I. RESPONSE OF THE NEURON TO NERVE INJURY

A. PRESENTATIONS: PAPERS

Target-Dependence of the Survival and Electrophysiological Properties of Spinal Motoneurons in the Mammal
Motoy Kuno 3

The Response of Ganglionic Neurones to Axotomy
Peter A. Smith, Jacob Shapiro, Sunil Gurtu, Melanie E.M. Kelly, and Tessa Gordon 15

Transport of Cytoskeletal Proteins Into Axonal Sprouts During Nerve Regeneration
Irvine G. McQuarrie 25

Growth-Associated Proteins (GAPs) and Axonal Regeneration
M.A. Bisby, J.D. Redshaw, R.C. Carlsen, T.A. Reh, and H. Zwiers 35

An Electrophysiological Study of Regenerating Motor Endings in the Mouse
Alberto Mallart and Denise Angaut-Petit 53

Transneuronal, Peripheral, and Central Mechanisms for the Induction of Sprouting
Shlomo Rotshenker 63

B. POSTER: ABSTRACTS

Testosterone Prevents Axotomy-Induced Motoneuron Death in Adult Rats
Wan-hua Amy Yu 79

Axotomy Produces Dedifferentiation but not Repetitive Discharge in Hamster Dorsal Root Ganglion Cells
S. Gurtu and P.A. Smith 80

Plasticity of Motor Reflexes After Neonatal Nerve Injury in the Rat
R. Navarrete, U. Shahani, and G. Vrbova 82

Protein Changes in the Axotomized Facial and Hypoglossal Nucleus of the Rat
W. Tetzlaff, M.A. Bisby, and G.W. Kreutzberg 83

Structural and Functional Properties of the Junction Between the Parent and Regenerating Portions of Myelinated Axons
R.E. Snyder, H. Chan, and R.S. Smith 84

Incorporation of ^{32}P Into Nucleotides of Regenerating Rat Dorsal Root Ganglia
Jacob Sjoberg and Martin Kanje 86

Aspects of the Regeneration of Myelinated Axons Studied by Computer-Enhanced Light Microscopy
R.S. Smith and H. Chan 87

II. ROLE OF NON-NEURAL CELLS AND EXTRACELLULAR MATRIX IN REGENERATION

A. PRESENTATIONS: PAPERS

Axonal Control of Schwann Cell Differentiation
Rhona Mirsky and Kristjan R. Jessen 91

Interactions of Growing Axons With Fibronectin and Laminin
Paul C. Letourneau 99

Influence of the Acellular Fibrin Matrix on Nerve Regeneration Success Within the Silicone Chamber Model
Lawrence R. Williams, Nils Danielsen, Harald Müller, and Silvio Varon . . 111

III. SURGICAL REPAIR AND RECOVERY OF FUNCTION

A. PRESENTATIONS: PAPERS

The Efficiency of the Different Kinds of Muscle Reinnervation
Manfred Frey 125

Reorganization of Motor Unit Properties After Surgical Repair and Reinnervation of Human Nerves
Richard B. Stein 135

Functional Studies of Central Nervous System Neurons Regenerating Axons Into Peripheral Nerve Grafts
Susan A. Keirstead, Michael Rasminsky, Manuel Vidal-Sanz, and Albert J. Aguayo 143

Prediction of Functional Recovery After Nerve Injury Through a New Theory of Nerve Regrowth
Luis de Medinaceli 157

The Importance of Appropriate Electrical Stimulation to Influence Denervated Muscle
Wilfred A. Nix 169

Recovery of Neural Function Due to Electrical Stimulation
L. Vodovnik, A. Stefanovska, S. Rebersěk, M. Gregorič, and N. Gros . . . 177

B. POSTERS: ABSTRACTS

Does Optimal Peripheral Nerve Regeneration Require Cells From the General Connective Tissue?
Chung-Bii Jenq and Richard E. Coggeshall 187

