Preface **xi**
Acknowledgments **xiii**

I | CLINICALLY IMPORTANT HUMAN PARASITES **1**

1 | Philosophy and Approach to Diagnostic Parasitology **3**

2 | Intestinal Protozoa: Amebae **5**
Entamoeba histolytica **5**
Entamoeba hartmanni **17**
Entamoeba coli **17**
Entamoeba polecki **19**
Entamoeba gingivalis **20**
Endolimax nana **21**
Iodamoeba bütschlii **23**

3 | Intestinal Protozoa: Flagellates, Ciliates **26**
Giardia lamblia **26**
Dientamoeba fragilis **34**
Trichomonas hominis **36**
Trichomonas tenax **36**
Chilomastix mesnili **37**
Enteromonas hominis **37**
Retortamonas intestinalis **38**
Balantidium coli **38**

4 | Intestinal Protozoa: Coccidia, *Blastocystis hominis* **44**
Cryptosporidium spp. **44**
Isospora belli **50**
Sarcocystis **53**
Blastocystis hominis **54**

5 | Protozoa From Other Body Sites **62**
Naegleria fowleri **62**
Acanthamoeba spp. **66**
Trichomonas vaginalis **67**

6 | Tissue Protozoa **73**
Toxoplasma gondii **73**
Pneumocystis carinii **80**

7 | Malaria and *Babesia* spp. **87**
Malaria **87**
Babesia spp. **102**

8 | Leishmaniasis **109**
Introduction **109**
Leishmania tropica Complex **109**
Leishmania braziliensis Complex **114**
Leishmania mexicana Complex **115**
Leishmania donovani Complex **116**

9 | Trypanosomiasis **122**
Introduction **122**
Trypanosoma brucei gambiense **122**
Trypanosoma brucei rhodesiense **129**
Trypanosoma cruzi **130**
Trypanosoma rangeli **138**

10 | Intestinal Nematodes **143**
Introduction **143**
Ascaris lumbricoides **144**
Enterobius vermicularis **151**
Trichuris trichiura **154**
Capillaria philippinensis **156**
Hookworms *(Ancylostoma duodenale, Necator americanus)* **157**
Trichostrongylus spp. **160**
Strongyloides stercoralis **161**

11 | Tissue Nematodes **168**
Trichinella spiralis **168**
Toxocara canis or *T. cati* (Visceral Larva Migrans) **173**
Ancylostoma braziliense or *A. caninum* (Cutaneous Larva Migrans) **176**
Dracunculus medinensis **178**

Angiostrongylus cantonensis **179**
Angiostrongylus costaricensis **180**
Gnathostoma spinigerum **181**
Anisakis spp., *Phocanema* spp., *Contracaecum* spp. (Larval Nematodes Acquired From Saltwater Fish) **183**
Capillaria hepatica **184**
Thelazia spp. **185**

12 Filarial Nematodes **187**
Introduction **187**
Wuchereria bancrofti **192**
Brugia malayi **197**
Loa loa **198**
Mansonella ozzardi **200**
Mansonella perstans **200**
Mansonella streptocera **201**
Onchocerca volvulus **201**
Dirofilaria immitis **204**
Dirofilaria spp. **206**

13 Intestinal Cestodes **210**
Introduction **210**
Diphyllobothrium latum **210**
Taenia solium **216**
Taenia saginata **222**
Hymenolepis nana **225**
Hymenolepis diminuta **226**
Dipylidium caninum **227**

14 Tissue Cestodes: Larval Forms **230**
Echinococcus granulosus **230**
Echinococcus multilocularis **235**
Multiceps spp. (Coenurosis) **238**
Spirometra mansonoides, Diphyllobothrium spp. (Sparganosis) **240**

15 Intestinal Trematodes **243**
Introduction **243**
Fasciolopsis buski **245**
Echinostoma ilocanum **247**
Heterophyes heterophyes **248**
Metagonimus yokogawai **248**

16 Liver and Lung Trematodes **250**
Introduction **250**
Clonorchis sinensis **254**
Opisthorchis viverrini **255**
Fasciola hepatica **257**
Paragonimus westermani **258**

