Contents

1 **Cellular Response to Radiation: Experimental**
N. J. McNally 1

2 **Radiation Response of Tumours: Experimental**
P. R. Twentyman 9

3 **Normal Tissue Response to Radiation: Experimental**
J. Denekamp 17

4 **Measurement of Human Normal Tissue and Tumour Responses**
G. Ross and J. R. Yarnold 31

5 **Late Effects of Radiation in Man**
R. J. Berry 47

6 **Principles of Fractionation in Radiotherapy**
J. F. Fowler 53

7 **Fractionation in the Clinic**
M. V. Williams 59

8 **Radiation Resistance and the Dose-Rate Effect: Experimental**
G. G. Steel and A. Horwich 73

9 **Low Dose Rate in Clinical Radiotherapy**
A. Horwich, P. Blake and G. G. Steel 81

10 **Total Body Irradiation: Normal Tissue Effects**
L. S. Constine and P. Rubin 95

11 Total Body Irradiation: Clinical Aspects
A. Barrett 123

12 Particle Therapy: Physics and Biology
D. K. Bewley 129

13 Clinical Aspects of Particle Therapy
H. M. Warenius and R. D. Errington 137

14 Radiation Sensitizers and Related Compounds: New Approaches to Modification of Radiation Response
G. Adams and I. J. Stratford 153

15 Radiation Sensitizers in Clinical Radiotherapy
S. Dische 165

16 Combined Treatment with Radiation and Anti-Cancer Drugs: Experimental and Clinical Results
H. Bartelink, A. C. Begg, L. Dewit and F. A. Stewart 177

17 Biological Aspects of Hyperthermia
S. B. Field 201

18 Clinical Hyperthermia: Methods and Results
N. M. Bleehen and G. C. W. Howard 209

19 Monoclonal Antibodies in the Diagnosis and Treatment of Cancer
L. W. Brady, D. V. Woo, A. M. Markoe, H. Koprowski and C. T. Miyamoto 233

Subject Index 243
