CONTENTS

Preface xi

List of Abbreviations xiii

Periodic Table of the Elements xvii

1 Introduction 1

1.1 Why Study Organometallic Chemistry?, 2
1.2 Coordination Chemistry, 3
1.3 Werner Complexes, 5
1.4 The Trans Effect, 9
1.5 Soft Versus Hard Ligands and Metals, 11
1.6 The Crystal Field, 13
1.7 The Ligand Field, 24
1.8 Two-Electron, Three-Center Bonding, 26
1.9 Back Bonding, 26
1.10 Choice of Metals, 30
1.11 The sd^n Model and Hypervalent Bonding, 32
References, 37
Problems, 39

2 Making Sense of Organometallics 41

2.1 Valence Electron Counting, 41
2.2 The 18-Electron "Rule", 44
2.3 Electron Counting for Common Ligands, 45
2.4 Bridging Ligands, 49
2.5 Zero-Electron Ligands, 51
2.6 Limitations of the 18-Electron Rule, 54

2.7 Electron Counting in Reactions, 57
2.8 The Oxidation State Concept and its Limitations, 59
2.9 Coordination Number and Geometry, 65
2.10 Effects of Complexation on Ligands, 67
2.11 Differences between Metals, 71
2.12 Ligand Types, 76
2.13 Noninnocent Ligands and Ambiguous Oxidation States, 83
References, 85
Problems, 87

3 Alkyls, Aryls, and Hydrides **89**

3.1 Stability of Alkyls and Aryls, 89
3.2 Making Alkyls and Aryls, 98
3.3 Other σ-Bonded Ligands, 106
3.4 Metal Hydrides, 108
3.5 Sigma Complexes, 111
3.6 Metal-Ligand Bond Strengths, 115
References, 118
Problems, 121

4 Ligands and Substitution **123**

4.1 Metal Carbonyls: Structure and Bonding, 123
4.2 Metal Carbonyls: Synthesis and Reactivity, 127
4.3 Bridging Carbonyls and CO Analogues, 130
4.4 Nitrosyls, 132
4.5 Phosphines and Related P-Donor Ligands, 135
4.6 *N*-Heterocyclic Carbenes (NHC), 139
4.7 Dissociative Substitution, 140
4.8 Associative Substitution, 145
4.9 Redox Effects and Interchange Substitution, 147
4.10 Photochemical Substitution, 149
4.11 Other Factors in Substitution, 152
4.12 Metal-Ligand Cooperativity, 154
References, 155
Problems, 157

5 Pi-Complexes **159**

5.1 Alkene and Alkyne Complexes, 159
5.2 Allyl Complexes, 166
5.3 Diene Complexes, 170
5.4 Cyclopentadienyl Complexes, 172
5.5 Arenes and Related Ligands, 180
5.6 Metallacycles, 183
5.7 Polyene Versus Polyenyl Complexes, 184

5.8 Perfluorocarbon Ligands, 184
References, 185
Problems, 186

6 Oxidative Addition and Reductive Elimination 189

6.1 General Principles, 189
6.2 Concerted Additions, 192
6.3 S_N2 Pathways, 195
6.4 Radical Mechanisms, 197
6.5 Ionic Mechanisms, 200
6.6 Reductive Elimination, 202
6.7 Some Catalytic Applications of OA/RE Sequences, 208
6.8 Sigma Bond Metathesis, 212
6.9 Oxidative Coupling, 213
6.10 Ligand-Assisted 1,2-Additions and Eliminations, 214
References, 215
Problems, 216

7 Insertion and Elimination 219

7.1 Introduction, 219
7.2 1,1-Insertion, 221
7.3 1,2-Insertion, 226
7.4 Outer Sphere Insertions, 229
7.5 Beta Elimination and Related Processes, 231
7.6 Alkene Isomerization Catalysis, 233
7.7 Dehydrogenative Oxidation and Hydrogen Borrowing Catalysis, 236
References, 239
Problems, 240

