Contents

I. Compound Potentials of the Brain: From the Invertebrate Ganglion to the Human Brain

Compound Potentials of the Brain, Ongoing and Evoked: Perspectives from Comparative Neurology
T. H. Bullock (With 8 Figures) 3

Nonlinear Neural Dynamics in Olfaction as a Model for Cognition
W. J. Freeman (With 3 Figures) 19

EEG – Dynamics and Evoked Potentials in Sensory and Cognitive Processing by the Brain
E. Başar (With 15 Figures) 30

Electrophysiological and Radiographic Evidence for the Mediation of Memory by an Anatomically Distributed System
E. R. John (With 20 Figures) 56

Recent Advances in Neurocognitive Pattern Analysis
A. S. Gevins (With 8 Figures) 88

Dynamic Changes in Steady-State Responses
R. Galambos and S. Makeig (With 14 Figures) 103

Cortical Structure and Electrogenesis
H. Petsche, H. Pockberger, and P. Rappelsberger (With 9 Figures) 123

Evoked Potentials and Their Physiological Causes: An Access to Delocalized Cortical Activity
U. Mitzdorf (With 5 Figures) 140

II. Field Potentials and Nonlinear Dynamics: Do New Models Emerge?

Electromagnetic Field Interactions in the Brain
W. R. Adey (With 8 Figures) 157

Global Contributions to Cortical Dynamics: Theoretical and Experimental Evidence for Standing Wave Phenomena
P. L. Nunez (With 2 Figures) 173

Gross Electrocortical Activity as a Linear Wave Phenomenon, with Variable Temporal Damping
J. J. Wright, R. R. Kydd, and G. J. Lees (With 3 Figures) 183

Chaotic Dynamics in Brain Activity
A. Babloyantz (With 3 Figures) 196

The EEG is Not a Simple Noise: Strange Attractors in Intracranial Structures
J. Röschke and E. Başar (With 7 Figures) 203

III. New Scopes at the Cellular Level

Assessment of Cooperative Firing in Groups of Neurons: Special Concepts for Multiunit Recordings from the Visual System
R. Eckhorn and H. J. Reitboeck (With 7 Figures) 219

Generation of Fast and Slow Field Potentials of the Central Nervous System – Studied in Model Epilepsies
E.-J. Speckmann and J. Walden (With 5 Figures) 228

IV. Cognitive Potentials

The Many Faces of Neuroreductionism
G. Werner 241

The Endogenous Evoked Potentials
T. W. Picton (With 3 Figures) 258

Cognitive Processing in the EEG
H. Pockberger, P. Rappelsberger, and H. Petsche (With 5 Figures) 266

An Analysis of Preparation and Response Activity in P300 Experiments in Humans
H. G. Stampfer and E. Başar (With 11 Figures) 275

The CNV Potentials and Adaptive Preparatory Behaviour
D. Papakostopoulos (With 5 Figures) 287

V. Magnetic Fields of the Brain

Magnetic Fields from the Human Auditory Cortex
K. SAERMARK, J. LEBECH, and C. K. BAK (With 3 Figures) 299

Interpretation of Cerebral Magnetic Fields Elicited by Somatosensory Stimuli
R. HARI (With 4 Figures) 305

Auditory Evoked Magnetic Fields
M. HOKE (With 3 Figures) 311

VI. Clinical Applications

Iterative Estimation of Single-Trial Evoked Potentials
H. J. HEINZE, H. KÜNKEL, and M. SCHOLZ (With 8 Figures) 321

Auditory Evoked Potentials: Topodiagnostic Value, Spatiotemporal Aspect, and Phase Problem (Rarefaction Versus Condensation)
K. MAURER (With 8 Figures) 333

VII. Workshop: How Brains May Work

Organizers: E. BAŞAR and T. MELNECHUK

Introduction
T. MELNECHUK 347

The Brain-Wave Model as a Protosemantic Model
W. LEINFELLNER 349

How May Brains Work? A View from Comparative Physiology
T. H. BULLOCK 354

Thoughts on "How Brains May Work": The Truism, the Guess, and the Prediction
R. GALAMBOS 359

Do EEG-like Processes Influence Brain Function at a Physiological Level?
W. R. ADEY (With 4 Figures) 362

Resonating Fields in the Brain and the Hyperneuron
E. R. JOHN (With 10 Figures) 368

A Watershed in the Study of Nonlinear Neural Dynamics
W. J. FREEMAN 378

Thoughts on Brain's Internal Codes
E. BAŞAR (With 2 Figures) 381

Overview of Methodology
W. J. FREEMAN 385

Epilogue

Brain Waves, Chaos, Learning, and Memory
E. BAŞAR 395
