TABLE OF CONTENTS

Preface
Constance Weinstein xi

PART I **EXPERIMENTAL METHODS EMPLOYED IN THE STUDY OF ISOLATED ADULT CARDIAC MYOCYTES**

Myocardial metabolic methods
Howard E. Morgan 1

Isolation, Morphology and Long-Term Maintenance of Isolated Myocytes

Methods for the isolation and preparation of single adult myocytes
Trevor Powell 9

Cellular adhesion to artificial substrates and long term culture of adult cardiac myocytes
Thomas K. Borg, and Louis Terracio 14

Morphological approaches to the study of freshly isolated and cultured adult cardiac myocytes
Robert S. Decker, Marlene L. Decker, David G. Simpson, and Michael Lesch 25

Morphometry of cultured myocytes
Randy L. Moses, J. B. Delcarpio, and W. C. Claycomb 41

Immunohistochemical characterization of isolated and cultured cardiac myocytes
Louis Terracio, and Thomas K. Borg 54

Evaluation of anoxic injury in isolated adult cardiomyocytes
Hans Michael Piper 68

Biochemical, Molecular, and Metabolic Techniques Used in the Study of Isolated Myocytes

Measurement of solute uptake and transport in isolated cells
Robert A. Haworth, Atilla B. Goknur, and Herbert A. Berkoff 82

Characterization of hormone receptors on the adult cardiac myocyte
Iain L.O. Buxton, and Laurence L. Brunton 90

Measurement of pharmacological effects in isolated myocytes
Paul C. Simpson 108

Measurement of sarcolemmal permeability and intracellular pH, free magnesium, and high energy phosphates of isolated heart cells
Beatrice A. Wittenberg, Jeannette E. Doeller, Raj K. Gupta, and Roy L. White 118

Evaluation of rates of protein synthesis and degradation in isolated cardiac muscle cells
William A. Clark, and Allen M. Samarel 131

Spatial distribution of myosin mRNA in cardiac tissue by in situ hybridization techniques
David J. Dix, and Brenda R. Eisenberg 147

Analysis of muscle protein expression with monoclonal antibodies and cDNA probes
Naoji Toyota, G. Raman, Arlene Sanchez, Joseph Bisaha, Steven Wylie, Rachel Rempel, and David Bader 161

Physiology, Electrophysiology and Contraction of Isolated Myocytes

Measurement and interpretation of contraction in isolated cardiac cells
John W. Krueger 172

A technique for measuring cytosolic free Ca^{2+} with indo-1 in feline myocytes
W. H. duBell, C. M. Philips, and S. R. Houser 187

Whole cell voltage clamp techniques and the measurement of currents in the isolated heart cell preparation
R. L. White 202

PART II RESEARCH REPORTS

Biochemistry and Metabolism

Introduction: Biochemistry of isolated myocytes
Beatrice A. Wittenberg, and Robert A. Haworth 211

A new function of myoglobin revealed in cardiac myocytes
Beatrice A. Wittenberg, and Jonathan B. Wittenberg 216

Mechanism of H_2O_2-induced acceleration of calcium influx into isolated rat heart myocytes
T. Kaminishi, and K. J. Kako 220

Oxidative stress in the myocardium. A study on the mechanism(s) for cytotoxicity
Bo S. Andersson, Monica Sundberg, and Jovan Rajs 224

Use of isolated adult cardiac myocyte technique to calculate per cell activity of creatine kinase in normal and hypertrophied myocardium
Shirley H. Smith, Martha F. Kramer, Ilana Reis, Sanford P. Bishop, and Joanne S. Ingwall 228

Degradation and resynthesis of adenine nucleotides in adult rat heart myocytes: role of the purine nucleotide cycle
Ruth A. Altschuld, Lili M. Gamelin, Robert E. Kelley, Dorothy K. Wimsatt, Lynn E. Apel, and Gerald P. Brierley 232

The effects of oxygen deprivation and volume restriction on the metabolism of cultured heart cells
Arie Pinson, Ramesh Vemuri, Marcel Mersel, and J. W. De Jong 236

