Prologue xv

Introduction **1**
I.1 Are humans exceptional? 1
I.2 Five beginnings 3
I.3 More-than-human geography 8
I.4 Multinaturalism 12
I.5 Why 'more-than' human? 13
I.6 The structure of the book 15

1 Humanism and its problems: situating the emergence of more-than-human geography **21**
1.1 Humanism 21
1.2 Humanism's dualist ontology: putting the human on a pedestal 23
1.3 Challenges to humanism's dualist ontology: scientific revelations 26
1.4 Humanism's rationalist epistemology: the mind in a vat 31
1.5 Challenges to humanism's epistemology 33
1.6 Humanism's politics: human rights, freedom, and progress 38
1.7 Challenges to the politics of humanism 39
1.8 Summary: humanism in binaries 44

2 More-than-human materialisms **52**
2.1 Human bodies 54
2.2 Animals, plants, and other organisms 60
2.3 Biological processes 63
2.4 Technologies and infrastructure 69
2.5 The elements: earth, fire, air, and water 73
2.6 Key characteristics of more-than-human materialisms 77
2.7 Conclusions 80

3 More-than-human knowledge practices **94**
3.1 Learn to be affected 95
3.2 Follow the things 103
3.3 Experiment 106
3.4 Engage publics to redistribute expertise 111
3.5 Make an alliance with science 117
3.6 Conclusions 120

4 More-than-human politics and ethics **132**
4.1 The (anti-)politics of nature: a case study 134
4.2 A politics of materials: technologies, elements, and organisms 138
4.3 A politics of multiple knowledges 144
4.4 A politics of relations and processes 152
4.5 The normative commitments of more-than-humanism 163
4.6 Conclusions 167

5 The tensions within and prospects for more-than-humanism **181**
5.1 With Marxist political ecology: dithering while the planet burns! 182
5.2 With black and indigenous studies: provincialising and decolonising more-than-humanism 188
5.3 With critical animal studies 195
5.4 With advocates for science and progress 200
5.5 Conclusions 205

Epilogue 215
Cooling down 215
Nature. Animal. Human. Science. 215
Appendix: Interview with Professor Dame Sarah Whatmore 218
