Table of Contents

Foreword vii

Preface ix

Acknowledgment x

Section 1
Basic Challenges of Data Management in Graph Databases

Chapter 1
Graph Representation 1
D. Dominguez-Sal, Universitat Politècnica de Catalunya, Spain
V. Muntés-Mulero, Universitat Politècnica de Catalunya, Spain
N. Martínez-Bazán, Universitat Politècnica de Catalunya, Spain
J. Larriba-Pey, Universitat Politècnica de Catalunya, Spain

Chapter 2
The Graph Traversal Pattern 29
Marko A. Rodriguez, AT&T Interactive, USA
Peter Neubauer, Neo Technology, Sweden

Chapter 3
Data, Storage and Index Models for Graph Databases 47
Srinath Srinivasa, International Institute of Information Technology, India

Chapter 4
An Overview of Graph Indexing and Querying Techniques 71
Sherif Sakr, University of New South Wales, Australia
Ghazi Al-Naymat, University of Tabuk, Saudi Arabia

Chapter 5
Efficient Techniques for Graph Searching and Biological Network Mining 89
Alfredo Ferro, Università di Catania, Italy
Rosalba Giugno, Università di Catania, Italy
Alfredo Pulvirenti, Università di Catania, Italy
Dennis Shasha, Courant Institute of Mathematical Sciences, USA

Chapter 6
A Survey of Relational Approaches for Graph Pattern Matching over Large Graphs 112
Jiefeng Cheng, The University of Hong Kong, China
Jeffrey Xu Yu, The Chinese University of Hong Kong, China

Chapter 7
Labelling-Scheme-Based Subgraph Query Processing on Graph Data 142
Hongzhi Wang, Harbin Institute of Technology, China
Jianzhong Li, Harbin Institute of Technology, China
Hong Gao, Harbin Institute of Technology, China

Section 2
Advanced Querying and Mining Aspects of Graph Databases

Chapter 8
G-Hash: Towards Fast Kernel-Based Similarity Search in Large Graph Databases 176
Xiaohong Wang, University of Kansas, USA
Jun Huan, University of Kansas, USA
Aaron Smalter, University of Kansas, USA
Gerald H. Lushington, University of Kansas, USA

Chapter 9
TEDI: Efficient Shortest Path Query Answering on Graphs 214
Fang Wei, University of Freiburg, Germany

Chapter 10
Graph Mining Techniques: Focusing on Discriminating between Real and Synthetic Graphs 239
Ana Paula Appel, Federal University of Espirito Santo at São Mateus, Brazil
Christos Faloutsos, Carnegie Mellon University, USA
Caetano Traina Junior, University of São Paulo at São Carlos, Brazil

Chapter 11
Matrix Decomposition-Based Dimensionality Reduction on Graph Data 260
Hiroto Saigo, Kyushu Institute of Technology, Japan
Koji Tsuda, National Institute of Advanced Industrial Science and Technology (AIST), Japan

Chapter 12
Clustering Vertices in Weighted Graphs 285
Derry Tanti Wijaya, Carnegie Mellon University, USA
Stephane Bressan, National University of Singapore, Singapore

Chapter 13
Large Scale Graph Mining with MapReduce: Counting Triangles in Large Real Networks 299
Charalampos E. Tsourakakis, Carnegie Mellon University, USA

Chapter 14
Graph Representation and Anonymization in Large Survey Rating Data 315
Xiaoxun Sun, Australian Council for Educational Research, Australia
Min Li, University of Southern Queensland, Australia

Section 3
Graph Database Applications in Various Domains

Chapter 15
Querying RDF Data 335
Faisal Alkhateeb, Yarmouk University, Jordan
Jérôme Euzenat, INRIA & LIG, France

Chapter 16
On the Efficiency of Querying and Storing RDF Documents 354
Maria-Esther Vidal, Universidad Simón Bolívar, Venezuela
Amadís Martínez, Universidad Simón Bolívar & Universidad de Carabobo, Venezuela
Edna Ruckhaus, Universidad Simón Bolívar, Venezuela
Tomas Lampo, University of Maryland, USA
Javier Sierra, Universidad Simón Bolívar, Venezuela

Chapter 17
Graph Applications in Chemoinformatics and Structural Bioinformatics 386
Eleanor Joyce Gardiner, University of Sheffield, UK

Chapter 18
Business Process Graphs: Similarity Search and Matching 421
Remco Dijkman, Eindhoven University of Technology, The Netherlands
Marlon Dumas, University of Tartu, Estonia
Luciano García-Bañuelos, University of Tartu, Estonia

Chapter 19
A Graph-Based Approach for Semantic Process Model Discovery 438
Ahmed Gater, Universite de Versailles Saint-Quentin en Yvelines, France
Daniela Grigori, Universite de Versailles Saint-Quentin en Yvelines, France
Mokrane Bouzeghoub, Universite de Versailles Saint-Quentin en Yvelines, France

Chapter 20
Shortest Path in Transportation Network and Weighted Subdivisions 463
Radwa Elshawi, National ICT Australia (NICTA) - University of Sydney, Australia
Joachim Gudmundsson, National ICT Australia (NICTA) - University of Sydney, Australia