Hormonal action on glucose oxidation by freshly isolated cardiac myocytes from acutely diabetic rats
Victor Chen, and Evans Downing 240

Insulin receptors and glucose transport in isolated adult cardiac myocytes: Signaling pathways and diabetes induced alterations
Jurgen Eckel, and Hans Reinauer 244

Alpha$_1$-adrenergic receptor signal transduction in the adult rat cardiac myocyte
Iain L.O. Buxton, and Kurt O. Doggwiler 248

Beta-receptor density and function are maintained by adult cardiac myocytes as they progress into culture
Evy Lundgren, Louis Terracio, Donald O. Allen, and Thomas K. Borg 253

Guanine nucleotide-regulated inositol polyphosphate production in adult rat cardiomyocytes
Linda G. Jones, and Joan Heller Brown 257

Isoproterenol has no effect on heparin-releasable lipoprotein lipase activity in cardiac myocytes from adult rats
David L. Severson, Rogayah Carroll, and Mark Lee 261

Culture and Morphology

Introduction: Cell and molecular biology of cultured adult cardiac myocytes
Radovan Zak, Robert S. Decker, and William A. Clark 265

Protein expression in cultured adult rat cardiac myocytes
Lawrence B. Bugaisky, R. S. Hall, S. B. Thompson, and Radovan Zak 268

Isolation and culture of human adult cardiac myocytes
Lawrence B. Bugaisky 272

Influence of tissue culture conditions on cardiomyocyte development in vitro
Stuart L. Jacobson, H. Michael Piper, and Peter Schwartz 276

Differential regulation of cardiac myosin heavy chain gene promoters
L. L. Cribbs, N. Shimizu, C. E. Yockey, S. Jakovcic, and P. K. Umeda 280

"Dedifferentiation" of the cultured adult cardiac muscle cell by TPA
William C. Claycomb 284

Structural organization, DNA synthesis and expression of myosin isoforms in adult cardiac muscle cells in culture
Asish C. Nag, and Mei Cheng 288

Protein synthesis in cultured adult rabbit cardiac myocytes
J. Haddad, A. M. Samarel, M. L. Decker, M. Lesch, and R. S. Decker 292

Biosynthesis and reorganization of laminin and collagen type IV in adult cardiac myocytes in vitro
Louis Terracio, Evy Lundgren, Thomas K. Borg, and Kristofer Rubin 297

Subcellular remodeling of adult cardiac myocytes in cell culture
David G. Simpson, Marlene L. Decker, and Robert S. Decker 301

Ultrastructural alteration of cultured adult rat ventricular cardiac myocytes by TPA and diacylglycerols
R. L. Moses, and W. C. Claycomb 306

Visualization of membrane and cytoskeletal proteins in permeabilized isolated adult cardiac myocytes by immunohistochemical and morphological methods
D. A. Messina, Y. Isobe, M. Delmar, and L. F. Lemanski 310

Cell-surface bound laminin mediates attachment of isolated adult myocytes to collagen type IV
Evy Lundgren, Louis Terracio, Donald Gullberg, Thomas K. Borg, and Kristofer Rubin 314

A study of adult rat atrial myocyte attachment to extracellular matrix components and long term culture
Kathryn K. McMahon 318

Calcium Metabolism and Kinetics

Introduction: Calcium metabolism and kinetics
Steven R. Houser 322

Measurement of spontaneous and electrically stimulated Ca^{2+} transients in single rat ventricular myocytes
Jonathan R. Monck, Kumpei Kobayashi, Olaf Bjornsson, and John R. Williamson 328

X-ray microprobe analysis of elemental distribution in isolated guinea-pig ventricular myocytes shock-frozen under voltage-clamp conditions
Maria F. Wendt-Gallitelli, and Gerrit Isenberg 332

Cytosolic free Ca^{2+} in single cardiomyocytes: effects of anoxia and reoxygenation
Peter Cobbold, and Ashley Allshire 336

Aequorin measurements of cytosolic free Ca^{2+} in single cardiomyocytes: techniques
Peter Cobbold, and Ashley Allshire 339