8 Addition and Abstraction 243

8.1 Types of Reaction, 243
8.2 Nucleophilic Addition to CO, 246
8.3 Nucleophilic Addition to Polyenes and Polyenyls, 248
8.4 The Wacker Process, 252
8.5 Nucleophilic Abstraction and Deprotonation, 254
8.6 Electrophilic Addition and Abstraction, 256
8.7 Electron Transfer and Radical Pathways, 259
8.8 Proton-coupled Electron Transfer, 260
References, 263
Problems, 264

9 Homogeneous Catalysis 267

9.1 Catalytic Cycles, 268
9.2 Catalytic Hydrogenation, 275

9.3 Alkene Hydroformylation, 284
9.4 Alkene Hydrocyanation, 286
9.5 Alkene Hydrosilylation, 287
9.6 Cross-Coupling Reactions, 288
9.7 Oxidation Catalysis, 292
9.8 Electrocatalysis, 294
9.9 Photoredox Catalysis, 295
9.10 Catalyst Decomposition and Deactivation, 298
References, 299
Problems, 303

10 Physical Methods 307

10.1 Mechanism, 307
10.2 ^{1}H and ^{2}H NMR Spectroscopy, 309
10.3 ^{13}C NMR Spectroscopy, 315
10.4 ^{31}P NMR Spectroscopy, 315
10.5 Dynamic NMR, 318
10.6 Electron Paramagnetic Resonance Spectroscopy, 320
10.7 IR Spectroscopy, 323
10.8 Structure Determination, 327
10.9 Electrochemistry, 329
10.10 Computation, 330
10.11 Big Data, Artificial Intelligence, and Machine Learning, 331
10.12 Other Methods, 332
References, 334
Problems, 337

11 Carbenes, Carbynes, and M–L Multiple Bonding 339

11.1 Carbenes, 339
11.2 Carbynes, 350
11.3 Bridging Carbenes and Carbynes, 352
11.4 *N*-Heterocyclic Carbenes, 353
11.5 Carbide and Carbone Complexes, 357
11.6 Multiple Bonds to Heteroatoms, 358
References, 361
Problems, 362

12 Metathesis, Polymerization, and Bond Activation 365

12.1 Alkene Metathesis, 365
12.2 Alkene Dimerization, Oligomerization, and Polymerization, 372
12.3 Activation of CO and CO_2, 380
12.4 C–H Activation and Functionalization, 384
References, 390
Problems, 391

13 Green, Energy & Materials Applications 395

13.1 Green Chemistry, 395
13.2 Organometallics for an Alternative Energy Future, 401
13.3 Metal–Metal Bonds and Clusters, 404
13.4 Nanoparticles, 407
13.5 Organometallic Materials, 409
13.6 Supported Organometallics, 415
References, 417
Problems, 420

14 Organic Applications 423

14.1 Carbon–Carbon and Carbon-heteroatom Coupling, 424
14.2 C–H Activation and Late-stage Functionalization, 431
14.3 Metathesis of C=C Bonds, 436
14.4 Carbenes in Cyclopropanation and C–H Insertion, 438
14.5 Hydrogenation, 440
14.6 Oxidation, 442
14.7 Carbonylation, 444
14.8 Photoredox Catalysis, 445
14.9 Alkyne and Aryne Chemistry, 448
14.10 Radical Chemistry, 450
14.11 Hydroboration, 450
14.12 Electrosynthesis, 451
14.13 Isotope Exchange, 452
References, 453
Problems, 457

15 High Oxidation States, Magnetism, and the f-Block 461

15.1 High Oxidation States, 461
15.2 Magnetism and Spin States, 463
15.3 Cyclopentadienyl Complexes, 472
15.4 The f-block, 475
References, 484
Problems, 485

16 Bioorganometallic Chemistry 487

16.1 Introduction, 488
16.2 Coenzyme B_{12}, 495
16.3 Iron-sulfur Clusters, 501
16.4 Nitrogen Fixation, 504
16.5 Nickel Enzymes, 511
16.6 Applications to Chemical Biology, 516
16.7 Biomedical and Biocatalytic Applications, 517
References, 521
Problems, 524

Appendix A: Useful Texts on Allied Topics **527**

Appendix B: Major Reaction Types **529**

Answers **531**

Index **549**
