Contents

Introduction ix
Hints for Users xi
Acknowledgments xiii

I. Recapitulation of the Essence of the Present Day Views Regarding the Gross Morphology and Morphogenesis of the Human Kidney 1
II. The Renal Artery and Its Autonomous Territories (Suprasegments, Segments, and Subsegments) 15
III. Development of the Lobes—First Ideas of a Basic Lobe (or Protolobe) 65
IV. Evolution of the Protolobe Concept 71
V. General Morphology of the Protolobes 97
VI. Quantitative Morphology of the Protolobes 107
VII. Statistical Morphology of the Kidney 121
VIII. Anatomic, Radiologic, and Physiologic Recognition of the Protolobe Boundaries . 141
IX. Protolobes of Exceptional and "Pathologic" Kidneys 185
X. Subdivision of the Protolobes Into Lobes 197
XI. Renal Arterial Units Revisited 209
XII. The Pelvicalyceal System and Its Relation to the Protolobes 215
XIII. The Ureteric Tree: Its Incorporation Into the Pelvicalyceal System 239
XIV. Morphology of the Medulla as a Sign of Subdivision of the Higher-Order Derivatives of the Ureteric Tree 263
XV. Critical Review of the Literature About Parts of the Human Kidney 293
XVI. Morphologic and Functional Units of the Kidney 351
XVII. Practical Anatomy and Applications 415
XVIII. Total Parenchymal and Cortical Weight of the Kidney With Description of Two Kidney Types of Differing Corticomedullary Ratios (F and L Kidneys): Summary of the Quantitative Morphology of the Kidney 427
XIX. Growth and Shape of the Kidney, the Hilus, and the Sinus 455
XX. Embryology of the Kidney 495
XXI. Critical Evaluation and Reformulation of the Nephronogenesis Theories of Oliver and Potter 551
XXII. Morphogenesis of the Kidney: A Comprehensive Hypothesis Explaining the Structure of the Kidney Based on All Evidence 603
XXIII. Importance of the Developmental Process for the Classification of Congenital and Hereditary Anomalies of the Kidney and Feedback for Understanding Normal Morphogenesis and Its Genetic Control 633
XXIV. Descriptive and Morphogenetic Synthesis of the Structure of the Kidney 685