Cation and membrane potential alterations in energy depleted cardiac myocytes
Qian Li, Ruth A. Altschuld, Bruce A. Biagi, and Bradford T. Stokes 342

Control of Ca and Mn influx in isolated adult rat heart cells
Robert A. Haworth, Atilla B. Goknur, and Herbert A. Berkoff 346

The relationship between the cytosolic Ca^{2+} transient and cell length during the twitch in single adult cardiac myocytes
Harold A. Spurgeon, Gunther Baartz, Maurizio C. Capogrossi, Stefano Raffaeli, Michael D. Stern, and Edward G. Lakatta 350

The voltage dependence of the myoplasmic calcium transient in guinea pig ventricular myocytes is modulated by sodium loading
Gerrit Isenberg, Harold Spurgeon, Antti Talo, Michael Stern, Maurizio Capogrossi, and Edward Lakatta 354

$[Ca^{2+}]_i$-transients, measured with fura-2, in isolated guinea-pig ventricular myocytes
Withrow G. Wier, L. Barcenas-Ruiz, and D. J. Beuckelmann 358

The relationship of calcium current, sarcoplasmic reticulum function and contraction in single rat ventricular myocytes excited in the rested state
Antti Talo, Harold A. Spurgeon, and Edward G. Lakatta 362

Voltage dependent changes in intracellular calcium in single cardiac myocytes measured with fluorescent calcium indicators
J. R. Berlin, M. B. Cannell, and W. J. Lederer 366

Temporal variation in contractile state and $[Ca^{2+}]_i$ in isolated adult rat and guinea pig cardiac myocytes
Donghee Kim, and Thomas W. Smith 370

Physiology and Contractility

Introduction: Biophysics of the isolated cell
Page A.W. Anderson, and Roy L. White 374

Effects of perinatal development on the contractile performance of isolated rat cardiac myocytes
Merrill Tarr, and Russell T. Dowell 382

Contractile function of isolated rat and human heart cells
Robert A. Haworth, Atilla B. Goknur, and Herbert A. Berkoff 386

Contractile and biochemical properties of rat cardiac myocytes isolated using nonspecific protease
Russell T. Dowell, and Merrill Tarr 390

Time course of electrophysiological properties and concentration of sodium and potassium in cultured adult rat cardiac myocytes
Stuart L. Jacobson, Alexander E. Juhasz, and Adrian Sculptoreanu 394

High speed digital imaging of rat cardiac myocyte contractile dynamics
Kenneth P. Roos, and Stuart R. Taylor 398

Physiology and ultrastructure of the intact isolated ventricular myocyte
Rashid Nassar, Mary C. Reedy, and Page A.W. Anderson 402

Separability of relaxation indices in isolated ventriculocytes
John W. Krueger, Barry London, and Gerard Siciliano 406

The influence of rest periods on calcium currents and contractions in isolated ventricular myocytes from guinea-pig and rabbit hearts
Donald M. Bers, and Peter Hess 410

Electromechanical properties of isolated feline myocytes
S. R. Houser, A. Bahinski, R. B. Kleiman, W. H. duBell, V. Duthinh, H. Hartmann, and C. Philips 414

Glycolysis and the metabolic regulation of cardiac ATP-sensitive K+ channels
James N. Weiss, and Scott T. Lamp 418

Cardiac myocyte sodium channel: biochemical evidence for a receptor for antiarrhythmic drugs
Roger J. Hill, Henry J. Duff, Nancy J. Cannon, and Robert S. Sheldon 422

The single ventricular myocyte as a model for Wenckebach periodicity
Mario Delmar, Donald C. Michaels, and Jose Jalife 426

Current-voltage relationship of the backward-running Na/K pump in isolated cells from guinea-pig ventricle
Anthony Bahinski, and David C. Gadsby 430

Binding of ouabain to isolated, adult dog heart cells: effects on Na+-pump function and contractility
L. M. Porterfield, B. D. Tucker, and R. W. Caldwell 434