Peripheral Nerve Regeneration and Muscle Reinnervation in Alloxan-Induced Diabetes
F. Di Gregorio, R. Siliprandi, A. Schiavinato, C. Triban, and M. Fabris . . 188

Multielectrode Nerve Cuffs Reveal Growth and Maturation Rates of Group-Identified Regenerating Axons
C. Krarup and G.E. Loeb 189

Five Factors That May Aid Crushed Rat Sciatic Nerve Reconnection
J.C. de la Torre, M. Karaca, and Z. Merali 191

The Nerve Allograft Response: A Dose-Response Curve in the Rat Immunosuppressed With Cyclosporin A
J.R. Bain, S.E. Mackinnon, A.R. Hudson, R.E. Falk, J.A. Teodorczyk-Injeyan, and D.A. Hunter 192

Reversibility of a Neural Conduction Block Induced by Exposure to a Strong Electric Field-Influence of Different Experimental Conditions
R. Eickhorn, R. Stadler, and H. Antoni 194

Acceleration of Peripheral Nerve Regeneration
S. Pockett and B. Philip 195

Enhancement of Nerve Regeneration and Functional Recovery by D.C. Electrical Stimulation
J.M. Kerns and J.A. Freeman 197

The Effect of Electrical Stimulation on Reinnervation
W.A. Nix 198

IV. REINNERVATION OF TARGET ORGANS: SYNAPTOGENESIS

A. PRESENTATIONS: PAPERS

Transmitter Release and Synaptogenesis
Mu-ming Poo 203

Reorganization of Synaptic Inputs to Skeletal Muscle Fibers During Development and on Reinnervation
G. Vrbova 213

Synaptic Plasticity Following Motor Nerve Injury in Frogs
Alan D. Grinnell 223

Factors That Influence the Maintenance of Normal and Regenerating Axon Terminals
Yung-mae M. Yao 235

V. SENSORY AND MOTOR REINNERVATION

A. PRESENTATIONS: PAPERS

Structure-Function Relationships in Cat Muscle Spindles Reinnervation After Long-Term Denervation
D. Barker, J.J.A. Scott, and M.J. Stacey 249

Reinnervation of Muscle Spindles by Groups Ia and Ib Fibers is Consistent With Specificity in the Reinnervation Process
J.B. Munson, W.F. Collins III, and L.M. Mendell 259

Neurospecificity Following Sensory Nerve Regeneration
Kenneth Horch 269

To What Extent Can the Normal Organization of Motor Unit Properties be Reestablished After Muscle Reinnervation?
Tessa Gordon 275

Interactions Between Motoneurons and the Muscle Fibers They Innervate
R.C. Foehring, G.W. Sypert, and J.B. Munson 287

Effects of Different Patterns of Long-Term Stimulation on Properties of Cat's Fast Muscle
Daniel Kernell 297

The Effect of Long-Term Electrical Stimulation on Fast Muscles With Limited Blood Supply—Degeneration and Regeneration
O. Hudlicka, S. Price, H. Hoppeler, E. Uhlmann, and S. Egginton 307

B. POSTERS: ABSTRACTS

Motoneuron-Target Interactions During Regeneration
R. Butler 319

Regeneration of Trochlear Fibres Into the IVth Nerve Rootlet From the Central Nervous System
M. Berry, L. Donnelly, S. Standring, A. Derouiche, and J. Sievers 320

Improved Morphological and Functional Recovery of Skeletal Muscle Grafts
Richard C. Carlsen, Howard Klein, and Ira Gourley 322

A Study on the Regeneration Specificity of Rat Sympathetic Preganglionic Nerves
C.W. Hua, J.Z. Wang, C. Liu, and Q. Liu 323

Long-Term Survival and Reinnervation of Allografted (Transplanted) Primate Skin Sensory Mechanoreceptors
D.D. Samulack, R.W. Dykes, and B.L. Munger 324

Sensory Reinnervation of Cat Muscle Spindles After Nerve Section
R.W. Banks, D. Barker, and M. J. Stacey 326
