Preface xiii

CHAPTER 1

Basic Concepts in Immunology and Immunopathology 1

Immune Cells 1

Immunogenetics 3

Induction of Humoral Immunity 3

Induction of Cell-Mediated Immunity 6

Secondary Immune Responses 10

Immunologic Regulation 10

Mechanisms of Immunologic Injury 11

References 15

CHAPTER 2

Immunology and the Central Nervous System 17

Anatomy and Physiology of the Blood-Brain Barrier 17

Pathologic Alterations in the Blood-Brain Barrier 20

Immunologic Injury in the CNS 22

References 24

CHAPTER 3

Clinical Aspects of Neuroimmunologic Disease 27

Multiple Sclerosis 27

Progressive Multifocal Leukoencephalopathy 31

Subacute Sclerosing Panencephalitis 31

Polymyositis/Dermatomyositis 32

Myasthenia Gravis 33

Guillain-Barré Syndrome 34

Polyneuropathy and IgM Monoclonal Gammopathy 34

Cogan's Syndrome 34

Autoimmune Inner Ear Disease 35

References 35

CHAPTER 4

Histopathology of Neuroimmunologic Diseases 39

Multiple Sclerosis 39

Polymyositis and Allied Idiopathic Inflammatory Myopathies 48

References 59

CHAPTER 5

Laboratory Analysis of Cerebrospinal Fluid 65

Detection of Oligoclonal IgG 66

Determination of CNS IgG Synthesis 68

Myelin Basic Protein Determination 70

Angiotensin-Converting Enzyme Determination 72

Other CSF Assays 73

References 75

Procedure 1. Oligoclonal Band Determination by Isoelectrofocusing 79

Procedure 2. Oligoclonal Band Determination by Electrophoresis and Immunofixation 87

Procedure 3. Calculation of CNS IgG Synthesis 97

Procedure 4. Radioimmunoassay for Myelin Basic Protein 100

CHAPTER 6

Laboratory Analyses of Blood 105

Detection of Autoimmunity to Muscle 105

Detection of Autoimmunity to Nervous System Components 108

Nonspecific Assays of Humoral Immunity 109

Nonspecific Assays of Cell-Mediated Immunity 109

Summary 111

References 113

Appendix 1. Abbreviations 117

Appendix 2. Manufacturers 119
