms and Predictions **75**

4.1 Reaction Coordinate Diagrams and Mechanisms, 75
4.2 The Hammond Postulate, 77
4.3 Methods for Determining Mechanisms, 78
4.3.1 Identification of Products and Intermediates, 78

4.3.2 Isotope Tracing, 78
4.3.3 Stereochemical Determination, 79
4.3.4 Concentration Dependence of Kinetics, 81
4.3.5 Isotope Effects in Kinetics, 90
4.3.6 Temperature Effects on Kinetics, 92
4.3.7 Substituent Effects on Kinetics, 94
4.4 Worked Examples, 100
4.4.1 Reactions in Basic Solutions, 100
4.4.2 Reactions in Acidic Solutions, 104
4.4.3 Free Radical Reactions, 108
4.4.4 Molecular Rearrangements, 111
Resource, 113
Problems, 114
References, 126

5 Electron Delocalization, Aromatic Character, and Pericyclic Reactions 129

5.1 Molecular Orbitals, 130
5.2 Aromatic Character, 136
5.3 Pericyclic Reactions, 141
5.3.1 Cycloaddition Reactions, 143
5.3.2 Electrocyclic Reactions, 148
5.3.3 Sigmatropic Reactions, 153
5.3.4 Ene Reactions, 156
5.3.5 Selection Rules for Pericyclic Reactions, 158
Resources, 159
Problems, 159
References, 167

6 Functional Group Transformations 171

6.1 Carboxylic Acids and Related Derivatives, 172
6.1.1 Carboxylic Acids, 172
6.1.2 Carboxylic Esters, 174
6.1.3 Carboxylic Amides, 176
6.1.4 Carboxylic Acid Halides, 176

6.1.5 Carboxylic Anhydrides, 176
6.1.6 Nitriles, 177
6.1.7 Ortho Esters, 178
6.2 Aldehydes, Ketones, and Derivatives, 179
6.2.1 Aldehydes, 179
6.2.2 Ketones, 182
6.2.3 Imines and Enamines, 182
6.2.4 Acetals, 183
6.2.5 Vinyl Ethers, 185
6.3 Alcohols, 186
6.4 Ethers, 187
6.5 Alkyl Halides, 189
6.5.1 Alkyl Chlorides and Alkyl Bromides, 190
6.5.2 Alkyl Iodides, 192
6.5.3 Alkyl Fluorides, 192
6.6 Amines, 194
6.7 Isocyanates, 195
6.8 Alkenes, 195
6.9 Reductive Removal of Functionality, 198
Resources, 199
Problems, 199
References, 206

7 Carbon–Carbon Bond Formation 213

7.1 Carbon–Carbon Single-Bond Formation, 214
7.1.1 Reactions in Basic Solutions, 214
7.1.2 Reactions in Acidic Solutions, 221
7.1.3 Organometallic Coupling Reactions, 224
7.2 Carbon–Carbon Double-Bond Formation, 226
7.3 Multibond Processes, 229
Resources, 231
Problems, 232
References, 238

8 Planning Multistep Syntheses 243

8.1 Retrosynthetic Analysis, 243
8.2 Disconnection at a Functional Group or a Branch Point, 244

8.3 Cooperation for Difunctionality, 248
8.4 Ring Closure, 258
8.5 Acetylide Alkylation and Addition, 262
8.6 The Diels–Alder Reaction, 264
8.7 The Claisen Rearrangement, 268
8.8 Asymmetric Synthesis, 272
8.9 Synthetic Strategies, 273
8.10 Final Note, 276
Resources, 276
Problems, 277
References, 282

9 Physical Influences on Reactions 289

9.1 Unimolecular Reactions, 290
9.2 Homogeneous Two-Component Reactions, 291
9.3 Temperature Effects, 292
9.4 Pressure Effects, 294
9.5 Solvent Effects, 295
9.6 Biphasic Reactions, 296
9.6.1 Phase-Transfer Catalysis, 296
9.6.2 Increasing Solubility, 299
9.6.3 Increasing Surface Area, 299
9.6.4 Flow Chemistry, 300
9.6.5 Ultrasound, 301
9.7 Reactions on Chemical Supports, 302
9.8 Using Unfavorable Equilibria, 305
9.9 Green Chemistry, 307
Resources, 308
Problems, 309
References, 312

10 Survey of Organic Spectroscopy 317

10.1 Electromagnetic Radiation, 317
10.2 Ultraviolet Spectroscopy, 319
10.2.1 Origin of the Signals, 319
10.2.2 Interpretation, 320
10.2.3 Visible Spectroscopy, 320

10.3 Infrared Spectroscopy, 322
10.3.1 Origin of the Signals, 322
10.3.2 Interpretation, 322
10.4 Mass Spectrometry, 324
10.4.1 Origin of the Signals, 324
10.4.2 Interpretation, 325
10.5 NMR Spectroscopy, 326
10.5.1 Origin of the Signals, 327
10.5.2 Interpretation of Proton NMR Spectra, 330
10.6 Carbon NMR Spectra, 342
10.6.1 General Characteristics, 343
10.6.2 Interpretation of ^{13}C NMR Spectra, 345
10.7 Correlation of ^{1}H and ^{13}C NMR Spectra, 348
Resources, 350
Problems, 350
References, 357

Appendix A Common Chemical Abbreviations 359

Appendix B Common Protecting Groups 365

Appendix C Answers to Selected Problems 371

Index 415