17 Blood Trematodes: Schistosomes **262**
Introduction **262**
Schistosoma mansoni **273**
Schistosoma japonicum **273**
Schistosoma mekongi **274**
Schistosoma haematobium **275**
Schistosoma intercalatum **276**

18 Unusual Parasitic Infections **279**
Protozoa **279**
Nematodes **281**
Cestodes **286**
Pentastomids **286**
Acanthocephalans **287**

19 Parasitic Infections and the Compromised Host **291**
Introduction **291**
Entamoeba histolytica **291**
Giardia lamblia **297**
Toxoplasma gondii **299**
Pneumocystis carinii **300**
Cryptosporidium **300**
Microsporidia **302**
Isospora belli **302**
Strongyloides stercoralis **303**

20 Nosocomial and Laboratory-Acquired Parasitic Infections **305**
Nosocomial Infections **305**
Laboratory Infections **306**
Summary **306**

21 Serodiagnosis of Parasitic Diseases **311**
Protozoal Infections **312**
Helminth Infections **320**
Intradermal Tests **321**

22 Histological Identification of Parasites **326**

23 Medically Important Arthropods **335**
Insecta **335**
Arachnida **346**
Other Arthropods **349**

24 | Treatment of Parasitic Infections **351**
Introduction **351**
Antiparasitic Drugs **359**

II | DIAGNOSTIC PROCEDURES **367**

25 | Collection and Preservation of Fecal Specimens **369**
Safety **369**
Fresh Specimen Collection **369**
Preservation of Specimens **371**
Shipment of Specimens **375**

26 | Macroscopic and Microscopic Examination of Fecal Specimens **377**
Physical Description **377**
Age **378**
Elements in Microscopic Examination **378**
Direct Smear **378**
Concentration Methods **380**
Sedimentation Procedures **381**
Flotation Procedure **382**
Commercial Fecal Concentration Devices **383**
Permanent Stained Smears **384**
Staining Behavior of Organisms **387**
Iron-Hematoxylin Stain **387**
Special Techniques for *Cryptosporidium* spp. and Other Coccidia **388**

27 | Additional Techniques for Stool Examination **392**
Culture of Larval-Stage Nematodes **392**
Egg Studies **395**
Search for Tapeworm Scolex **397**

28 | Examination of Other Specimens From the Intestinal Tract and the Urogenital System **398**
Examination for Pinworm **398**
Sigmoidoscopy Material **399**
Duodenal Contents **400**
Urogenital Specimens **401**

29 | Sputum, Aspirates, and Biopsy Material **403**
Sputum **403**
Aspirates **404**
Lymph Nodes, Spleen, Liver, Bone Marrow, Spinal Fluid, and Eye Specimens **407**

30 | Procedures for Detecting Blood Parasites **412**
Preparation of Thick and Thin Blood Films **412**
Thick Blood Films **413**
Thin Blood Films **413**
Combination Thick and Thin Films **413**
Staining Blood Films **414**
Giemsa's Stain **414**
General Notes on Staining Procedure **415**
Wright's Stain **416**
Proper Examination of Thick and Thin Blood Films **416**
Concentration Procedures **417**
Knott Concentration **417**
Gradient Centrifugation Technique **418**
Triple Centrifugation Method for Typanosomes **419**

31 | Parasite Recovery: Culture Methods, Animal Inoculation, and Xenodiagnosis **421**
Culture Methods **421**
Animal Inoculation **427**
Xenodiagnosis **428**

32 | Fixation and Special Preparation of Fecal Parasite Specimens and Arthropods **430**
Fixation of Parasite Specimens **430**
Preparation of Parasite Specimens and Arthropods for Study **433**
Mounting Arthropods for Examination **436**

33 | Artifacts That Can Be Confused With Parasitic Organisms **438**
Introduction **438**
Protozoa **438**
Human Cells **441**
Nonhuman Elements Seen in Feces **444**
Plant Material **444**
Other Confusing Artifacts **444**
Spurious Infections **444**

34 Quality Control Procedures for the Diagnostic Parasitology Laboratory **446**
Introduction **446**
Extent of Services Provided **446**
Proficiency Testing **446**
Quality Control **447**
Procedures and Tests **451**
Personnel/Physical Facilities **452**

Appendix **459**

Glossary **475**

Index **483**
