Brief Contents

About the Author *xiii*
About the Artist and Cover Art *xiv*
Preface *xvi*
Acknowledgments *xxii*
About the Companion Website *xxiv*

Part I Chemical Bonding and Vibrational Modes *1*

1 Fundamentals of Quantum Mechanics *3*

2 Chemical Bonding *37*

3 Group Theory, Point Groups, and Vibrational Modes of Triatomic Gases *59*

Part II Chemical Reactivity and the Historic Progression from Regional to Global Anthropogenic Impacts: The Helsinki Protocol, The Montreal Protocol, and the Paris Agreement *91*

4 Molecular Orbital Theory and the Application of Electronic Structure Up to Polyatomic Molecules *93*

5 Methane, C-1 Chemistry, and Chlorofluorocarbons *121*

6 CO_2: Global Warming and Ocean Acidification *153*

Part III Greenhouse Gas Mitigation Strategies *187*

7 Greenhouse Gas Mitigation: The Methanol Economy and Methane Oxidation *189*

8 Artificial Photosynthesis I: Water Oxidation and Hydrogen Production *223*

9 Artificial Photosynthesis II: CO_2 Reduction and Solar Fuels *271*

10 Nitrogen Fixation and Ammonia Synthesis *317*

Afterword: Ultimately, It Distills to the Source of Energy and Its Rate of Consumption *349*
Appendix A: Point Groups Used in Chapters *353*
Index *357*
